

ILLINOIS STATE LIBRARY.

No. /

40487

Alcove No.

Division

Shelf No.

BOOKS may be taken from the State Library by the members of the General Assembly and its officers during the session of the Legislature, and at any time by the Governor, and the officers of the Executive Department of this State who are required to keep their offices at the seat of government, and the Justices of the Supreme and Appellate Courts.

No person shall be allowed to take any book or property from the Library without executing a receipt therefor, nor to take or detain from the Library more than two volumes of miscellaneous works at any one time.

No miscellaneous works shall be detained more than two weeks. All Laws, Journals, etc., taken by members of the Legislature shall be returned at the close of the session.

If any person injures, or fails to return any book taken from the Library within the time above mentioned, HE SHALL FORFEIT AND PAY TO THE LIBRARIAN, for the benefit of the Library, THREE TIMES THE VALUE THEREOF, or of the set to which it belongs.

Any person, not above mentioned, who takes books or other articles from the State Library without the consent of the Librarian will be prosecuted for larceny.

Any person taking books from the State Library without reporting the same to the Librarian or assistant, and causing the same to be properly charged upon the Register, will be prosecuted to the full extent of the law.

No entry of charge or return of books will be permitted to be made, except by the Librarian or assistant.

Persons using books of the Library will return the same to the Librarian or assistant.

JAMES A. ROSE,

Secretary of State and ex-officio State Librarian.

HON. RICHARD YATES, *Governor of Illinois*:

SIR:—I have the honor, on behalf of the Board of Commissioners of Labor, to submit herewith the twenty-first annual report of the coal industry of the State for the year ended July 1, 1902, together with the fourth annual report of the Illinois Free Employment offices.

Very respectfully,

DAVID ROSS,

Secretary.

TABLE OF CONTENTS.

Introductory—Twenty-first Annual Report, 1902.....	1
Record for 62 years.....	3
Summary for the year	5
Classification of mines, shipping and local.....	7
Grouping of mines by tonnage.....	8
Mines producing 100,000 tons and over.....	11
Gain and loss in number of mines	15
Shipping mines of the State with output.....	16
The output for the year.....	26
The output for twenty-one years.....	29
Haulage in the mines	31
Output by counties.....	31
Disposition of the output, shipping mines	35
Railroads transporting the output and counties contributing	39
Counties producing the commercial coal and railroads transporting.....	43
Tonnage delivered to railroads.....	47
Days of active operation of mines	48
Average value of coal.....	50
Mine employes.....	52
Prices paid for mining.....	54
Payment of wages.....	55
Earnings of miners.....	56
Machine mining	61
Consumption of powder	65
Fatal accidents in mines.....	66
Non-fatal accidents in mines.....	75
RECAPITULATIONS:	
Counties and production.....	83
Value of product—powder.....	84
Disposition of output, employes, days and boilers	85
Value of coal, hand and machine mining, price of mining.....	86
Divernon coal mine	88
Howells, Ebenezer, obituary.....	90
Southern Illinois Coal Mining & Washing Co.'s mine.....	92
Spring Valley Coal Co.'s No. 5 mine	94
Chicago Wilmington & Vermillion Coal Co.'s mine.....	96
Kelleyville Coal Co.....	87
Acme Coal Co.....	98

ANNUAL REPORTS OF STATE INSPECTORS OF MINES—

---	----

TWENTY-FIRST ANNUAL REPORT.

STATISTICS OF COAL IN ILLINOIS FOR THE YEAR ENDED JUNE 30, 1902.

History records that the first discovery of coal in the United States was made in Illinois. In 1679, two and one-fourth centuries ago, Father Hennepin, one of the early explorers of the Mississippi valley, found coal not far from where the city of Ottawa is now situated; however, there is no probability that any mines were opened in that locality until a long time after mining of coal was begun in the southern part of the State.

The area of the coal field in Illinois covers substantially 35,000 square miles, or about 63 per cent of the area of the State; its northern boundary is from the north line of Grundy county west to the Mississippi river, several miles north of Rock Island. Its western boundary extends south along the river to the north line of Henderson county, when it leaves the river, inclining inland from 10 to 30 miles to the southern part of Jackson county.

The coal measures of the State consist of 16 coal seams ranging from one to nine feet in thickness; these are numbered consecutively from the bottom upwards. The records of the early history of coal mining in Illinois are very meager; the first record to be found is that coal was mined in Jackson county in 1810; the locality was on the Big Muddy river and was worked by drift along the outcrop in the bluffs; a flat-boat was loaded with coal at this place and shipped to New Orleans. Again, in 1832, several boat loads were sent from the same vicinity to the same market. We find another record, where, in 1833, 150,000 bushels (6,000 tons) of coal were mined in St. Clair county, and hauled by wagons to St. Louis. The United

States census of 1840 records that coal was mined in 19 counties of Illinois; the product was 424,187 bushels (16,968 tons), and 152 men were employed in the industry. From 1840 to 1860, a period of twenty years, we are without any general or special data of coal mining in the State; however, some scattering statistics are to be found in the geological reports of the State.

The census of 1850 seems to have omitted the coal industry entirely, except that it is included with all kinds of mining, stone, lead, etc. In the census of 1860 the output of coal in the State is given as 14,200,000 bushels (568,000 tons), giving employment to 1,049 men.

No other data is to be found of the progress of mining in the State until the census of 1870; here the number of counties producing coal is given as 37, with an output of 2,624,163 tons for the year, and 6,301 men employed. The next record is the census of 1880. This gives the output for the year as 6,089,514 tons, the product of 46 counties and employing of 16,301 men.

The constitutional convention of 1870 incorporated into the Constitution the first provision authorizing the General Assembly to pass necessary laws for the protection of operatives in mines.

The first mining law enacted under the provision of the Constitution was by the Twenty-seventh General Assembly, 1871, approved March 27, 1872. This law, however, provided for county inspectors only and that reports be made to county boards. Amendments were made to this law in different forms, by the 28th, 30th and 31st General Assemblies. However, none of these amendments provided for making reports to any State officer. The Thirty-third General Assembly (1883) amended the mining law by dividing the State into five inspection districts, and provided for the appointment by the Governor of a State inspector for each district, also providing for the making of annual reports to the Bureau of Labor Statistics.

From these published reports, and from other reliable data, the following statistical summary is presented, covering a period of 63 years, giving the vital information pertinent to a brief history of coal mining in Illinois.

Years.	Mines.	Men.	Tons.	Days.	FATAL ACCIDENTS.			NON-FATAL.	
					No.	Widows.	Children	No.	Days lost.
1840	152	16,968
1850
1860	1,049	568,000
1870	322	6,301	2,624,163

Totals.	1,432	738	2,119	7,609

* In the Diamond mine at Braidwood 69 men were drowned, and ten men were killed by an explosion at Coulterville.

† Number of men injured so as to lose a month or more of time. Previous years all men losing one week or more of time were reported.

Briefly reviewing the foregoing statement, it will be seen that for the first 20 years the number of miners employed in the industry did not exceed, on an average, more than 788 men each year. During the next decade, although we have only the record of one year, 1870, it may be fairly estimated that the industry made rapid progress, as the number of mines for this year is given as 322, number of miners, 6,301, with a total output of 2,624,163 tons. For the next

ten years, to 1880, the increase was in still greater proportion; the number of mines increased 83 per cent, the number of men employed, 159 per cent, and the number of tons produced, 132 per cent.

For the year 1881 there is no data extant of the progress of the industry, except the broken or irregular reports of the few county inspectors. These reports have never been compiled.

For the year ending July 1, 1882, statistics were obtained from 43 counties, showing the increase over 1880 to be 19 per cent in the number of mines; 19 per cent in the number of men employed, and 50 per cent in the tons produced.

For the next 20 years, 1883 to 1902, inclusive, a complete history of coal mining in this State, in all its detailed operations, has been officially reported through the State inspectors and recorded in the annual coal reports published by this bureau.

Recent developments have served to direct public attention to the importance of the coal mining industry as a factor necessary to the welfare and progress of the nation. Our people are profoundly impressed with the value of the services rendered by the mine workers, and are now more than ever before willing to aid them in the matter of securing fair treatment and adequate compensation. The recent apprehension of a possible fuel famine was caused not so much by the suspension in the anthracite fields of Pennsylvania—that only aggravated the situation—so much as by the unprecedented and rapidly increasing demands of the great manufacturing concerns of the country. Had it not been for this fact the withdrawal of 25,000,000 tons of anthracite coal, while it no doubt would operate to advance values, could not have caused any serious public inconvenience. The last few years have wrought an industrial revolution. Foreign competitors, fearing the loss of markets, have sent commissions here for the purpose of studying American methods of production. There is scarcely an industrial line, including coal, in which the United States does not now excel.

The impetus in this direction during the past decade is without precedent anywhere. Our attitude in this respect can be only partially explained by the fact that while we represent, in point of population, but 5 per cent of the world's inhabitants, 34 per cent of all the goods used by a billion and a half of people are now manufactured in the United States.

In certain lines the labor of one American is equal to more than that of four Europeans. The mills at Homestead last year, employing 4,000 men, produced three times more steel than the Krupp mills of Germany employing 15,000 men. This is but one of the many results of present day methods of production.

If the average citizen would only consider what these extraordinary demands upon the mining properties of this and other states mean, there would be less frenzied declamation against the alleged restrictions of trade unions, coupled as it frequently is with indiscriminate charges of conspiracy on the part of railroads and coal corporations.

Notwithstanding the suspension of the anthracite mines, in addition to the increased demands of multiplying manufacturing establishments, the substantial interests of the country were at no time seriously imperiled. The one danger that menaced the nation's welfare was the fear, which fortunately proved unfounded, that the soft-coal miners would cease operations out of sympathy with their eastern craftsmen. To the credit of the organization and its officials, aided by the timely intervention of President Roosevelt, the nation was spared the affliction of a coal shortage, and its people received with pride and acclamation the assurance of the honor and integrity of our mine workers expressed in their refusal to violate any of the terms or conditions of a mutual agreement. This assertion of respect for a wage contract ought to remove the last vestige of opposition to recognizing the union, as there is, in fact, no other agency through which this form of agreement as to wages and other conditions of employment can be reached. Sufficient interest has already been created to require both factors in production to unite and co-operate, and the employer who occasions suffering or public hardship because of his refusal to recognize his employes as an organized body is not only recreant to the requirements of modern citizenship, but a positive menace to the present and future interests of industrial society.

The following is a condensed statement of the operations in the coal industry for the year:

SUMMARY FOR THE YEAR ENDED JUNE 30, 1902.

Number of counties producing coal.....	54
Number of mines and openings of all kinds.....	915
New mines or old mines re-opened during the year.....	111
Mines closed or abandoned since last report.....	111
Total output of all mines in tons of 2,000 pounds.....	30,021,300
Number of shipping mines.....	332

Total output of shipping mines, tons.....	28,824,750
Number of mines in local trade only.....	583
Output of local mines, tons.....	1,196,550
Total tons of lump coal.....	15,041,673
Total tons of other grades.....	14,979,627
Total tons shipped.....	25,680,542
Tons supplied to locomotives at the mines.....	968,284
Tons sold to local trade.....	2,143,512
Tons consumed (or wasted)—the plant.....	1,235,235
Average days of active operation for shipping mines.....	210.2
Average days of active operation for all mines.....	179.6
Average value per ton, all grades, at the mines.....	\$0.942
Average value per ton of lump coal at the mine.....	\$1.173
Average value per ton of other grades.....	\$0.709
Aggregate home value of total product.....	\$28,272,050
Number of mines in which mining machines are used.....	6 ⁴
Number of mining machines in use.....	464
Number of tons undercut by machines.....	6,497,123
Number of tons mined by hand.....	23,524,177
Average number of miners employed during the year.....	32,875
Average number of other employes.....	13,130
Total employes.....	46,005
Number of men at work under ground.....	41,518
Number at work on surface.....	4,487
Average price paid per gross ton for hand mining, shipping mines.....	\$0.5635
Average price paid per gross ton for machine mining.....	\$0.4201
Number kegs of blasting powder used.....	637,448
Number of men accidentally killed.....	99
Number of wives made widows.....	59
Number of children left fatherless.....	154
Number of men injured so as to lose a month or more of time.....	406
Number of gross tons mined to each life lost.....	303,245
Number of employes to each life lost.....	465
Number of gross tons mined to each man injured.....	73,944
Number of employes to each man injured.....	113
Number of mines using steam boilers.....	436
Number of steam boilers in use at the mines.....	1,175

The number of mines reported is 915, the same as last year; the total tons produced 30,021,300, an increase of 3,385,981 tons.

The number of men employed in and about the mines was 46,005, being an increase of 1,862 men over last year, and 6,621 more than were employed during the year 1900.

The average number of days for the commercial mines was 210; this is an increase of six days over last year.

In the following table is presented the total number of mines, men and tons, both shipping and local, for the year, by districts:

CLASSIFICATION OF MINES.

TABLE 1.—*Mines, Men and Tons of Shipping and Local Mines, by Districts.*

DISTRICT.	TOTAL.			SHIPPING.			LOCAL.		
	Mines.	Men.	Tons.	Mines.	Men.	Tons.	Mines.	Men.	Tons.
First	77	8,035	3,729,724	33	7,646	3,540,698	44	389	189,026
Second	176	6,583	3,104,516	25	5,789	2,852,589	151	794	251,927
Third	241	4,268	2,413,463	56	3,372	2,064,379	185	896	349,084
Fourth	84	5,679	3,939,864	34	5,226	3,757,201	50	453	182,663
Fifth	99	7,564	6,213,336	46	7,306	6,140,222	53	258	73,164
Sixth	111	7,929	6,241,847	80	7,764	6,162,466	31	165	79,381
Seventh	127	5,947	4,378,500	58	5,704	4,307,195	69	243	71,305
The State.	915	46,005	30,021,300	332	42,807	28,824,750	583	3,198	1,196,550

The total number of mines is the same this year as last; the shipping mines have increased by one and the local mines decreased one.

The percentages of mines, men and tons are shown in the next table:

TABLE 2.—*Percentages of Mines, Men and Tons of Shipping and Local Mines, by Districts.*

DISTRICT.	SHIPPING.			LOCAL.		
	Mines.	Men.	Tons.	Mines.	Men.	Tons.
First	42.86	95.19	94.93	57.14	4.84	5.07
Second	14.20	87.94	91.89	85.80	12.06	8.11
Third	23.24	79.01	85.54	76.76	20.99	14.46
Fourth	40.48	92.02	95.36	59.52	7.98	4.64
Fifth	46.46	96.59	98.82	53.54	3.41	1.18
Sixth	72.07	97.92	98.73	27.93	2.08	1.27
Seventh	45.67	95.91	98.37	54.33	4.09	1.63
The State	36.28	93.05	96.01	63.72	6.95	3.99

The difference in these percentages from last year is very slight; the shipping mines show a small increase.

The table following presents the percentages of the tonnage of shipping mines for a series of six years:

TABLE 3.—*Percentages of the Tonnage of Shipping Mines of the State for a Series of Six Years, by Districts,*

Year.	First.	Second.	Third.	Fourth.	Fifth.	Sixth.	Seventh.	The State.
1902	94.93	91.89	85.54	95.36	98.82	98.73	98.37	96.01
1901	96.68	89.38	85.98	94.65	98.65	98.64	97.63	95.84
1900	95.81	89.14	87.18	95.47	98.39	98.84	96.47	95.64
1899	94.73	92.53	79.93	95.43	98.81	98.57	98.52	96.15
1898	91.35	88.61	78.59	93.69	99.12	98.48	98.11	94.93
1897	97.29	92.99	78.91	95.20	99.32	98.55	97.82	96.53

It will be noticed that, while there has been some variation in the different districts, the product of the State shows but little change.

The following table is a grouping of the mines by tonnage:

TABLE 4.—*Grouping of Mines by Tonnage and Districts.*

DISTRICT.	TONNAGE OF MINES PRODUCING—											
	Under 1,000.		1,000 and under 10,000.		10,000 and under 50,000.		50,000 and under 100,000.		100,000 and under 200,000.		200,000 and over.	
	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.	No.	Tons.

Second ...	79	50,379	68	186,604	14	172,137	3	95,507	5	712,707	7	1,887,182
Third	106	53,162	75	218,037	47	1,072,116	8	476,314	5	593,834
Fourth....	20	10,657	29	105,292	13	233,449	9	758,164	7	925,846	6	1,906,456
Fifth.....	36	8,221	15	34,907	7	147,397	12	962,234	19	2,607,943	10	2,452,684
Sixth	9	7,449	23	76,201	35	1,219,551	21	1,451,026	14	1,880,697	6	1,606,923
Seventh ..	45	20,420	25	55,165	24	572,800	16	1,139,331	9	1,314,130	5	1,276,654
The State.	314	161,058	263	763,597	152	3,694,890	76	5,376,350	72	9,923,538	38	10,101,867

Considerable change will be observed in this classification from that of last year. The mines producing less than 10,000 tons have decreased by 44; those of 50,000 and under 100,000 are three less than last year.

The increase in mines that produced 10,000 and under 50,000 tons has been 28; those producing 100,000 tons 14, and mines that produced over 200,000 tons 5.

The table following presents this class of mines in a different form:

TABLE 5.—*Specified Classes of Mines with Percentages of Total Mines and Total Tonnage.*

MINES PRODUCING—	No. of Mines.	Output.	PERCENTAGES.	
			Mines.	Tonnage
Less than 1,000 tons.....	314	161,058	34.31	0.05
One thousand and less than 10,000 tons	263	763,597	28.74	2.54
Ten thousand and less than 50,000 tons.....	152	3,694,890	16.61	12.33
Fifty thousand and less than 100,000 tons	76	5,376,350	8.31	17.90
One hundred thousand and less than 200,000.....	72	9,923,538	7.88	33.55
Two hundred thousand tons and over	38	10,101,867	4.15	33.63
Totals.....	915	30,021,300	100.00	100.00

Here it is shown that the mines producing 50,000 tons and over, constituting 20 per cent of the mines, furnished 85 per cent of the total product. The mines producing 200,000 tons and over, while only 4 per cent of the total number, show an output of 34 per cent of the tonnage.

The number of mines thus arranged is presented in the following table, for a series of 20 years:

TABLE 6.—*Number of Mines in Specified Groups of Tonnage for a Series of Twenty Years.*

YEAR.	NUMBER OF MINES PRODUCING—						Total mines.
	Under 1,000 tons.	1,000 and under 10,000 tons	10,000 and under 50,000 tons	50,000 and under 100,000 tons	100,000 and under 200,000 tons	200,000 tons and over.

1900	340	295	123	70	65	27	920
1901	313	308	124	79	58	33	915
1902	314	263	152	76	72	38	915
Averages—20 years	322	271	141	61	37	12	845
Percentages:							
1902	34.31	28.74	16.61	8.31	7.88	4.15	100.00
1901	34.21	33.66	13.55	8.63	6.34	3.61	100.00
1900	36.95	32.07	15.37	7.61	7.07	2.93	100.00
1899	38.92	29.36	13.84	8.77	6.30	2.81	100.00
1898	39.84	27.70	17.14	9.76	4.77	0.79	100.00
1897	40.56	29.31	14.07	9.26	4.81	1.99	100.00
1896	38.28	32.46	14.85	7.31	5.22	1.86	100.00
1895	37.31	32.28	16.96	7.14	5.26	1.05	100.00
1894	37.32	30.14	19.26	7.30	5.26	0.72	100.00
1893	35.79	29.44	17.77	9.52	5.96	1.52	100.00
1892	39.57	28.49	18.00	7.75	5.48	0.71	100.00

The most notable feature here shown is the large increase in the number of mines producing 100,000 tons and over. Twenty years ago there were 25 mines in this class, this year we have 110, an increase of 340 per cent. In the last decade the number has increased 86 per cent. The tendency seems clear for an increase of large producing mines and an increased capacity, rather than to multiply the smaller mines.

The collieries of the State, which have undoubtedly reached to nearly the maximum of their capacity, are presented in the following lists:

TABLE 7.—*Mines from which more than 100,000 tons and less than 200,000 tons of Coal have been delivered during the year 1902.*

38	Empire Coal Co. No. 3.....	Gilchrist.....	261	140	4.3	H.	202,898
	Total.....	10,101,867

In the first list 72 collieries are represented, aggregating an output of 9,923,538 tons, or an average of 137,827 tons each. The second list shows 38 collieries, the combined product being 10,101,867 tons. In this class the Chicago Wilmington and Vermilion Coal Company, Madison Coal Company, and Consolidated Coal Company, are each represented by four mines; the Big Muddy Coal and Iron Company and Spring Valley Coal Company, three each; the Kelleyville Coal Company, Chicago Virden Coal Company and the Himrod Coal Company, two each; these companies represent 24 collieries; the others are single mines, 14 in all, of the companies named.

The Kelleyville Coal Company, Danville, heads the list of these larger collieries with 404,391 tons; this is the first time in the history of coal mining in the State where a single mine has achieved this

remarkable output. Ten years ago a single mine producing 100,000 tons less than the mine heading this list was considered as having almost reached the climax.

The changes in the number of mines in the districts are presented in the following table:

TABLE 9.—*Gain and Loss in Number of Mines, 1901-1902, by Districts.*

District.	Total number of mines, 1901.	Number of new mines opened, 1902.	Total.	Number mines abandon'd 1902.	Total number of mines, 1902.	YEAR 1902.	
						Gain.	Loss.
First.....	80	8	88	11	77	3
Second.....	187	21	208	32	176	11
Third	225	25	250	9	241	16
Fourth.....	81	12	93	9	84	3
Fifth.....	102	20	122	23	99	3
Sixth.....	110	12	122	11	111	1
Seventh.....	130	13	143	16	127	3
The State....	915	111	1,026	111	915	20	20

The third district shows a gain of 16 mines, the fourth three and the sixth one; these, however, are all small mines. The other districts show a combined loss of 20, mostly small mines.

For a number of years the mines classed as "shipping mines", being the collieries transporting their product to the markets of the country, have produced regularly about 96 per cent of the coal of the State, and employed nearly the same proportion of those engaged in the work of mining and delivering the same, thereby, in fact, virtually representing the coal industry of Illinois. The tabulation, therefore, in this report has been, for the most part, divided on the lines indicated, showing the operations of the shipping or commercial mines in detail as regards essential particulars, and the grouping of local or limited mines as one item. This separation has always been a distinct feature of these reports, but not carried throughout all the distinct particulars.

To establish the importance of this separation and the governing influence held by these commercial mines, respecting the coal industry of the State, the following list of 332 mines, operated by 200

companies, 23 firms and 24 individuals, is presented, giving the total tons produced, the tons shipped and the tons disposed of otherwise.

A List of the Shipping or Commercial Collieries of the State, arranged according to Output, 1902.

NAME OF OPERATOR.	Number of mines.	Postoffice address and location of mine.	Total output of all grades.	DISPOSITION OF OUTPUT.

The Consolidated Coal Company heads the list with 21 mines operated during the year, the yield being 2,144,355 tons, 90 per cent of the product being shipped.

The Chicago Wilmington & Vermilion Coal Company, Madison Coal Company and Spring Valley Coal Company follow, each producing over 1,000,000 tons during the year, the shipment of their output being 96, 90 and 94 per cent respectively, several of the other companies shipping even a greater percentage than those noted.

THE OUTPUT FOR THE YEAR.

The total yield of the mines of the State for the year has been 30,021,300 tons, divided as to grades, as shown in the following table, by districts:

TABLE 10.—*Output of the Shipping and Local Mines of the State with Tons of the Different Grades of Coal, by Districts—1902.*

DISTRICT.	TOTAL OUTPUT— TONS.	TONS OF THE DIFFERENT GRADES OF COAL.					
		Lump.	Mine run.	Egg.	Nut.	Pea or screen- ings.	Slack or waste.
First.....	3,540,698	2,240,426	277,229	112,728	105,493	774,061	30,761
Second.....	2,852,589	1,991,748	176,784	20,590	71,941	294,312	294,214
Third.....	2,064,379	1,152,136	418,216	34,759	132,103	243,132	84,033
Fourth.....	3,757,201	1,015,000	2,115,488	12,916	118,379	414,454	80,964
Fifth.....	6,140,222	2,902,172	1,581,975	74,215	262,859	1,101,116	217,885
Sixth.....	6,162,466	3,452,056	1,219,641	13,042	367,767	852,054	257,906
Seventh.....	4,307,195	1,441,962	963,347	408,829	504,117	863,648	125,292
The State.....	28,824,750	14,198,500	6,752,680	677,079	1,562,659	4,542,777	1,091,055
Local mines.....	1,196,550	843,173	233,524	3,906	23,797	61,455	30,695
Total.....	30,021,300	15,041,673	6,986,204	680,985	1,586,456	4,604,232	1,121,750

The distribution as to grades is substantially the same as last year. Some of the districts, however, show a decided increase in the smaller grades, notably the increase of pea coal in the third, fourth, fifth and seventh districts.

The feature of the proportion of the different grades of coal is more observable in the following percentages:

TABLE 11.—*Percentages of the Total Output of the Different Grades of Coal, Shipping and Local Mines, by Districts.*

DISTRICT.	Per cent of total output.	PERCENTAGES OF THE DIFFERENT GRADES OF COAL.					
		Lump.	Mine run.	Egg.	Nut.	Pea or screen- ings.	Slack or waste.
First	12.28	63.28	7.83	3.18	2.98	21.86	.87
Second	9.90	69.93	6.20	.72	2.52	10.32	10.31
Third	7.16	55.81	20.26	1.68	6.40	11.78	4.07
Fourth	13.04	27.01	56.30	.34	3.16	11.04	2.15
Fifth	21.30	47.27	25.76	1.21	4.28	17.93	3.55
Sixth	21.38	56.02	19.79	.21	5.97	13.83	4.18
Seventh	14.94	33.48	22.37	9.49	11.70	20.05	2.91
The State	100.00	49.26	23.43	2.35	5.42	15.76	3.78
Local mines	100.00	70.48	19.51	.33	1.99	5.13	2.56

Considering the percentages of the total production by districts, it is here shown that the fifth and sixth districts contributed the same quantity to the output; while combined with the seventh district, the three furnished 58 per cent of the total product.

The percentages of lump coal of shipping mines for the State is approximately the same as for all mines last year. The same is true for the several districts.

For all mines the total output of the State, with the different grades and percentages, is given in the following table:

TABLE 12.—*Total Output of the Different Grades of Coal, all Mines, for Three Years, with Percentages.*

YEAR.	Total output—tons.	TONS OF THE DIFFERENT GRADES OF COAL.					
		Lump.	Mine run.	Egg	Nut.	Pea or Screenings.	Slack or waste.
1900.....	25,153,929	13,927,899	5,554,417	495,637	1,323,582	2,811,520	1,040,874
1901.....	26,635,319	13,321,124	6,892,710	486,596	1,217,127	3,667,591	1,060,141
1902.....	30,021,300	15,041,673	6,986,204	680,985	1,586,456	4,604,232	1,121,750
Percentages ;							
1900.....		55.37	22.08	1.97	5.26	11.18	4.14
1901.....		50.01	25.84	1.83	4.57	13.77	3.98
1902.....		50.10	23.27	2.27	5.28	15.34	3.74

A very slight difference is observable in these percentages of all mines and those of the shipping mines.

A comparison of the total output of all mines for three years, with the gain and loss, by districts, is shown in the following table:

TABLE 13.—*Output for the years 1900, 1901 and 1902, Compared by Districts.*

DISTRICT.	TOTAL OUTPUT—TONS.			Gain (+) or loss (—) 1901.	Gain (+) or loss (—) 1902.	Percentages of gain 1902 over 1901.
	1900.	1901.	1902.			
First.....	3,702,049	3,563,198	3,729,724	—133,851	+161,526	4.53
Second.....	2,453,363	2,770,413	3,104,516	+317,050	+334,103	12.06
Third.....	1,997,173	1,985,205	2,413,463	—11,968	+428,258	21.57
Fourth.....	3,533,331	3,253,160	3,939,864	—280,171	+686,704	21.1
Fifth.....	4,816,452	5,416,504	6,213,336	+600,052	+796,882	14.71
Sixth.....	5,235,152	5,796,586	6,241,847	+561,434	+445,261	7.6
Seventh.....	3,416,409	3,845,253	4,378,500	+428,844	+533,247	12.22
The State.	25,153,929	26,635,319	30,021,300	+1,481,390	+3,385,981	12.71

It will be observed that every district shows a substantial gain this year over last; in 1901 the first, third and fourth districts show a loss in tonnage from 1900.

In the column of percentages it is found that the largest gains were in the third and fourth districts, both being 21+per cent; the fifth, seventh and second show but little variation in percentage of gain.

A general and comprehensive view of the coal industry of the State for a series of 21 years is presented in the following table:

TABLE 14.—*Output of the State for Twenty-one Years and the Mines and Men Producing the same.*

Year.	Mines.	Men.	Total output. (Tons)	Tons of lump.	Tons of other grades.	PERCENTAGE OF—	
						Lump.	Other grades.
1882	704	20,290	11,017,069	9,115,653	1,901,506
1883	639	23,939	12,123,456	10,030,991	2,092,465
1884	741	25,575	12,208,075	10,101,005	2,107,070
1885	778	25,946	11,834,459	9,791,874	2,402,585
1886	787	25,846	11,175,241	9,246,435	1,928,806
1887	801	26,804	12,423,066	10,278,890	2,144,176
1888	822	29,410	14,323,181	11,855,188	2,472,993
1889	854	30,076	14,017,298	11,597,963	2,419,335
1890	936	28,574	15,274,727	12,638,361	2,636,363	82.74	17.26
1891	918	32,951	15,660,698	12,960,224	2,700,474	82.76	17.24
1892	839	33,632	17,862,276	14,730,963	3,131,313	82.47	17.53
1893	788	35,390	19,949,564	16,112,899	3,836,665	80.77	19.23
1894	836	38,477	17,113,576	13,865,284	3,248,292	81.02	18.98
1895	874	38,630	17,735,864	14,045,962	3,689,902	79.25	20.75
1896	901	37,057	19,786,626	14,210,024	5,576,602	71.86	28.14
1897	853	33,788	20,072,758	14,672,241	5,400,517	73.10	26.90
1898	881	35,026	18,599,299	14,208,795	4,390,504	76.39	23.61
1899	889	36,991	23,434,445	17,427,598	6,006,847	74.37	25.63
1900	920	39,384	25,153,929	13,927,899	11,226,030	44.63	55.37
1901	915	44,143	26,635,319	13,321,124	13,314,195	50.01	49.99
1902	915	46,005	30,021,300	15,041,673	14,979,627	50.10	49.90

The increase in the tonnage in these years largely exceeds that of the men employed or the number of mines. Reduced to percentage it is found that the mines have increased 30 per cent, the men 127 per cent and the tonnage 263 per cent.

Relatively the performance of the several districts in supplying the coal for a series of 12 years is shown in percentages as follows:

TABLE 15.—*Percentages of the Tonnage of the Total Output of the State, produced by each District, for a Series of 12 Years.*

YEAR.	DISTRICTS.						
	First.	Second.	Third.	Fourth.	Fifth.	Sixth.	Seventh.
1891	19.69	9.20	17.84	28.27	25.00
1892	19.36	9.70	18.26	28.65	24.03
1893	17.02	10.03	17.03	28.99	26.93
1894	15.69	9.95	17.99	30.23	26.14
1895	15.42	11.25	16.65	31.65	25.03
1896	15.34	13.60	3.18	14.17	23.70	19.08	10.93
1897	14.64	13.64	2.87	14.63	24.95	17.73	11.64
1898	11.83	13.71	3.89	13.83	21.10	18.60	16.99
1899	15.08	14.19	3.11	14.33	20.53	18.28	14.48
1900	14.72	9.75	7.94	14.05	19.15	20.81	13.58
1901	13.40	10.40	7.45	12.22	20.33	21.76	14.44
1902	12.42	10.34	8.04	13.12	20.70	20.79	14.59

For the first five years shown in this exhibit, the five districts maintained a very even supply. The creation of two additional districts, affecting the report of the year 1896 and subsequent years, materially changed the proportion of production in all the districts except the first.

HAULAGE IN THE MINES.

The system of haulage in the shipping mines is presented in the following table by districts:

TABLE 16.—*Haulage of Coal in the Shipping Mines of the State, by Districts.*

DISTRICT.	ELECTRICITY.		CABLE.		HORSE.		HAND.		VARIOUS.	
	No. of mines.	Tons.	No. of mines.	Tons.	No. of mines.	Tons.	No. of mines.	Tons.	No. of mines.	Tons.
First.....					28	2,994,259	1	2,401	4	*544,038
Second.....			3	410,360	16	2,414,301	6	27,928		
Third.....	1	137,243			54	1,913,152			1	†13,984
Fourth.....	2	543,084	7	1,492,793	21	1,191,135			4	‡530,189

Sixth.....					77	5,377,262			3	‡755,204
Seventh.....	4	895,713			54	3,421,482				
The State..	10	2,258,293	15	2,626,182	288	22,036,531	7	30,329	12	1,873,416

*Horse, cable and electricity.

†Dogs.

‡Horse, cable, electricity and steam.

§Horse and electricity.

This accounts for haulage in shipping mines only. Very little change will be observed in the methods in use, from former years; one mine in the first and six in the second district haul by hand. The inspector of the third district reports one mine in which dogs are employed in hauling the coal to the shaft bottom. At this mine the coal seam is only 2 feet 4 inches thick.

OUTPUT BY COUNTIES.

For the past three years seventeen coal producing counties have had a record of supplying over half a million tons each; their combined product this year is 87 per cent of the total output of the State. Sangamon county has ranked as the largest producer for these years.

The following table gives the rank of the counties with the number of tons for a series of five years:

TABLE 17.—*Relative Rank of the Counties of the State Producing 500,000 Tons of Coal or Over for a Series of Five Years—1898-1902.*

County.	Rank...	Tonnage, 1902.	Rank...	Tonnage, 1901.	Rank...	Tonnage, 1900.	Rank...	Tonnage, 1899.	Rank...	Tonnage, 1898.
Sangamon	1	3,672,989	1	2,919,223	1	2,519,911	2	2,083,572	1	1,763,863
St. Clair.....	2	2,578,553	2	2,518,847	2	2,253,883	4	1,849,474	2	1,600,752

This is the first time that the product of any one county has reached the three million mark. The output of Sangamon county's 30 mines being 3,672,989 tons, which is over 1,000,000 tons more than any other, clearly entitles it to rank as number one.

Following is a table showing the number of mines, men and tons, arranged alphabetically by counties:

TABLE 18.—*Coal Producing Counties of the State, Giving Number of District, Mines, Men and Tons, of Shipping and Local Mines, 1902.*

54 Counties.....	332	42,807	28,824,750	593	3,198	1,196,550

This accounts for the activity in coal mining by counties. Of the 54 supplying the coal of the State, 14 have no shipping and 7 no local mines; 9 counties having shipping mines give employment to over 2,000 men. Sangamon with 28 commercial mines employed 4,287 men; Bureau, 8 mines, 3,762 men; LaSalle, 13 mines, 3,496 men; Grundy, 12 mines, 3,254 men; St. Clair, 53 mines, 3,033 men. Bureau county mines average the largest number of men, 470 to each mine.

DISPOSITION OF THE OUTPUT.

The year's product was distributed as shown in the following table:
 TABLE 19.—*Disposition of the Output of Shipping Mines, by Districts, also Local Mines.*

DISTRICT.	Total output of all grades. Tons.	Tons shipped from mines.	Tons supplied to locomotives at mines.	Tons sold to local trade.	Tons used and wasted at the mines.
First.....	3,540,698	3,098,704	113,939	187,178	140,877
Second	2,852,589	2,631,995	60,085	67,894	92,615
Third.....	2,064,379	1,926,370	11,583	71,328	55,098
Fourth.....	2,757,201	3,233,183	145,842	224,260	153,916
Fifth.....	6,140,222	5,496,832	198,717	236,287	208,386
Sixth	6,162,466	5,367,313	261,823	223,283	310,047
Seventh.....	4,307,195	3,919,872	164,108	67,728	155,487
Shipping mines	28,824,750	25,674,269	956,067	1,077,958	1,116,426
Local mines.....	1,196,550	18,460	1,065,554	112,536
The State	30,021,300	25,674,269	974,557	2,143,512	1,228,962

There has been a slight increase in the tonnage shipped over that of last year. The supply of the shipping mines to the local trade has also increased about 20 per cent.

The distribution of the coal being reduced to percentages presents the following:

TABLE 20.—*Percentages of the Output of Shipping and Local Mines, also Percentages of the Distribution, by Districts, 1902.*

DISTRICT.	PERCENTAGES OF—				
	Total output.	Tons shipped.	Tons to locomotives.	Tons sold to local trade.	Tons consumed or wasted at the mines.
First.....	12.28	87.52	3.22	5.28	3.98
Second	9.90	92.27	2.10	2.38	3.25
Third.....	7.16	93.31	.56	3.46	2.67
Fourth	13.04	86.05	3.88	5.97	4.10
Fifth.....	21.30	89.52	3.24	3.85	3.39
Sixth	21.38	87.10	4.25	3.62	5.03
Seventh.....	14.94	91.01	3.81	1.57	3.61
Shipping mines.....	100.00	89.07	3.30	3.74	3.89
Local mines.....	100.00	1.54	89.05	9.41

This reveals that the shipping mines have loaded on to cars for shipment and supplied to locomotives at the mines over 92 per cent of the product, leaving less than 8 per cent about evenly divided between the local trade and that used or wasted at the mines. Each of the districts show an increase over last year in the tons shipped; the third shows an increase of 14 per cent, the second 9 per cent the other district from 2 to 6 per cent.

The productiveness of the coal producing counties and the disposal made of the output is presented as follows:

TABLE 21.—*Disposition of the Output of Shipping Mines by Counties and Districts.*

FIRST DISTRICT.

County.	Total tons.	Tons shipped.	Tons supplied to locomotives at the mines	Tons sold to local trade.	Tons consumed or wasted at the mines.
Grundy.....	1,356,752	1,294,871	20,655	41,226
Kankakee.....	51,901	41,076	3,117	7,708
LaSalle.....	1,777,438	1,470,465	101,303	127,892	77,778

The district.....	4,307,195	3,919,872	164,108	67,728	155,487
Percentages.....	100.00	91.01	3.81	1.57	3.61
Local mines.....	71,305	69,263	2,042

This exhibit sets forth all the vital information concerning the coal raised and the manner of its disposal, to clearly show the important part each county maintains or contributes to the industry.

The next matter to bring to notice is the transportation of the product of the coal mines to the markets of the country. This is set forth in the following table:

TABLE 22.—*Railroads which have hauled the Coal Output of Shipping Mines of the State and the Tonnage Contributed to each Road, by Counties—1902.*

Number.	RAILROADS AND COUNTIES.	TONS RECEIVED BY EACH ROAD FOR—		PERCENTAGE—

	Total tons hauled by 35 railroads.....	25,674,269	974,557		

The Illinois Central railroad traverses 17 of the coal producing counties of the State and has transported to the markets nearly three times the tonnage of any other road—in all, 24 per cent of the total tons shipped. Williamson county contributes the largest tonnage to this road, being 22 per cent of the total tons. The Chicago & Eastern Illinois railroad is credited with the next largest haulage, taking from only two counties. Vermilion county supplies the largest number of tons shipped by any one county over one road. The Chicago, Burlington & Quincy railroad draws from ten counties; the Wabash and Chicago & Alton roads each took shipment from nine counties.

A further setting forth of the transporting of the coal produced by the State is shown in the following table:

TABLE 23.—*Counties which have Produced the Commercial Coal of the State and the Tonnage Delivered to the Several Railroads in each, for Transportation.*

	The State—40 counties.....	25,674,269

Here is disclosed the activity of the different counties of the State in the coal industry and the relative part taken by the railroads in moving this most useful production of our State. Sangamon county leads all the other counties by over 1,000,000 tons in its contribution to the commercial centers of trade. Vermilion and St. Clair follow, each with over 2,000,000 tons; while Williamson, Macoupin, Madison, Bureau, LaSalle and Grundy, in the order named, each send over one and a quarter million tons to the markets.

The conclusion of this vitalizing and important industry is reached in the following exhibit:

TABLE 24.—*Illinois Coal Delivered to Illinois Railroads at the Mines for Shipment, and for use on Locomotives—1902.*

Totals	25,674,269	968,284	26,642,553

The foregoing sets forth concisely the efficiency of the railroads in putting the production of the mines on the market, also revealing to what extent these roads are consumers of coal. By reference it will be observed that nearly 1,000,000 tons of coal have been supplied to locomotives at the mines. This, however, does not account for all the coal used by these roads, as large quantities are hauled by different roads to supply engines at convenient points along the lines, where coal is not to be had at the mine chutes.

DAYS OF ACTIVE OPERATION.

The mines, men and days in the operation of the collieries of the State are shown in the following table:

TABLE 25.—*Days of Active Operation, by Districts.*

DISTRICT.	MINES, MEN AND AVERAGE WORKING DAYS.								
	ALL MINES.			SHIPPING MINES.			LOCAL MINES.		
	Mines.	Men.	Days.	Mines.	Men.	Days.	Mines.	Men.	Days.
First.....	77	8,035	218.8	33	7,646	246.20	44	339	196.
Second.....	176	6,583	173.26	25	5,789	237.84	151	794	162.57
Third	241	4,268	180.50	56	3,372	208.90	185	896	171.88

The State.....	915	46,005	179.5	332	42,807	210.2	583	3,198	161.9

There has been an increase in the number of days worked, in a mines, over last year; the increase at the shipping mines was six days, with an increase of nearly 2,000 men. The shipping mines in the first district were in operation 246.2 days, with 7,646 men at work; in the seventh district the number of days was 177.7 with 5,704 men.

The number of mines and days for a series of ten years, by districts, is shown as follows:

TABLE 26.—*Days of Active Operation of Shipping Mines for a Series of Ten Years.*

YEAR.	FIRST.		SECOND.		THIRD.		FOURTH.		FIFTH.		SIXTH.		SEVENTH.		THE STATE.

1900.....	44	238	20	234	55	201	34	210	44	219	73	217	53	197	323	214
1901.....	39	235.5	26	202	53	188	33	185.7	46	207	77	223.6	57	182.4	331	204.4
1902.....	33	246.2	25	237.8	56	209	34	206.5	46	213.7	80	210.7	58	177.7	332	210.2

The general activity in the coal trade during the year is shown in the increased number of days worked at the shipping mines. The second district shows an increase of 36 days over last year, the third and fourth 21 days each, the first district 10, the fifth 6; the sixth shows a decrease of 13 days and the seventh 5. Both of the latter, however, have a greater increase in the number of men employed.

AVERAGE VALUE OF COAL.

The total tons of coal, as graded, and the prices per ton of each grade, are shown in the following table, by districts:

TABLE 27.—*Total Tons and Average Value of the Different Grades of Coal at the Shipping and Local Mines, by Districts—1902, 1901, 1900.*

DISTRICT.	ALL GRADES.		LUMP COAL.		MINE RUN COAL.

Here it will be noticed a complete separation has been made between the shipping and local mines. Lump coal shows less than one cent a ton from last year. This grade at the local mines, which constitutes 73 per cent of the coal from these mines, sold for \$1.54 per ton; this is 34 cents per ton more than the same grade at the shipping mines. This grade, at the last named mines, makes up about one-half of their total output, and has been the proportion of lump coal put on the market for the past three years. It will be noted that with the exception of the grade known as slack, which is less than 4 per cent of the output of the shipping mines, the entire product goes to the markets of the country.

The following presentation is made of the tonnage and average value per ton for a series of 21 years:

TABLE 28.—*Average Value of Lump Coal Per Ton at the Mine for a Series of Twenty-one Years—1882-1902.*

Year.	Tons of lump coal produced.	Average value per ton.	Year.	Tons of lump coal produced.	Average value per ton.
1882.....	9,115,653	\$1.51	1893.....	16,112,899	\$1.025
1883.....	10,030,991	1.48	1894.....	13,865,284	1.009
1884.....	10,101,005	1.26	1895.....	14,045,962	0.932
1885.....	9,791,874	1.17	1896.....	13,990,924	0.899
1886.....	9,246,435	1.10	1897.....	14,672,241	0.852
1887.....	10,278,890	1.085	1898.....	14,208,795	0.918

1890.....	12,638,364	1.019	1901.....	13,321,124	1.181
1891.....	12,900,224	1.008	1902.....	*14,198,500	1.173
1892.....	14,730,963	1.029			

* Shipping mines.

The publishing of the several grades of coal produced has now been made for three years. However, the classification of the grade known as lump, giving quantity and value, has been continued as shown above. The further separation, giving the product of shipping mines, has been made and will be continued in future reports.

MINE EMPLOYEES.

In the following table will be found the grouping of the different employés in and about the mines of the State.

TABLE 29.—*Classification of Employés in the Shipping Mines, by Districts, with the Employés in Local Mines.*

DISTRICT.	ALL EMPLOYEES.					
	UNDER GROUND.				Above ground.	Total.
	Miners.	Other employés.	Boys.	Total.		
First.....	5,832	1,086	226	7,144	502	7,646
Second	4,214	936	214	5,364	425	5,789
Third	2,426	500	105	3,031	341	3,372
Fourth	3,546	949	169	4,664	562	5,226
Fifth.....	4,962	1,347	259	6,568	738	7,306
Sixth	5,471	1,250	241	6,962	802	7,764
Seventh	3,914	998	135	5,047	657	5,704
The State.....	30,365	7,066	1,349	38,780	4,027	42,807
Local mines.....	2,510	180	48	2,738	460	3,198
Total.....	32,875	7,273	1,397	41,518	4,487	46,005

Remarking only on those employed at the shipping mines and working under ground, it is found that 78 per cent are miners proper, 18 per cent other employés and 4 per cent boys.

Those employed as miners constitute 71 per cent of the total number working in and about the mines, while 90 per cent are at work under ground.

The number employed at the mines for a series of 20 years is shown in the following table by districts:

TABLE 30.—*Employés in Coal Mines of the State for a Series of Twenty Years, by Districts.*

YEAR.	DISTRICTS.							
	First.	Second.	Third.	Fourth.	Fifth.	Sixth.	Seventh.	The State.
1883.....	7,566	3,211	4,070	4,417	4,675	23,939
1884.....	8,013	3,616	5,018	4,781	4,117	25,575
1885.....	7,463	3,391	5,213	4,950	4,429	25,446
1886.....	7,613	3,599	4,870	5,197	4,567	25,846
1887.....	7,915	4,068	4,903	4,934	4,984	26,804
1888.....	8,623	4,914	5,250	5,086	5,537	29,410
1889.....	9,014	4,498	5,117	5,679	5,764	30,076
1890.....	8,258	4,099	5,171	5,685	5,361	28,574
1891.....	9,128	5,089	6,458	5,881	6,395	32,951
1892.....	9,572	4,865	6,453	6,542	6,200	33,632
1893.....	8,831	5,974	6,964	7,021	6,780	35,390
1894.....	10,280	6,713	7,112	7,750	6,621	38,477
1895.....	9,644	7,184	6,607	8,005	7,190	38,630
1896.....	9,380	7,103	2,134	4,467	5,758	4,374	3,816	37,032
1897.....	7,632	6,872	1,635	4,021	5,672	4,100	3,856	33,788
1898.....	7,377	6,799	1,800	4,030	6,093	4,662	4,265	35,026
1899.....	7,498	6,631	1,799	4,655	6,401	5,008	4,999	36,991
1900.....	7,722	5,693	3,864	5,545	5,983	5,885	4,692	39,384
1901.....	7,872	6,306	3,760	6,950	6,837	6,871	5,547	44,143
1902.....	7,646	5,789	3,372	5,226	7,306	7,774	5,704	42,807
Local mines.....	389	794	896	453	253	165	243	3,198
Totals.....	8,035	6,583	4,268	5,679	7,564	7,939	5,947	46,005

In this showing also, those employed at the shipping mines are separate from those at the local mines, the former being 93 per cent of all employés. The second and third districts having the greater proportion of local mines, therefore employ over 50 per cent of the total number of men working at these mines.

PRICES PAID FOR MINING.

The following table gives the tons mined, manner of mining and the prices paid in the different districts and for the State for reducing the coal.

TABLE 31.—Average Prices Paid for Mining by Hand and with Machine, at Shipping and Local Mines, by Districts—1902.

DISTRICT.	MINING BY HAND.					MACHINE MINING.	
	Shipping Mines—Gross Weight.		Local Mines—Screened.			Gross Weight.	
	Tons.	Price per ton.	Tons.	Price per ton.	Tons paid for by the day.	Tons.	Price per ton.
First.....	3,538,440	\$0.73	187,026	\$0.67	2,000	2,258	\$0.56
Second.....	2,848,546	0.72	251,927	0.86	*4,043
Third.....	2,051,990	0.555	347,971	0.77	1,113	12,389	0.45
Fourth.....	3,532,147	0.52	80,818	0.585	101,845	165,054	0.404
Fifth.....	3,846,141	0.49	64,016	0.875	2,303,229	0.42
Sixth.....	3,216,802	0.482	79,381	0.538	2,945,664	0.42
Seventh.....	3,092,746	0.461	71,305	0.50	1,214,449	0.365
The State.....	22,186,812	\$0.5635	1,082,444	\$0.723	104,958	6,647,086	\$0.395

* Paid \$2.10 per day.

For the shipping mines it is found that 77 per cent of the output is mined by hand and by gross weight. The prices paid per ton range from 73 cents in the first district to 46 in the seventh. The prices paid for mining screened coal are confined entirely to the local mines. For machine mining, which is almost entirely confined to the fifth, sixth and seventh districts, the prices have but slight variation, the average being 39.5 cents a ton.

PAYMENT OF WAGES.

The frequency of the payment of wages is presented in the following table:

TABLE 32.—*Frequency of the Payment of Wages at Shipping and Local Mines, by Districts—1902.*

DISTRICT.	PAYMENTS MADE.								
	WEEKLY.			SEMI-MONTHLY.			MONTHLY.		
	Mines.	Men.	Tons.	Mines.	Men.	Tons.	Mines.	Men.	Tons.
First.....				32	7,616	3,540,698			
Second.....				24	5,760	2,842,699	1	29	9,890
Third.....	1	18	7,060	54	3,354	2,057,319			
Fourth.....				34	5,326	3,757,201			
Fifth.....				46	7,285	6,136,793	1	21	3,429
Sixth.....	3	71	61,237	78	7,693	6,101,229			
Seventh.....				58	5,704	4,307,195			
Shipping mines.	4	89	68,297	326	42,668	28,743,134	2	50	13,319
Local mines.....	426	2,005	484,075	151	1,091	685,353	6	102	27,122
The State.....	430	2,094	552,372	477	43,759	29,433,487	8	152	30,441

The method of semi-monthly payments of wages is practically universal at the mines in this State. Over 95 per cent of the men receive their wages twice a month.

The subject is further illustrated in the following:

TABLE 33.—*Percentages of Mines, Men and Tons in Reference to Payment of Wages, for a Series of Ten Years.*

YEAR.	WAGES PAID WEEKLY.			WAGES PAID SEMI-MONTHLY.			WAGES PAID MONTHLY.		
	Mines.	Men.	Tons.	Mines.	Men.	Tons.	Mines.	Men.	Tons.
1893.....	67	27.6	26.2	25	56	56.4	8	16.4	23.4
1894.....	43	11.7	9.7	46	66.6	67.2	11	21.7	23.
1895.....	31	6.5	4.2	57	78.3	74.4	12	15.2	21.4
1896.....	49	7.8	5.3	37.5	74.6	12	12	17.6	21.2
1897.....	46.78	6.91	4.34	39.04	74.69	73.71	14.18	18.4	21.9
1898.....	32.23	5.36	4.99	62.32	90.25	89.78	5.45	4.38	5.23
1899.....	24.75	4.67	3.04	71.54	93.02	94.75	3.71	2.31	2.21
1900.....	33	4.12	2.57	64.8	95.04	96.48	2.2	.48	.59
1901.....	28.85	2.79	1.44	70.60	97.03	98.44	.55	.18	.12
1902.....	47	4.55	1.84	52.13	95.12	98.06	0.87	0.33	0.1
Shipping mines.....	1.2	0.21	0.24	98.2	99.68	99.72	0.6	0.11	0.04

The foregoing covers a period of ten years and indicates the advancement to the centralization of semi-monthly payments of wages.

EARNINGS OF MINERS.

The leading question in all proposed agreements between miners and operators centers on the possible or probably earnings of the miners. As a class they are strictly piece workers, and to a great extent can choose their own time. The following tables have been compiled from the returns of the operators, and show approximately the earnings of coal miners only for the years ended June 30, 1901, and June 30, 1902:

TABLE 34.—*Hand Mining, Earnings of Coal Miners, in Shipping Mines, for Year Ended June 30, 1901, by Districts.*

District.	Number of miners.	Average days worked.	Total tons mined	Average rate per ton.	Gross earnings.	Average tons per man per year.	Average earnings per man per year.	Average tons per man per day.	Average earnings per man per day.
First.....	5,485	237.5	3,285,702	\$0.7294	\$2,382,645	599	\$434.39	2.52	\$1.83

Seventh.....	2,604	179.6	2,636,772	0.4429	1,167,770	1,012.59	448.44	5.64	2.50
The State.....	24,229	209.85	20,616,155	\$0.5645	\$11,638,120	850.88	\$480.34	4.06	\$2.29

The only data that can properly be taken or used in any manner by which to compare the results in these tables are those given in the sixth biennial report (1890) of this bureau, which covers the year from April 1, 1888, to May 1, 1889. It must be understood that that investigation was made from the actual pay-rolls and all computations based on the data therein revealed at the 11 mines considered. In this report two of the mines were machine mines, and the system of paying for mining coal was what is known as the screened ton basis.

The tables here given are exclusively shipping mines, and include only mines where mining is done by hand, the total output of the mines (gross weight tons), the average days of operation of the mines, and the average agreed rate per ton for mining, known as the scale rate adopted by miners and operators.

A comparative statement is presented:

Year.	Number of men.	Average number of days.	Average tons per man per day.	Average earnings per man per day.	Average earnings per man per year.
1888-9.....	5,356	213	2.5	\$2.23	\$384.14
1901.....	25,206	203	4.04	2.30	467.11
1902.....	24,229	210	4.06	2.29	480.34

By reference to the statement for the years 1888-9 it will be found that the application of the number of days worked and the rate per day cannot be used to produce the average yearly earnings found for each man. This is accounted for from the fact that only seven of the mines had a working time for the 12 months.

The only object, therefore, for the comparison is to show the average tons per man and average earnings per day and per year, for the different years and under the different systems of mining. The basis of the calculations for the year 1888-9 being different in every respect from that of the years 1901 and 1902, no very definite deductions can be made therefrom.

Similar tables have been made for the years 1901 and 1902, showing the results for machine mines:

TABLE 36.—*Earnings of Coal Miners, in Shipping Mines, Machine Mining Exclusively, for the Year Ended June 30, 1901.*

District.	Number of miners.	Average days worked.	Total tons.	Average rate per ton.	Gross earnings.	Average tons per man per year.	Average earnings per man per year.	Average tons per man per day.	Average earnings per man per day.

The State.....	2,666	223.	3,653,871	\$0.4209	\$1,538,168	1,371	\$577.00	6.15	\$2.587

* No mining exclusively by machines.

TABLE 37.—*Machine Mining Exclusively, Earnings of Coal Miners, in Shipping Mines, for the Year Ended June 30, 1902.*

District.	Number of miners.	Average days worked.	Total tons mined.	Average rate per ton.	Gross earnings.	Average tons per man per year.	Average earnings per man per year.	Average tons per man per day.	Average earnings per man per day.
First.....	*
Second.....	*
Third.....	*
Fourth.....	*
Fifth.....	1,615	219.	2,303,949	\$0.42	\$967,659	1,427	\$599.85	6.51	\$2.74
Sixth.....	1,833	225.6	2,514,675	0.4203	1,056,873	1,372	576.58	6.08	2.56
Seventh.....	*
The State.....	3,448	223.3	4,818,624	\$0.4201	\$2,024,532	1,398	\$587.16	6.26	\$2.63

* No mining exclusively by machines.

Brought together the showing in as follows:

Year.	Number of min- ers.	Average number of days.	Average tons per man per day.	Average earn- ings per man per day.	Average earn- ings per man per year.
1901.....	2,666	223	6.15	\$2.59	\$577.00
1902.....	3,448	223	6.26	2.63	587.16

The most noticeable difference here is the increased number of miners employed in 1902 over 1901, the increase being 782 men. The days worked, tons mined and earnings of each vary but a trifle; the earnings for the year show an increase of \$10 16 to each man.

The comparison is carried further to show the relative operations of the hand and machine mines:

FOR THE YEAR 1901.

Manner of mining.	Number of min- ers.	Average number of days.	Average tons per man per day.	Average earn- ings per man per day.	Average earn- ings per man per year.
Hand	22,206	203	4.04	\$2.30	\$467.11
Machine.....	2,666	223	6.15	2.59	577.00

FOR THE YEAR 1902.

Manner of mining.	Number of min- ers.	Average number of days.	Average tons per man per day.	Average earn- ings per man per day.	Average earn- ings per man per year.
Hand	24,229	210	4.06	\$2.29	\$480.34
Machine.....	3,448	223	6.26	0.63	587.16

The totals and averages of all the preceding tables relating to the earnings of miners have been based on returns made by the operators to the State Inspectors. While many subordinate items undoubtedly exist that have not been accounted for, but which would no doubt reduce the conclusions reached, yet it may be taken as approximately correct for the different particulars set forth for the two years.

MACHINE MINING.

The mines in which machines are used exclusively and in part are set forth as follows:

TABLE 38.—*Machine Mining Mines, Men, Machines, Tons, by Districts—1902.*

DISTRICT.	MINES IN WHICH MACHINES ARE USED.

1900.....	38	3,883	272	3,765,601	29	158	1,517,993	67	430 5,583,594
1899.....	39	300	4,467,704	25	140	1,617,608	64	440 6,085,312

Regarding the mines where machines are used exclusively in undercutting the coal, it is shown that the number has increased by five over last year, being four mines in the sixth district and one in the fourth. By this increase in mines the output has increased 698,755 tons. Considering the total tons cut, the increase over last year has been 722,484 tons. This tonnage exceeds that of any former year.

The different machines used during the year are shown as follows:

TABLE 39.—*Name and Number of Mining Machines in Use, by Districts—1902.*

* Choteau.

Two new machines have been introduced into this State during the year: the Goodman and the Butler; 17 of the former and two of the latter. The changes that have taken place from year to year in the machines operated during the past four years will be noticed in the foregoing account.

The field in which mining is done by machines exclusively is shown as follows:

The noticeable feature of this table is that 157 machines cut more coal than 184 last year.

CONSUMPTION OF POWDER.

The powder consumed in reducing the coal is set forth in the following table:

TABLE 42 — *Distribution of Powder Used in all Mines, by Districts.*

DISTRICT.	POWDER USED IN BLASTING COAL.					
	Mines.	Men.	Kegs.	Tons.	Kegs per man.	Tons per keg.
First.....	47	5,251	42,419	2,472,953	8.1	58.33
Second	80	1,937	36,483	1,027,508	18.8	28.16
Third	169	3,957	102,929	2,344,834	26.0	22.78
Fourth.....	67	4,870	81,866	3,598,712	16.8	43.96
Fifth.....	71	7,492	163,962	6,199,389	21.9	37.81
Sixth.....	100	7,863	108,610	6,214,991	13.8	57.22
Seventh.....	123	5,186	100,079	3,701,136	19.4	36.70
The State.....	657	36,559	637,448	25,566,523	17.4	40.1
1901.....	585	34,570	477,612	16,283,180	13.82	34.09
1900.....	621	29,677	490,713	19,979,219	16.5	40.71
1892.....	436	13,240	201,285	7,345,157	15.2	36.4

The reading of this table reveals that for this year, in mines where this explosive is used to bring down the coal, 17.4 kegs or 435 pounds of powder is the average to each man employed and that 40.12 tons was the result of the powder derived from each keg. A further comparison points out that ten ounces of powder was exploded to reduce each ton of coal produced. The same totals for the two preceding years and for 1892 are added to the table. Reference to the kegs per man and the tons per keg for the year 1892 shows that the performance of the explosive used varies but slightly from former years.

FATAL ACCIDENTS IN MINES.

Strange as it may seem, the number of fatal accidents that have occurred during the year is the same as last year; 99 men have been killed in and about the mines. The fifth and seventh districts report the same as last year. The first district shows an increase of four and the third two; while the second district returns a decrease of two, the fourth and sixth three.

The death rate per 1,000 employed is lowest in the second district and highest in the third; while for the State it is 2.2, the same as last year.

The following gives the information for the year by districts:

TABLE 43.—*Fatal Casualties, by Districts—1902.*

DISTRICT.	Total number killed.	WHERE EMPLOYED.		NUMBER OF EMPLOYEES.		Total number of tons of coal mined	Number of employes to each death.	Rate per 1,000.	Number of tons of coal mined to each death.
		Under gr'und	Above gr'und	Under gr'und	Above gr'und				
First	15	14	*1	7,477	558	3,729,724	536	1.9	266,409
Second	7	6	†1	6,050	533	3,104,516	940	1.	517,419
Third	6	6	3,839	429	2,413,463	711	1.6	402,244
Fourth	20	15	‡5	5,042	637	3,939,864	284	3.	262,658
Fifth	17	17	6,788	776	6,213,386	445	2.5	365,493
Sixth	19	18	*1	7,090	839	6,241,847	417	2.7	328,518
Seventh	15	14	*1	5,232	715	4,378,500	397	2.9	291,900
The State	99	92	9	41,518	4,487	30,021,300	465	2.2	326,318

*Falling down shaft.

†Crushed between railroad cars.

‡Four falling down shaft, one crushed unloading boiler from railroad car.

Regarding the number of men employed and the number of tons mined to each death, the showing is better than for the last year.

Considering the fatal and non-fatal casualties for the year in connection with the consumption of powder used for mining the coal the following has been prepared:

TABLE 44.—*Fatal and Non-Fatal Accidents, Caused by Explosions, Falling Coal and Rock, and all other causes—1902.*

CAUSE.	CASUALTIES.		PERCENTAGES.		Totals.	Per- cent- ages.
	Fatal.	Non- fatal.	Fatal.	Non- fatal.		
Blast explosions.....	6	21	6.06	5.17	27	5.35
Blasts, premature.....	7	1	7.07	.25	8	1.58
Blown out shots.....		1		.25	1	.2
Flying coal.....	4	5	4.04	1.23	9	1.78
Falling coal and rock.....	55	198	55.56	48.77	253	50.1
All other causes.....	7	180	27.27	44.82	207	40.99
Total.....	99	406	100.00	100.00	505	100.00

The casualties, both fatal and non-fatal, number 505; it is revealed by the first four items shown that only 9 per cent of all the casualties are directly traceable to explosives, 50 per cent to falling coal and rock and 41 per cent to all other causes. The falling of coal and rock in our mines have been the leading cause of the accidents occurring in the mines of the State for many years; exactly how many of these are traceable to the use of powder cannot positively be ascertained.

Selecting, for some comparisons regarding the subject matter, the fifth, sixth and seventh districts, wherein the thickness of the seams of coal is the greatest and the use of powder for blasting coal exceeds that of any other part of the State, it will be found by reverting to table 42 that in the districts named 372,651 kegs or 58 per cent of the powder was consumed therein, and that 16,115,516 tons or 63 per cent of the coal reduced by this explosive was mined in the same district.

Notwithstanding this showing, attention is directed to tables 46 and 55 following; there it will be found that 55 fatal accidents and 198 non-fatal, a total of 253, are attributed to falling coal and rock.

Directing further attention to the same tables, it is disclosed that only 26 of the fatal accidents and 70 of the non-fatal, a total of 96 or 38 per cent, occurred in the districts named.

Continuing these observations as to the possible or probable connection between the use of powder and the accidents occurring in mines, reference is also directed to the same tables. It is found in table 44, that of the fatal casualties in all the districts, 17 are attributed to the use of powder; while of the non-fatal 28 are charged to the same cause, making a total of 45. Turning to tables 46 and 55 it will be seen that in the first, second, third and fourth districts, five fatal and ten non-fatal, a total of 15 or 33 per cent, came about from the use of powder; while as has been shown, in these districts only 42 per cent of the powder was used and 37 per cent of the coal was mined by this process.

Referring now to both classes of accidents, namely: those which are traceable to the use of powder and those caused by falling coal and rock, the following percentages are presented:

DISTRICT.	PERCENTAGES OF—			
	Powder used.	Coal mined.	ACCIDENTS.	
			From use of powder.	From falls.
First, Second, Third, Fourth.....	42	37	33.33	62
Fifth, Sixth, Seventh.....	58	63	66.67	38

This points out that in the field, where 58 per cent of the powder is used and 63 per cent of the coal is produced thereby, 67 per cent of the accidents is charged to the use of powder while only 38 per cent is attributed to falling coal and rock.

The theory, therefore, which has been urged by some, that accidents by falling coal and rock are largely the results of the excessive or extravagant use of powder, is not sanctioned by this showing.

The following table presents the fatal accidents for 20 years:

TABLE 45.—*Fatal Accidents for 20 Years.*

Year.	Number killed.	Total number of employes.	Total tons of coal mined.	Number of employes to each life lost.	Rate per 1,000.	Number of tons of coal produced to each life lost.
1883.....	134	23,939	12,123,456	179.6	5.6	90,474

1901.....	99	44,143	26,635,319	445.9	2.2	269,044
1902.....	99	46,005	30,021,300	464.7	2.2	303,245
Averages for 20 years	69.6	32,531	19,730,508	467.4	*2.1	253,484

* Omitting the year 1883, the rate is 2 per 1,000 employed.

There have been 1,392 deaths from accidents in and about the mines during these 20 years, or an average of 69.6 for each year. The number of employes to each death for the same period has been 467.4, or a death rate of 2 per 1,000. The latter omitting the year 1883, when 69 lost their lives by a flood at Braidwood and 10 by an explosion at Coulterville.

The following table presents the fatal accidents by causes and by districts:

TABLE 46.—*Fatal Accidents by Causes for 1902, with Totals and Averages for 13 Years.*

CAUSES.	Totals.	DISTRICTS.							Percentages.

" 1890.....	53	16	5	10	11	11
Aggregates, 13 years.....	985	185	102	99	210	208	97	84
Averages, 13 years.....	75.8	14.2	7.9	7.6	16.2	16	7.5	6.5
Percentages, 7 years, 1896-1902.....	15.36	11.02	5.18	19.87	18.36	16.19	14.02	100.00

This table also gives the total fatal accidents by districts for the past 13 years. The fourth, fifth and first districts account for decidedly the largest number during these years. Referring to the causes of these accidents, it is shown that seven deaths resulted from falling down shafts, also the remarkable showing that four of these occurred in the fourth district.

Observing the percentages for the seven years, embracing the period the seven districts have been formed, it is shown that the fourth, fifth and sixth districts are answerable for 54 per cent of the fatal accidents.

The next table presents the fatal accidents by leading causes for 15 years:

TABLE 47.—*Fatal Accidents for 15 Years, by Leading Causes.*

YEARS.	LEADING CAUSES.								Total
	Blasts and explosions.	Cages.....	Falling coal and rock.	Falling down shaft.	Fire, black and white damp.	Pit cars.	Railroad cars.	Other causes.	
1888.....	9	2	33	4	6	1	55
1889.....	3	4	26	2	5	2	42
1890.....	4	4	36	5	3	1	53
1891.....	11	4	33	1	4	2	2	3	60

1902.....	13	2	55	7	15	2	5	99
Totals	125	53	629	55	36	89	17	77	1,080
Percentage for 15 years.....	11.58	4.91	58.24	5.09	3.33	8.15	1.57	7.13	100.00

This indicates the fatal accidents by leading causes. Falling coal and rock comprise the largest number in all the years. The alarming increase in the past three years in the number of deaths caused by pit-cars, calls for some attention from those in charge. A total of 37 or 42 per cent is the record for pit-cars for the years named. Deaths from blasts and explosions are about one-fifth of those caused by falling coal and rock.

Following is a comparative table showing in parallel columns, for 20 years, the number of deaths from falls and from other causes.

TABLE 48.—*Fatal Accidents from Falls in Mines and from Other Causes, with Averages and Percentages for 20 Years.*

YEAR.	DISTRICT.														Total from falls in mines.		Total from other causes.		Total deaths.
	First.		Second		Third.		Fourth.		Fifth.		Sixth.		Sev-enth.		Total from falls in mines.	Total from other causes.			
	Falls.	Other causes.	Falls.	Other causes.	Falls.	Other causes.	Falls.	Other causes.	Falls.	Other causes.	Falls.	Other causes.	Falls.	Other causes.

1901.....	9	2	4	5	1	3	14	7	5	12	14	8	10	5	57	42	99		
1902.....	9	6	5	2	5	1	10	10	5	12	13	6	8	7	55	44	99		
Twenty years...	198	148	62	68	93	74	169	107	149	144	62	35	45	38	778	614	1,392		
Averages.....	9.9	7.4	3.1	3.4	4.6	3.7	8.5	5.4	7.5	7.2	3.1	1.8	2.3	1.9	38.9	30.7	69.6		
Percentages.....	57.2	42.8	47.7	52.3	55.7	44.3	61.2	38.8	50.9	49.2	64	36	54.2	45.8	55.9	44.1	100.00		

Directing attention to the totals in this exhibit, it will be found that 1,391 accidental deaths have occurred in our mines in the past 20 years, an average of 69.6 for each year; 778 or 60 per cent have been reported as resulting from falling coal and rock. Considering the deaths by districts for the years named, the highest percentages obtain in the fifth, second and third respectively.

To set forth this matter more fully, the following table of percentages is presented:

TABLE 49.—*Percentages of Fatal Accidents Caused by Falling Roof or Sides, for 20 Years, by Districts.*

YEAR.	DISTRICT.							THE STATE.	
	First.	Second.	Third.	Fourth.	Fifth.	Sixth.	Seventh.	Total deaths.	Per cent.
1883.....	8.9	100	82.4	62.5	40	134	30
1884.....	27.3	83.3	66.7	44.4	75	46	56.5
1885.....	60	33.3	69.2	43	39	51.3
1886.....	64.3	50	45.5	89	58.3	52	61.5
1887.....	71.4	60	60	66	71.4	41	68.3
1888.....	84.2	20	50	62.5	46.2	55	60
1889.....	57.1	33.3	50	75	72.7	42	62
1890.....	93.8	20	80	45.5	63.6	53	67.9
1891.....	66.7	50	44.4	50	55	60	55
1892.....	80	100	45.5	33.3	54.5	57	49.1
1893.....	88.2	60	66.6	60	64	69	69.6
1894.....	68.4	44.4	50	52.6	66.6	72	58.3
1895.....	50	58.3	43.75	46.67	56.3	75	50.7
1896.....	77.8	36.4	75	57.1	18.8	100	50	77	53.3
1897.....	72.7	44.4	75	100	57.9	72.7	40	69	66.7
1898.....	66.7	50	25	79	60	50	41.2	75	58.1
1899.....	85.7	33.3	50	81.8	50	63.6	61.3	84	60.7
1900.....	72.2	42.9	40	66.7	36.4	45.5	57	94	54.3
1901.....	81.8	44.4	25	66.7	29.4	63.6	66.7	99	57.6
1902.....	60	71.43	83.33	50	29.41	68.42	53.33	99	55.55
20 years.	57.23	47.7	55.69	61.23	50.85	64.00	54.22	1,392	55.89

By reference to the column for the State it will be seen that the percentages of deaths this year from falling coal and rock are slightly less than those shown for the 20 years.

The following table gives the occupation of those who lost their lives during the past year:

TABLE 50.—*Occupation and Conjugal Relation of the Killed.*

OCCUPATIONS.	DISTRICTS AND NUMBER OF FATAL CASUALTIES IN EACH.						Total number of killed.	CONJUGAL RELATIONS.				Dependents.
	First.	Second.	Third.	Fourth.	Fifth.	Sixth.	Seventh.	Married.	Single.	Widows.	Children.	
Bricklayer	1	...	1	...	1
Cagers	1	1	...	2	1	1	1	3
Drivers.....	1	1	...	2	4	1	3	12	5	7	5	4
Laborer—top.....	1	1	1	...	1	2
Loader	1	...	1	...	1
Machinist.....	1	1	1	...	1	6
Machine helper	2	...	2	1	1	1	1
Mine manager.....	1	1	2	1	1	1	6
Miners	11	5	5	16	7	13	10	67	44	23	44	126
Miners' helper.....	2	2	...	2
Operator	1	1	1	...	1	2
Pipeman	1	1	1	...	1	3
Superintendent	1	1	1	...	1	1
Trackman.....	1	1	1	...	1	1
Trapper	1	1	...	1	3	...	3
Trimmer	1	1	1	...	1	1
Totals	15	7	6	20	17	19	15	99	59	40	59	154

This discloses that 67 or 68 per cent were miners proper and also shows that proprietors themselves lose their lives, seeing that two mine managers, one operator and one superintendent were killed during the year. Fifty-nine of these men were married and leave widows with 154 dependent children; making a total of 199 left to seek support for themselves.

NON-FATAL ACCIDENTS.

The following shows the non-fatal accidents by districts:

TABLE 51.—*Non-Fatal Accidents, by Districts—1902.*

DISTRICT.	Number of men injured.	WHERE EMPLOYED.		NUMBER EMPLOYED.		Total number of employees.	Total tons of coal mined.	Number of employees to one man injured.	Rate per 1,000.	Number of tons of coal mined to one man injured.
		Under ground.	Above ground.	Under ground.	Above ground.					
First	80	78	2	7,477	558	8,035	3,729,724	100	10	46,622
Second.....	59	59	6,050	533	6,583	3,104,516	112	8.9	52,619

Sixth	79	75	4	7,090	839	7,929	6,241,847	100	10	79,011
Seventh.....	48	46	2	5,232	715	5,947	4,378,500	124	20.9	91,219
The State.....	406	391	15	41,518	4,487	46,005	30,021,300	127	8.8	73,944

* Only eight months reported.

It is here shown that a total of 406 men met with accidents, the ratio being 8.8 per 1,000 employed.

Following is the table giving the record of these accidents for 20 years:

TABLE 52.—*Non-Fatal Accidents for 20 Years.*

Year.	Number of men injured.	Total number of employes.	Total number of tons of coal mined.	Number of employes to one man injured.	Rate per 1,000.	Number of tons of coal produced to one man injured.
1883.....	231	23,939	12,123,456	104	9.6	52,482
1884.....	197	25,575	12,208,075	130	7.7	61,970
1885.....	176	25,446	11,834,459	145	6.9	67,241
1886.....	171	25,846	11,175,231	151	6.6	66,126
1887.....	180	26,804	12,423,066	149	6.7	69,017
1888.....	179	29,410	14,328,181	164	6.1	80,046
1889.....	201	30,076	14,017,298	150	6.7	69,738
1890.....	294	28,574	15,274,727	97	10.3	51,955
1891.....	367	32,951	15,660,698	90	11.1	42,672
1892.....	370	33,632	17,062,276	91	11.0	46,114
1893.....	403	35,390	19,949,564	88	11.4	49,503
1894.....	521	32,635	17,113,576	63	16.0	32,848
1895.....	605	31,962	17,735,864	53	18.9	29,315
1896.....	672	33,054	19,786,626	49	20.3	29,444
1897.....	518	33,788	20,072,753	65	15.3	38,751
1898.....	438	35,026	18,599,299	80	12.5	42,464
1899.....	597	36,991	23,434,445	62	16.1	39,254
1900.....	611	39,384	25,153,939	65	15.5	41,168
1901.....	422	44,143	26,635,319	104.6	9.56	63,117
1902.....	406	46,005	30,021,300	127	8.8	73,944
Average 20 years.	378	32,531	19,730,508	86	11.6	52,204

The number reported as injured this year is less than for any year since 1893 and the rate per 1,000 employed less than any year since 1889, while the number employed to one man injured is greater than reported for the same period.

The next table gives the record of these accidents by occupations and by districts.

TABLE 53.—*Non-Fatal Accidents by Occupation and Districts, with Totals and Percentages.*

OCCUPATION.	DISTRICTS.							Totals.	Per- cent- ages.
	First.	Second	Third.	Fourth	Fifth	Sixth.	Sev- enth.

The State...	406	229	177	573	769	339	19,984	59.9

*Time lost not reported.

The reading of this exhibit is that 339 of the injured recovered so as to go to work after losing 60 days time. Of the number, 229 were men with families and leaving 769 dependents, an average of over three persons to each.

The causes of the non-fatal accidents are set forth as follows:

TABLE 55.—*Causes of Non-Fatal Accidents, by Districts.*

CAUSE.	DISTRICTS.							The State.	Per-cent-ages.
	First.	Second	Third.	Fourth	Fifth	Sixth.	Seventh.		
Blasts.....			5		10			15	3.7
Blown out shots.....				1				1	0.24

Totals.....	80	59	12	68	60	79	43	406	100.00

In this presentation attention is directed to the column for State and percentages. Here it is shown that 198 or 49 per cent were injured by falling coal and rock and 125 or 31 per cent by pit-cars, making 80 per cent of the total attributable to these two causes out of 14 shown in the list.

This class of accidents is shown in the following table for 20 years.

TABLE 56.—*Non-Fatal Accidents from Falling Roof and Sides, and other Causes, with Percentages Caused by Falling Roof—20 Years.*

YEAR.	NON-FATAL ACCIDENTS.				YEAR.	NON-FATAL ACCIDENTS.

1892.....	370	234	136	63.25	Totals ...	7,559	4,424	3,135	58.53
1893.....	403	254	149	63.03					

This table divides the non-fatal accidents into two classes: those occurring from falling coal and rock and those from all other causes. This is the first year in the record that the number injured by falls in mines has been less than those from other causes.

In the following table is presented the record of all accidents in mines with the percentages caused by falling roof and sides:

TABLE 57.—*Total Number Killed and Injured with Percentages of All Accidents Caused by Falling Roof or Sides, for 20 Years—1883-1902.*

YEAR.	NUMBER.			PER CENT BY FALLING ROOF AND SIDES.		
	Killed.	Injured.	Total.	Killed.	Injured.	Total.
1883.....	134	231	365	30	56.28	47.7
1884.....	46	197	243	56.5	68.53	66.25
1885.....	39	176	215	51.3	67	64.18
1886.....	52	171	223	61.5	63.74	63.23
1887.....	41	180	221	68.3	68.68	68.77
1888.....	55	179	234	60	62.58	61.97
1889.....	42	201	243	61.9	64.17	63.78
1890.....	53	294	347	67.9	66.66	66.66
1891.....	60	367	427	55	61.85	60.88
1892.....	57	370	427	49.1	63.25	61.36
1893.....	69	403	472	69.6	63.03	63.98
1894.....	72	521	593	58.3	56.43	56.82
1895.....	75	605	680	50.7	55.87	55.59
1896.....	77	672	749	53.3	55.51	55.27
1897.....	69	518	587	66.7	59.85	60.65
1898.....	75	438	513	57.33	60.87	60.34
1899.....	84	597	681	60.71	56.12	56.68
1900.....	94	611	705	54.3	52.86	53.1
1901.....	99	422	523	56.43	55.21	55.45
1902.....	99	406	505	55.55	48.77	50.1
20 years.....	1,392	7,559	8,951	55.89	58.53	58.12

This closes the record on the subject of accidents. Observing the column of percentages for the total number caused by falls, it will be seen that for this year it is less than for any year since 1883, while for all the years this percentage exceeds only that of 7 years and is less than the percentage for 12 of the years.

Another table is presented showing percentages of increase and decrease of men employed, tons produced, number killed and number injured from year to year for 20 years:

TABLE 58.—*Percentages of Increase and Decrease from Year to Year of Men Employed, Tons Produced, Men Killed and Men Injured for a Series of 20 Years.*

YEAR.	MEN EMPLOYED.		TONS PRODUCED.		KILLED.		INJURED.	
	Increase	De-crease.	Increase	De-crease.	Increase	De-crease.	Increase	De-crease.
1883 to 1884.....	6.83	0.7	65.67	14.72
1885	0.5	3.06	15.22	10.66
1886	1.57	5.57	33.33	2.84
1887	3.71	11.17	21.15	5.26
1888	9.72	15.34	34.15	0.66
1889	2.26	2.17	23.64	12.29
1890	5.00	8.97	26.2	46.27
1891	15.31	2.53	13.2	24.83
1892	2.07	8.95	5.00	0.82
1893	5.23	16.92	21.05	8.92
1894	7.78	14.22	4.35	29.28
1895	2.06	3.64	4.17	16.12
1896	3.42	11.56	2.67	11.07
1897	2.22	1.45	10.4	8.04
1898	3.66	7.34	8.7	15.44
1899	5.61	26.00	12.00	36.3
1900	6.47	7.34	1.19	2.35
1901	12.1	5.88	7.4	30.9
1902	4.21	12.71	*	3.8

* Same as for year 1901.

For this year the number of men employed has increased 4.21 per cent, tons produced 12.71 per cent, while the injured has decreased 3.8 per cent.

RECAPITULATIONS.

The tables following recapitulate and condense the entire action of the coal industry for the year. The results as to each district are divided, in each table, showing distinctly the operation of the shipping and local mines with the same combined for the State.

TABLE 59.—*The State—Recapitulation by Districts—Shipping and Local Mines, Counties and Production, 1902.*

* \$2.10 per day.

† Based on 4,818,624 tons mined exclusively by machines.

The Kelleyville Coal Company's Mine No. 3, produced 404,391 tons of coal for the year ended June 30, 1902. This is the largest tonnage ever reported from one mine in the history of coal mining in Illinois.

THE DIVERNON COAL MINE.

Description of the plant and under-ground plan of the Madison Coal Co.'s mine No. 6, at Divernon, Illinois.

The Madison Coal Company is an Illinois corporation, operating coal mines at Glen Carbon, Edwardsville, Mt. Olive, Belleville and Divernon.

The Divernon Mine is located on the St. Louis branch of the Illinois Central railroad at the village of Divernon, about 16 miles south of Springfield, the capitol of the State.

The coal seam is No. 5 of the general geological section of the State, and is 335 feet below the surface, and is from 8 to 8½ feet in thickness, with a good roof overlying the coal. This shaft was continued to seam No. 1 four feet thick at a depth of 600 feet.

The plant is capable of hoisting 2,000 tons of coal per day of eight hours.

The tower is of steel, and all surface buildings are fire proof. The buildings containing the machinery are arranged in straight lines parallel to the Illinois Central Railroad tracks, the shaft tower and engine house occupying the center, and the other buildings being built right and left.

The ventilating fan is of the ordinary straight-bladed kind, is 22 feet in diameter and is driven by a 16x20 in. engine to which it is directly connected; it is in a brick building and that part directly over the fan proper is built of corrugated iron. A small belted dynamo furnished with power by this engine is designed for lighting purposes for the surface plant and shaft bottom.

A brick lined tunnel 51 feet in length connects the fan house with the air shaft. A 12-horse power general electric motor furnishes power for the forges in the shop, which is equipped with the most modern tools, among which is a Forbes pipe machine for cutting and threading pipe from one-half inch to six inches in diameter.

Two generators, each 100 K. W., are each connected direct to a high speed engine; they are arranged in line leaving room for two additional units of the same power, and each has an independent marble switchboard. These two generators furnish power for the electric mining machines, and the two electric pumps; the motors in the machine and blacksmith shops are for lighting the tower and buildings.

The room containing the hoisting engines joins the dynamo room, the whole steam plant being so arranged that the engineer can see the boilers and all machinery without leaving the hoisting engine room. The hoisting engines are of the Litchfield (Illinois) make. They are double and first mo-

UNDER GROUND PLAT-PLAN OF MADISON COAL COMPANY'S MINE NO. 6,
DIVERNON, ILLINOIS.

tion, 24x36 inches, fitted with the Beach balance valve and can be easily reversed under full head of steam. The drum is eight feet in diameter with friction brake on each end operated by the engineer's foot.

There are four boilers each 72 inches by 22 feet, three-quarter inch steel shell and 26 6-inch flues.

Two smoke stacks 120 feet high carry the smoke from these boilers.

The shaking screen is entirely of iron 47x7 feet, operated by a 16x20 inch engine.

The shaft is 17 feet 2 inches by 8 feet 7 inches, curbed with yellow pine 5x10 inches; the guides are 9x9 inches, same quality as curbing and double notched.

The escape shaft is the same size as the hoisting shaft. It is divided into an air-shaft and escape by an air-tight partition. A stairway made up of 44 eight foot flights is built in the escape shaft. Incandescent electric lamps are placed at frequent intervals, a switch board being at the top and bottom.

The mine is opened up on a combination of the three-entry and panel system; the main entries are 22 feet wide, with a parallel air course to the right and left of each from the main shaft. Pillars 36 feet thick are left between the main entries and air courses. The passageway is eight feet wide and ten feet high, connecting the main shaft with the escape shaft; the office of the mine manager is located in this passageway.

The main entries are timbered with 12x12 inch by 24 feet white oak collars; cross entries are driven double 20 feet wide. The stub entries are driven double and coal worked out on the panel system, each panel having about 12 rooms.

The ample power provided for mining, hoisting, haulage, pumping and the large mine cars with the graded tracks below will enable this mine to produce a daily output of 2,000 tons in eight hours.

OBITUARY.

Ebenezer Howells, Springfield, Ill., Secretary of the State Mining Board, and ex-Secretary of the Illinois Miners' Union, died at his home in Springfield, Dec. 27, 1902.

Mr. Howells was born in Monmouthshire, Eng., Dec. 8, 1843, of Welsh parentage, and came to this country in 1880, where he worked in the coal mines at Streator and Braceville until 1890, when he was elected Secretary-Treasurer of District No. 12 of the United Mine Workers of America. This office he continued to fill with credit and entire satisfaction until 1892, when he resigned to accept the Secretaryship of the Clear Lake Co-operative Coal Co., to which position he had been appointed. Later he sold out his stock in the concern and returned to Braceville, where he engaged in coal mining until after the inauguration of the late Governor Tanner, who appointed him Secretary of the State Mining Board. This position he held during that administration, and when Governor Yates was inaugurated he was continued in office. This position he continued to fill in a manner that was honorable to himself and a credit to both administrations until the time of his demise.

Mr. Howells in his life, public and private, had a large circle of friends, and was always impressed with a sense of the responsibilities placed upon him, and a strong desire to deserve the trust and esteem of his friends. His administration of the affairs of the office he held was characteristic of the man, impartial, honest, and upright. He felt the great responsibility the board and himself were under towards the coal industry, and sought to make it a credit to the service.

The Commissioners of Labor unite with his friends in deploring his loss and express their heartfelt sympathy to his widow and family in their great bereavement.

THE SOUTHERN ILLINOIS COAL MINING & WASHING CO., MINE
NO. 3. LOCATED AT MARION, ILLINOIS.

The hoisting of coal at this mine began in October, 1901. The mine is 120 feet to the coal, the size of this shaft is 10x20 feet. The coal runs from 9 to 10 feet in thickness, and is of a very good quality, being much freer from sulphur than the majority of coals in this field. The top works are constructed entirely of steel with concrete foundations. The engine and boiler house is built of hollow building tile with steel truss roof supporters; the smoke stack is brick, 100 feet high, 17 feet in diameter at the base and seven feet in diameter at the top. The mine is equipped with Crawford and McCrimmon first motion hoisting engines, 20x36 inches, with conical drum, steam brake and reverse; also a McEwan dynamo engine and Link-Belt dynamo, with sufficient power to run 14 electric chain breast mining machines. The steam power is furnished by four tubular boilers, of 150 H. P. each, equipped with Murphy furnaces and automatic stokers. The plant is well supplied with fire pumps and sufficient hose to reach any part of the top works in case of fire.

The washer was completed in June, 1902, and has a washing capacity of 1,500 tons; this is also equipped with an unloading device capable of unloading 100 tons per hour. The coal is screened by a J. A. Parker shaker screen. The fan is 20-foot with direct connection and has a capacity of 180,000 cubic feet of air per minute.

The mine is now hoisting 1,200 to 1,400 tons per day, and when fully opened up will have a capacity to hoist 2,500 tons in eight hours. The pit-cars hold 3½ tons, and are dumped and hoisted on automatic dump cages.

SOUTHERN ILLINOIS COAL MINING
AND WASHING CO.
MARION ILLINOIS.

NUMBER FIVE MINE OF THE SPRING VALLEY COAL COMPANY.

The Spring Valley Coal Company possesses over 50 square miles of land, situated in Bureau, Putnam and LaSalle counties, Illinois, and now operate five shafts.

The new No. 5 shaft is located northeast of Spring Valley, in Bureau county. This shaft is 420 feet to the coal seam, which is three feet six inches thick, and is No. 2 of the general geological series, and is known commercially as "Third Vein Coal."

The mining is entirely by the Scotch long-wall method, all entries and rooms being turned at an angle of 45 degrees; rooms are spaced every 60 feet on the cross entries, which are at intervals of 225 feet; the main entries are 1,200 feet apart; no coal is left in the mine as pillars except at the shafts, where a pillar of coal is left to protect the alignment of the shaft as well as the surface plant.

Overlying the coal seam is a flexible shale, which, after the coal is undercut in the fire-clay, produces sufficient pressure to mine the coal without crushing it; this roof pressure brings out the coal without the use of powder, thus producing a large percentage of lump coal. The shaft was sunk as a double compartment shaft, 12 feet wide by 16 feet long. Two pit-cars can stand end to end on each cage; these cars are pushed by two Ramsey steam pushers, or rams, 7 $\frac{1}{4}$ inches in diameter and 16 $\frac{1}{2}$ feet stroke, and are operated by one man. The cars, after leaving the cages, run by gravity on tracks on an elevated platform 51 feet long, capable of holding 14 loaded cars. The tracks and grades are all constructed so that the loaded and empty cars run automatically.

The tower and tipple is 187 feet long and 38 feet wide, composed entirely of iron and steel. The size and equipments of this mine give it a capacity of 2,000 tons a day of eight hours.

The entire surface plant is fire proof. The engine house is 44 $\frac{1}{2}$ x46 feet, built entirely of stone, and contains two first motion engines of the Corliss type, 24 inch cylinders and 42 inch stroke.

The boiler house is also of stone, 62x50 feet, and now has four tubular boilers 72 inches by 18 feet, each with 78 four-inch flues. All the boilers are connected by steel breeching to a circular brick stack 102 feet high, with a seven-foot flue.

SPRING VALLEY COAL CO., MINE NO. 5, DALZEL.

The hoisting is entirely by steel cages, running on guides, which are 60-pound Tee rails. On each side of the shaft the bottom landing is 250 feet long by 14 feet wide between masonry walls; the roof between the walls is covered by 12 inch steel I-beams, four feet space from centre to centre, arched with brick. This makes the shaft bottom landings completely fire-proof; the bottom landings as well as the shaft are all on the coal pillar as well as the surface plant. The air shaft is 8x12 feet with a stairway in one compartment.

The main entries run east and west, and north and south. The side entries branch from the main at an angle of 45 degrees; the workings are in a circle, 100,000 props 4½ feet high are used each month. The work is all hand mining, and every where in the mine the air is always good; the ventilation is much better than in the homes of many people and far better than is found in most public assembly rooms.

The miners are of many nationalities, mostly Poles, Austrians and Italians. The men in charge are for the most part Scotch, Welsh, English and Americans. The General Manager, S. M. Dalzell, is known as one of the most successful coal operators in the State, having been connected with coal mining for over 30 years; he possesses large executive ability and is thoroughly practical in every essential.

CHICAGO WILMINGTON AND VERMILION COAL COMPANY, LO-
CATED AT THAYER, ILLINOIS.

The Chicago Wilmington and Vermilion Coal Company is one of the oldest, if not the oldest, coal mining companies in Illinois. Mr. A. L. Sweet, president of this company, is a veteran in the coal business, having been connected with coal mines and mining for the past 35 years.

The operations of this company have heretofore been confined to the northern field; now it has entered the central field and opened up at Thayer, Sangamon county. The sinking of this shaft was started by breaking ground for the main shaft, June 7, 1900; the coal seam was reached at 304 feet below the surface, September 7, the same year. The coal reached is seam No. 5 of the general geological series and is 7 feet 11 inches thick.

The main shaft is 13 feet 5 inches by 19 feet 5 inches; the air shaft is 14x16 feet.

The development of this property has been quite marvelous. January 15, 1901, the production was 250 tons per day; September 15, 1,000 tons; December, 2,000 tons, and for the month of March, 1903, 43,500 tons.

This plant is first-class in every respect and among the best in the State

THE ACME COAL COMPANY MINE AND COAL WASHER, STREATOR,
ILLINOIS.

This mine was sunk in 1892 and is located on the Santa Fe and Chicago & Alton railroads. The shaft is 110 feet below the surface to the geological coal seam No. 7, which at this place is seven feet six inches thick.

The equipment of this mine is first-class for a mine of its capacity. It has double-gearred motion hoisting engines, four boilers and shaker screens so constructed as to allow coal to be loaded to wagon trade without any more labor than loading on railroad cars.

The main shaft is 6x12 feet opening and the escape shaft is 5x9 feet. The capacity of the mine is 700 tons per day of eight hours. In connection with the mine is a complete coal washing plant which has a capacity of 400 tons per day. The coal is of very good quality, especially for steam use, and finds a ready market, allowing the miners to work steady all the year.

ACME COAL COMPANY, STREATOR, ILL.

ANNUAL REPORTS

OF THE SEVERAL

STATE INSPECTORS OF COAL MINES

FIRST INSPECTION DISTRICT—1902.

NINETEENTH ANNUAL REPORT.

Counties—Grundy, Kankakee, LaSalle, Livingston, Will.

HECTOR McALLISTER, *Inspector*, Streator.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Ill.

SIR:—In compliance with section 12 of an act of the General Assembly of the State of Illinois, defining the duties of State inspectors of coal mines, and providing for the health and safety of persons employed therein, I herewith submit to you the nineteenth annual report of coal mines in the first inspection district, for the year ended June 30, 1902.

The district includes the coal-producing counties of Grundy, Kankakee, LaSalle, Livingston, and Will. The report contains tabulated statements showing the number of mines in operation, both shipping and local; the depth of coal below the surface; the thickness of the various seams, and the geological number thereof; the number of new and abandoned mines; the total number of persons employed at each mine; the number of tons of lump and other grades of coal produced; the price per ton paid for mining; the value of lump and other grades of coal per ton at the mine and the aggregate value of the total product; the number of kegs of powder consumed; the casualties in and around the mines, both fatal and non-fatal; the number of wives made widows, and children left fatherless, caused by fatal accidents, and the number of days of active operation of all mines in the district.

The following is a summary for all the counties in the district:

Total number of mines.....	77
Number of shipping mines.....	33
Number of local mines.....	44
Number of new mines.....	8
Number of abandoned mines.....	11
Number of miners.....	6,115
Number of other employés.....	1,920
Total number of employés.....	8,035
Number of fatal accidents.....	15
Number of non-fatal accidents.....	80
Number of wives made widows.....	9
Number of children left fatherless.....	30
Total tons of coal produced.....	3,729,724
Tons of lump.....	2,306,263

Tons of mine run	378,321
Tons of egg	114,879
Tons of nut	108,509
Tons of pea or screenings	786,489
Tons of slack or waste	34,658
Average value per ton of lump at the mine	\$1.35
Average value per ton of mine run at the mine	\$1.261
Average value per ton of egg at the mine	\$1.253
Average value per ton of nut at the mine	\$1.03
Average value per ton of screening at the mine	\$0.511
Average value per ton of slack at the mine	\$0.23
Aggregate value of total product	\$3,245,287
Average price paid per gross ton for hand mining	\$0.73
Average price paid per gross ton for machine mining	\$0.56
Average number of days of active operation	246.2
Number of mines operated by hand mining	75
Mines using machines	2
Number of kegs of powder used	42,519
Number of steam boilers in use at mines, horizontal	116
Tons of coal cut by machines	2,258
Number of machines in use	5
Number of tons of coal shipped	3,098,704
Tons supplied to locomotives	114,889
Tons sold to local trade	297,286
Tons consumed at the plant	218,865
Tons of coal mined to each fatal accident	266,409
Tons of coal mined to each non-fatal accident	46,622
Number of employes to each fatal accident	534
Number of employes to each non-fatal accident	100

Coal Production by Counties in the First District, with the Increase or Decrease in each for the Years Ended June 30, 1901 and 1902.

COUNTIES.	TOTAL OUTPUT OF ALL GRADES OF COAL IN TONS.		Increase.	Decrease.
	1901	1902		
Grundy	1,293,092	1,383,336	90,244
Kankakee	86,745	51,901	34,844
LaSalle	1,883,561	1,894,510	10,949
Livingston	294,824	348,291	53,467
Will	59,976	51,686	8,290
Total	3,568,198	3,729,724	154,660	43,134
Net increase	111,526

The counties of Grundy, LaSalle and Livingston show an increase of 154,660 tons, and the counties of Kankakee and Will show a decrease of 43,134 tons, leaving a net increase for the district of 111,526 tons or 3.13 per cent over the output of 1901.

New Mines—Lewis Evans and Samuel Myers have opened new mines one mile north of Kangley, LaSalle county, to supply the local trade.

Thomas Smith & Sons have sunk a shaft northwest of Streator, LaSalle county, intended to supply the local trade.

Corcoran Bros. and Mitchell Bros. have sunk new mines near Morris, Grundy county.

John O'Connor & Co. have sunk a shaft one mile north of Braidwood, Will county, to supply local trade.

Murphy, Keenan & Co., of Braidwood, Will county, have sunk a new shaft a quarter of a mile south of their old shaft. All the machinery and top works of the old shaft have been removed to the new mine and the old one abandoned.

Abandoned Mines.—The Star Coal company has abandoned its No. 1 mine at Carbon Hill, Grundy county.

The following mines have been abandoned in LaSalle county: The Wilsman Coal Co. of Wilsman; Sowerby Bros. and Bamwell Bros. of Streator. The Co-operative Coal Co. of Braidwood, Will county, has abandoned its mine. March 18, 1902, the hoisting shaft of the Diamond Coal company of Pontiac caved in and the mine has been abandoned indefinitely.

Alexander Anderson has leased the mine formerly operated by Benjamin Davis in Livingston county.

J. E. Buchanan has opened out the old mine formerly operated by J. Massy & Son, Livingston county.

Mine Fires.—March 26, 1902, a fire broke out at the Reilly Moffat & Co. mine in Braidwood, Will county, which destroyed the tower, engine house and boiler room. It is supposed that the fire originated from a hot box on the shaker screen. Owing to the bad condition of the mine it has been abandoned.

Improvements.—The LaSalle County Carbon Coal company has constructed two new overcasts at its No. 1 mine, making six separate splits in the mine, and the ventilation of the mine is greatly improved. The company has also built an incline plane, 750 feet long, to connect with the C., B. & Q. railway. The pit cars are run by an endless chain, manufactured by the Link Belt Machine company of Chicago. The cages of the escape shaft have been taken out and replaced with substantial stairways. A Victor box car loader has also been put in at this mine.

The Wilmington Star Mining company of Coal City has put in a coal washing plant of 400 tons capacity at its No. 5 mine.

Prospective Mines.—The North Wilmington Coal company of Seneca is sinking a new shaft within the city limits.

Fatal Accidents.—July 8, 1901, Mike Kmetz, miner, age 43 years, married, was instantly killed by a fall of coal at the face of his working place in No. 2 mine of the C. W. & V. Coal Co., Streator, LaSalle county. Deceased was mining on the bench when the top coal fell, knocking him off and falling on his head, with the above result. He leaves a widow and four children.

Aug. 29, 1901, Philip King, trapper, age 15 years, was seriously injured in No. 2 mine of the C. W. & V. Coal Co., Streator, LaSalle county. A driver came out of the 16th right entry with a loaded trip; there was an empty trip at the parting, waiting to go in; the driver asked the boy if all was clear for him to go in straight, and he told him to come ahead, but he had neglected to change the latches for the straight; the empty cars took to the right and caught the boy against the coal rib, injuring him so that he died at 10:40 p. m. the same day.

Sept. 26, 1901, Domonic Brido, miner, age 37, married, was instantly killed by a fall of rock at the face of his working place in No. 3 mine of the Big

Four Coal company, Coal City, Grundy county. He was working on the right hand side of his room, when a mass of rock fell on him, killing him instantly. He leaves a widow and seven children in Italy. -

Oct. 2, 1901, G. M. Julius, miner, age 37 years, married, leaves a widow, was severely injured by a fall of coal at the face of his room; he had cut through the pillar to an old room, and was mining under the top coal, which was loose on both ends, when it fell without warning, crushing him on the right hip and shoulder. He was taken to the hospital, where he died.

Oct. 22, 1901, James Nisauatto, miner, age 30 years, married, was instantly killed by a fall of rock in his roadway, about 8 feet from the face, in the Carbon Hili mine No. 3 of the Star Coal company, Grundy county. He was pulling an empty car into his place, when a rock suddenly fell on him, with the result as stated. He leaves a widow and one child.

Oct. 27, 1901, Richard Savage, machinist, age 42 years, married, was fatally injured by falling part way down the shaft of the Cardiff Coal company, Cardiff, Livingston county. Deceased and the engineer were putting on a new rope. After putting on the rope, the engineer ran the cage up and down two or three times, but did not know how far the cage was from reaching the bottom; to find out, deceased went down on the south cage; when the cage stopped, he called up to the men above to tell the engineer not to move the cage. After waiting a reasonable time, they called down to him, but received no answer. One of the men then went down the escape shaft; when he came to the bottom of the hoisting shaft he found Savage lying in the cage hole. It is supposed he got between the buntings, to see how far he was from the bottom, and fell a distance of 44 feet; he was unconscious when taken out, and remained so until he died, one hour and a half after the accident. He leaves a widow and six children.

Nov. 6, 1901, Robert Jordan, mine manager, age 44 years, married, was severely injured by a fall of rock in the Heenanville No. 1 mine of the C. W. & V. Coal Co., Streator, LaSalle county; about 5:30 a. m., when the mine examiner was examining a room in the eighth right north (there are four of those rooms), where the men were taking out the pillars; the squeeze had come on during the night; the mine examiner pulled out all the rails he possibly could without danger; he then reported the room in a dangerous condition. Jordan went to this room shortly after 7:00 a. m.; the men belonging to the room were standing on the entry. He went down one of the rooms and saw a pair of wood rails; he called for some of the men to come to help him get the rails out; he pulled one out, and was in the act of pulling out the other, when a rock suddenly fell on him, breaking his right leg. He also received internal injuries, from the effect of which he died May 31, 1902, nearly seven months after the accident occurred. Deceased leaves a widow and six children.

Nov. 19, 1901, Anton Planety, miner, age 55 years, married, was instantly killed at the face of his working place in No. 5 mine of the Wilmington Star Mining company, Coal City, Grundy county. He was taking down coal, when a rock fell on him, which caused his death. He leaves a widow and nine children.

Dec. 4, 1901, John P. Carlson, miner, age 50 years, married, was killed in the Braceville Coal company's mine, Braceville, Grundy county. He met his death at the working face by an explosion of powder. He had drilled a hole in the coal, which passed through sulphur; when he put in the cartridge it would not pass the sulphur; he put in the drill, sharp end first, to open the cartridge, but the drill struck the sulphur and ignited the powder, with the result as stated.

Dec. 10, 1901, John Dalery, miner, age 38 years, single, was severely injured by a fall of rock at the working face in the Coöperative Coal company's mine, Fairbury, Livingston county. He was loading a car, when a rock suddenly fell on him, causing his death two hours after the accident.

Jan. 9, 1902, Vincent Kuc, miner, age 36 years, single, was fatally injured by a blow on the head from a prop in the Oglesby Coal company's mine, Oglesby, LaSalle county. Deceased was standing about six feet from the face; his partner was taking down a fall of coal, which knocked out a prop, striking Kuc on the head. He was taken to the hospital in LaSalle, where he died the same day.

Feb. 12, 1902, Eldred P. Mead (colored), employed as a miner, age 28 years, married, was instantly killed at the face of his working place in No. 4 mine of the Star Coal company, Carbon Hill, Grundy county. Deceased fired a shot in the coal on the right hand side of his room. He immediately returned to observe the effect of the shot, when a rock fell on him, with the result as stated. He leaves a widow and one child.

Feb. 24, 1902, Frank Paulson, miner, age 33 years, single, was fatally injured by a fall of rock at the working face in the Standard Coal company's mine, Seneca, LaSalle county. He fired a blast in the brushing to knock it down, and commenced cutting on the right side without securing it with timber. While at work the rock fell, crushing him on the back and shoulders. He died three hours afterwards.

April 4, 1902, John Rich, driver, age 19 years, single, was killed in the Acme Coal company's mine, Streator, LaSalle county. Deceased was coming out of a room with two loaded cars, and was standing on the coupling between the cars when his head was caught between a cross bar and the coal on the car, breaking his neck.

June 30, 1902, James Knott, miner, age 22 years, single, was killed in Clark City mine of the Gardner Wilmington Coal company, Kankakee county. Deceased was struck on the head by a piece of coal flying from a blast. The mine is working the long wall system and was being opened out between the rooms. The shot blew through the coal to the next room, with the result as stated.

The tables of casualties follow, also the statistical tables by counties, giving in detail all information regarding the coal industry in this district.

Respectfully submitted,

HECTOR MCALLISTER,

State Inspector of Mines, First District, Streator.

Fatal Casualties—First District—July 1, 1902.

SECOND INSPECTION DISTRICT—1902.

NINETEENTH ANNUAL REPORT.

Counties—Bureau, Henry, Knox, Marshall, Mercer, Rock Island, Stark, Warren.

THOMAS HUDSON, *Inspector*, Galva.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Ill.

SIR:—In accordance with section 12 of an act of the General Assembly of the State of Illinois, defining and setting forth the duties of the State Inspectors of coal mines, and providing for the better preservation of the health and safety of persons employed therein, I have the honor of herewith submitting to you the nineteenth annual report of the coal mines in the second inspection district, as now defined, comprising the coal producing counties of Bureau, Henry, Knox, Marshall, Mercer, Rock Island, Stark and Warren, for the year ended June 30, 1902.

The tabular statements accompanying this report contain the number of miners and other employés engaged in the coal mining industries of the district; the number of mines of both classes, shipping and local; the depth of the various shafts; the thickness and geological number of the different seams; the amount of powder consumed; the number of accidents, both fatal and non-fatal, that have taken place during the year; and the amount of coal of all grades that has been produced, with the prices paid for mining and selling prices of the coal.

In obtaining the average number of days worked in each county, the shipping mines only have been considered in the computation. Many of the local mines are closed down from March to September each year, others again keep coal out all the year, but the sales are so limited that no coal is produced for weeks at a time. The miners employed in the local mines find other employment during the summer months; it would be misleading therefore to include the local mines in computing the average number of days.

In computing the average price paid per ton for hand mining, those mines only have been considered where the scale prices and conditions agreed upon between the operators and miners prevail. While the miners at some of the

local mines are members of the miners' union, the conditions of the agreement are not in force; especially is this true in regard to miners being paid for lump coal only and wheeling the coal from the face; therefore, those mines have not been considered in obtaining the average mining price.

The following summary is presented for the year ended June 30, 1902:

Total number of mines.....	176
Number of shipping mines.....	21
Number of mines in local trade.....	155
Number of miners.....	4,874
Number of others under ground, including boys.....	1,176
Number employed above ground.....	533
Total number of employes.....	6,583
Number of kegs of powder consumed in blasting coal.....	36,493
Tons of lump coal produced.....	2,221,767
Tons of all other grades produced.....	882,749
Total product in tons.....	3,104,516
Tons of coal shipped.....	2,631,995
Tons sold to local trade.....	308,695
Tons consumed or wasted at the mines.....	110,014
Tons supplied to locomotives at mines.....	53,812
Average value of lump coal per ton at mine.....	\$1.489
Aggregate value of the total product.....	\$3,981,838
Average number of days of active operation (shipping mines).....	237.8
Average price per gross ton for hand mining.....	\$0.72
Number of fatal accidents.....	7
Number of non-fatal accidents.....	59
Total number of accidents.....	66
Number of employes to each fatal accident.....	1,009
Number of employes to each non-fatal accident.....	112
Tons of coal produced to each fatal accident.....	517,419
Tons of coal produced to each non-fatal accident.....	52,619
Tons of coal produced to each miner employed.....	637
Tons of coal produced to each employe (all classes).....	471
Number of steam boilers in use at mines.....	148
Number of mules and horses employed at mines.....	618
Ratio of fatal accidents per 1,000 persons employed.....	1.063

Comparative table, showing the output of the different counties, with increase or decrease in each, for the years ended June 30, 1901 and 1902:

COUNTIES.	TOTAL PRODUCT OF ALL GRADES OF COAL—IN TONS.		Increase.	Decrease.
	1901.	1902.		
Bureau.....	1,549,056	1,732,813	183,757
Henry.....	83,535	113,697	30,162
Knox.....	78,362	89,208	10,846
Marshall.....	386,334	441,643	55,309
Mercer.....	563,603	602,722	39,119
Rock Island.....	63,399	84,100	20,701
Stark.....	26,524	24,799	1,725
Warren.....	19,600	15,534	4,066
Totals.....	2,770,413	3,104,516	339,894	5,791
Increase in tons.....				339,894
Decrease in tons.....				5,791
Net increase in tons.....				334,103

The counties of Bureau, Henry, Knox, Marshall, Mercer and Rock Island combined show an increase over the year 1901 of 339,894 tons. The counties of Stark and Warren together show a decrease of 5,791 tons. This leaves a net gain for the district for this year over the previous of 334,103 tons.

New Mines.—Two mines of the shipping class have gone into operation during the year. The Kewanee Coal and Mining Co. of Kewanee, Henry county, completed the construction of a branch track from the C., B. & Q. to their mine, which gives the company shipping facilities, although at present the total product of the mine is consumed in the homes and factories of Kewanee.

The Atlas Coal Co. of Galva, Henry county, sunk a shaft during the summer of 1901, and made railroad connections with the C., R. I. & P. R. R.

Mines Abandoned.—One mine only of the shipping class has been abandoned during the year. The mine operated by the Sheffield Mining Co., at Sheffield, Bureau county, went out of action in May, 1902. This mine has been classed as a shipping mine, although no coal was loaded on cars for shipment, a large percentage of the coal being disposed of in coaling engines on the C., R. I. & P. R. R. The coal in this mine is not exhausted, but the distance from the face to the tippie was too far for mule haulage; besides an endeavor to enforce the gross weight conditions may have had something to do with the closing of the mine.

Fires at Shaft Buildings.—About 10 o'clock Saturday evening, November 9, 1901, the escape shaft at mine No. 1, operated by the Spring Valley Coal Co., Spring Valley, was discovered to be on fire, and before it could be gotten under control the shaft lining, stairway and engine room on the surface were destroyed.

The burning timbers falling down the shaft set fire to the timbers around the bottom, and for a time became quite threatening. By hard work, however, the bottom of the shaft was walled off with air-tight stoppings and the top of the shaft sealed over. The fire was thus confined to the interior of the shaft and around the bottom. The escape shaft was a neutral one, neither upcast nor downcast, and did not, therefore, interfere with the ventilation of the mine.

Shafts No. 1 and No. 2 of this company are connected underground, so that No. 1 still has an escapement, although the shafts are fully one mile apart, too far apart, in fact, for the safety of those employed in the mine in case they have to use the escapement as a means of exit from the mine.

A fire broke out in the tower of the shaft operated by the C. W. & V. Coal Co. at Seatonville, Bureau county, on the night of Dec. 22, 1901, which threatened for a time to destroy the whole top works of the mine. By prompt action, however, on the part of the local fire department, with a good fire pump and plenty of hose and water, the fire was gotten under control and the tower saved. The mine was idle one day in making temporary repairs. The fire probably started from a large torch that was left burning on the tower while the top men were engaged with other work on the ground landing.

Escapement Shafts.—The following escapement shafts, with depth thereof in feet, have been sunk during the year:

Operator.	Location of Mine.	Depth in feet.
Atlas Coal Co.....	Galva.....	64
Galva Coal Co.....	Wataga.....	60
Ab. Hodgett.....	Kewanee.....	30
D. L. Edwards.....	Coal Valley.....	16
W. F. Moore.....	Victoria.....	20
A. L. King.....	do.....	25
George R. Watson.....	Wyoming.....	110
Ben Price.....	Kewanee.....	46
J. L. Jordon.....	Yates City.....	40
Willam Woodward.....	Soperville.....	22
G. W. Essex.....	*Soperville.....	85
John Willard.....	Roseville.....	30
J. G. Kidd.....	do.....	15

*Extra escapement.

Prospective Mines.—Important changes have taken place in the ownership of some of the large mines in Bureau county. About the 1st of September, 1901, S. M. Dalzell, general manager of the Spring Valley Coal company, in connection with other capitalists, purchased the mine located at Ladd, Bureau county, formerly owned and operated by the Whitebreast Fuel company.

July 1, 1902, the mine heretofore operated by the C. W. & V. Coal company at Seatonville, Bureau county, passed, by purchase, into the hands of the Spring Valley Coal company, and will in the future be operated by this company.

These changes will, in all probability, very materially increase the output of coal in Bureau county. The Spring Valley Coal company will undoubtedly enlarge the Seatonville shaft, put in heavier hoisting machinery and larger cars, and thereby increase the capacity of the mine. At Ladd, every effort will be made to obtain a larger output. At the present writing a steel tower is being erected at this mine.

Stark county, which has not been able to boast of a shipping mine, nor an output to exceed 27,000 tons per annum, for the past 20 years, may, in all probability, show quite a respectable increase in 1903.

George R. Watson of Wyoming, Stark county, has had a branch connection made with his local mine and the C., B. & Q. R. R., and will do a shipping business, although a limited one, in the future.

The Wyoming Coal Co. has sunk a shaft north of Wyoming in Stark county, and are equipping it with good machinery and appliances. A branch road

about three-fourths of a mile in length will be built to connect the mine with the C., B. & Q. R. R., and coal will probably be ready for shipment in the fall and winter of 1902.

Both of these mines are sunk to seam No. 6 with its "clay-slips," "horse-backs" and other irregularities, therefore, a large output is not expected.

A party of capitalists have sunk a shaft between Elmwood and Yates City. The shaft is located in Knox county, on a line of the C., B. & Q. R. R. The shaft is 90 feet deep, seam No. 5. Coal will be ready for shipment, in limited quantities, in October or November, 1902. All together the indications point to an increase in the production of coal in the second inspection district.

Fatal Accidents.—The following is a statement in detail of the fatal accidents that have occurred in the second inspection district during the year ended June 30, 1902:

July 3, 1901—Abraham Randall, miner, aged 59 years, married, leaves a widow in Virginia (family grown), was killed instantly by a fall of roof at the face of his working place, in the Alden Coal Co.'s mine No. 2, located at Wanlock, Mercer county. Deceased had wedged down some top coal and was in the act of throwing it back from the face when a large slab of roof, or "false roof," about 12 feet long, 5 feet wide and not more than 6 inches thick at the thickest part, suddenly fell, crushing him. His partner testified that they had sounded the roof a short time previous to the accident, and considered it safe.

September 12, 1901—Peter Bonocchi, miner, aged 33 years, married, supposed to have a widow and three children in Italy, had his back broken by a fall of roof in the Illinois Third Vein Coal Co.'s mine, located at Ladd, Bureau county. He died from the injuries received 18 days after the accident. Deceased was opening up a closed part of the working face between two rooms. The roof seemed good, and he probably thought, as anyone might from the general appearance of the place, that it was quite safe. However, while at work a piece of roof about 4 feet long, 2 feet wide and 7 to 8 inches thick suddenly fell, with the result as stated.

October 18, 1901—John Nelson, miner, aged 42 years, married, leaves a widow and six children, had his head crushed by a fall of roof in his working place, while drawing pillars, in the Coal Valley Mining Co.'s shaft No. 1, located at Cable, Mercer county, and died from the result 21 hours after the accident. Deceased and his partner were drawing the main entry pillar in the mine. They had fired a blast which had dislodged two or three props. They replaced one of the props, and were loading some loose coal before setting the others, when a piece of the roof about 4 feet long, 2½ feet wide and 5 inches thick suddenly fell, striking deceased with above result.

December 23, 1901—James Ferarro, miner, aged 51 years, single, was killed instantly by a fall of roof at the face of his working place in shaft No. 1, operated by the Spring Valley Coal Co., located at Spring Valley, Bureau county. Deceased was at work in his room when a large mass of roof, about 9 feet in length, with an average width of 4 feet and about 16 inches thick, suddenly fell, crushing him underneath.

February 7, 1902—William Golden, a retired miner, 78 years of age, married, leaves a widow (family grown), had his leg broken by a fall of coal in a drift mine operated by his son, Richard Golden, located at Kewanee, Henry county, and died, probably from the injuries sustained, March 15, 36 days after the accident. Deceased was not an employé, he had retired some time previous, but he needed a load of coal for domestic purposes, and naturally thought he could be of some assistance to his son in mining it. They mined a fall of coal to a clay slip and cut the corners; while in the act of cleaning up the clay the coal suddenly fell off at the clay slips, a part of it rolled over, striking the old man and breaking his leg. This accident in itself, would not cause death in a younger man, but old age, coupled with physical infirmities was an important factor in the actual cause of his death.

March 31, 1902—Gus Yerley, driver, aged 19 years, single, was severely crushed about the head and back by being caught between the top of a loaded pit-car and the roof of the entry, in shaft No. 3, operated by the Spring Valley Coal Co., located at Spring Valley, Bureau county, and died from the injuries 30 hours after the accident. Deceased was employed as a driver in the above mine, he was drawing a loaded car from the face of a working place, and, as is the custom, riding on the front end of the car. The entry had an average height of about 5 feet, at certain points it was a little lower than this, and at others a little higher. It seems evident, that at one of the lower places on the entry, his head or shoulders or both were caught between the top of the car and the roof. He was dragged a distance of about 12 feet to a higher part of the entry where he was released and fell in front of the car where he was found. A post-mortem examination disclosed the fact that his spine was severely crushed.

April 3, 1902, Thomas H. Haigh, car trimmer, aged 26 years, leaves a widow, was severely crushed through the abdomen by being caught between two railroad cars at the Coal Valley Mining Company's shaft No. 2, located at Sherard, Mercer county, and died from the injuries received four hours after the accident. Deceased was employed as a car trimmer at the above mine. A car was standing on the scale being loaded, an empty car was standing about two feet from the former, ready to go on the scale when the loaded one was removed. Deceased went up the track and brought a string of five or six empty cars down the gradient to be ready to put on the scale at the proper time. He stopped the string of empty cars (or thought he had) and went towards the scale. He was in the act of passing between the car on the scale and the empty car when the string of cars behind, which had not been properly secured, broke away and struck the empty car, crushing deceased between the draw-bars of the loaded car and the empty car, with the above result.

Following are the regular and usual tables of fatal and non-fatal accidents, and the schedules for each county in the second inspection district.

Respectfully submitted,

THOMAS HUDSON,

State Inspector of Mines, Second District.

Galva, Illinois.

THIRD INSPECTION DISTRICT—1902.

NINETEENTH ANNUAL REPORT.

Counties: Cass, Fulton, Hancock, McDonough, Menard, Peoria, Schuyler and Tazewell.

JAMES TAYLOR, *Inspector*, Peoria.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Illinois.

SIR:—By virtue of an act of the General Assembly, I have the honor to herewith submit the nineteenth annual report of the coal mines located in the third inspection district, including the coal producing counties of Cass, Fulton, Hancock, McDonough, Menard, Peoria, Schuyler and Tazewell.

The present report gives the number of tons of coal mined with machinery; the number and name of mining machines in use; the number of tons of coal mined by machines and by hand; the number of tons of coal blasted with powder; the number of kegs of powder consumed; the number of boys over 14 years of age, also the number of miners and other employés in the mining industry of the district; the aggregate value of the total product at the mines; the number of shipping and local mines; the thickness of the coal seams with the geological number thereof and the distance below the surface; the number of casualties, fatal and non-fatal; the number of mines, old, new and abandoned; the total tons of the different grades of coal produced, and the number of days of active operation during the year.

The total number of mines in the district is 241, 24 of which are new, 56 are shipping, while 185 are local mines. Of the 241 mines, Cass county has 2, Fulton 67, Hancock 6, McDonough 47, Menard 13, Peoria 72, Schuyler 20, and Tazewell 14.

Employes.—The total number of employés in and about the mines is 4,268, of which 3,177 are miners, 539 day men are employed underground and 429 are employed above ground, and 123 boys are employed in and about the mines.

Ventilation.—There are 130 mines ventilated with fans, 71 with furnaces and 40 by natural ventilation.

New Mines.—The Monmouth Coal Co.'s mine, Canton, Fulton county, is located on the C. B. & Q. R. R. $3\frac{1}{2}$ miles north of the city. Work of sinking the main shaft began July 17, 1901. The shaft is 8x16 feet. The No. 6 seam of coal was found 80 feet below the surface, and the No. 5 seam 150 feet below. The shaft is curbed with 3x8 inch timbers for the first 50 feet, and from there to the bottom with 2x12 inch timbers having double ends with a space of 15 inches between; this space can be used to conduct pipes into the mine, the main object being to enable the end guides to be securely bolted.

The tower or head gear of the mine is constructed of frame work; the main posts are 12x12 inches and 60 feet long, braced with timbers of the same size, securely fastened with cross rods of $1\frac{1}{4}$ inch iron, with turn buckles. The mine is equipped with self-dumping cage and weigh pan. The method used in separating the coal is the shaker screen process which makes six different grades: lump, mine run, egg, nut, pea and slack. The engine and boiler house is a frame building having a gravel roof. The size of the building is 46x50 feet with a partition between the boiler room and engine room. The steam power consists of two horizontal boilers 60-inch shell, 24 feet long, and an 80-horse power double hoisting engine, friction clutch, all built by the Ottumwa Iron Works.

The air and escapement shaft is 6x10 feet and is equipped with a 12-foot fan; it also has a stairway at an angle of 45 degrees.

The company has plotted a town site, the name of which is Brereton; and has built 25 cottages of four rooms each, with out buildings. The company is drilling an artesian well to supply the town with a water works system. This is one of the finest modern mining towns in the State.

The Whitebreast Fuel Co., Dunfermline, Fulton county, has erected a modern steel tower or head gear, equipped with dumping cages and weigh pan. This property was described in the report of my predecessor; it is the only mine having a steel tower in the district.

There is one new mine at Ipava and one at Avon, Fulton county. The following six new mines have been opened in McDonough county: at Colchester, Hall & Stevens; Hunter, Burney & Steward; Anton Lokosik and Goldsberry & Sons; at Tennessee, T. Whalin and Waddill Bros.

The Petersburg Coal Mining Co., Petersburg, Menard county, has sunk a shaft north of Petersburg but found no coal; this was abandoned and the company sunk another shaft one mile and a half south of Petersburg, at which place they found six feet of coal, with a good roof; both hoisting and escapement shafts have been completed. The air shaft is equipped with a 12-foot Brazil fan. Railroad side tracks are completed to the mine and the company is now shipping coal. Two other new mines have been opened in Menard county, one at Loyd, and one at Tice, both for local trade.

Taylor & Son, Princeville, Peoria county, have opened a new mine $2\frac{1}{2}$ miles from the town.

C. H. Ellis, Augusta, Hancock county, has opened a new mine for local trade. It is a slope to seam No. 2, and is covered with 35 feet of surface.

Velpo Roosa, of Pleasant View, and J. Hamilton, of Frederick, both of Schuyler county, have opened new mines for the local trade. The former is a gin shaft and the latter a slope. They are both working No. 5 seam.

In Peoria county there have been nine new mines opened, all for the local trade.

Fred Seffer, East Peoria, Tazewell county, is now opening a new mine south of Coal Hollow. Williams, Wantling & Co. are sinking a new shaft at Limestone, Peoria county.

A new shaft is being sunk at Middletown, Menard county.

Shafts.—Newsam Bros., Peoria, have completed a new escapement shaft at their Reed City mine, Peoria county.

Abandoned Mines.—The Whitebreast Fuel Co., St. David, Fulton county, abandoned its mine D, May 1, 1902, having worked out all the leased coal land.

The Stanton Coal Co., Isaac Stone, Wm. Hodgson, Hillery Bros., all of Colchester, McDonough county, have abandoned the mines formerly operated by them.

Dull Bros., Tennessee, McDonough county, have abandoned their mine at that place. Two mines in Menard county and one in Tazewell county have been abandoned.

Improvements.—There have been a number of extensive improvements made at the mines in this district during the year, some of them quite extensive. The following are noted:

Communication between the escapement and hoisting shaft at the Whitebreast Fuel Co.'s mine E, Dunfermline, Fulton county, is now completed. The company has erected a 14-foot steel fan, enclosing it with fire proof material.

A. C. Mack and James K. Yocum & Son, Lewistown, Fulton county, have had their escapement shafts sunk for some time, but failed to supply them with stairways until notified by the inspector. The stairways have been put in, in compliance with the law.

Newsam Bros., of Peoria, have retimbered a portion of their hoisting shaft at Farmington, Fulton county, and repaired the stairway in the escapement shaft. They have also cleaned the traveling way, all of which has very much improved this mine.

The Astoria Coal Mining Co., at Astoria, Fulton county, has retimbered its escapement shaft, and has also repaired the stairways from top to bottom.

The Applegate & Lewis Coal Co., of Cuba, Fulton county, is putting in a box-car loader.

The Maplewood Coal Co., Farmington, Fulton county, is installing an electric light plant for use at its mine, and is also enlarging the air shaft for the purpose of making a lawful escapement. The company has, at considerable expense, built one of the best and most successful shaker screens in the State, and has also erected a new tower and equipped it with self-dumping cages and weigh pan.

Cluskey & Simmons, Monica, Peoria county, have put a new stairway in their escapement shaft and repaired the air course.

Oscar Graves, Duncan, Peoria county, has put a new gin and hoisting ropes in his mine.

Howarth & Taylor, Edwards, Peoria county, have greatly improved their mine by opening communication between the drift and the new air shaft.

Walschlag Co-operative Coal Co., Peoria, Peoria county, has shot down its slope and regraded the incline from the mouth of the slope to the end of the haulage road.

The Royster & Ziegler mine, Peoria, Peoria county, has been purchased by the C. Clark Coal Co., Peoria. The mine has been very much improved by the erection of a new shaker screen, also by replacing the track scales and the rearranging of the top works. The ventilation of the mine has been much improved by the erection of a new 12-foot fan. The bottom of the shaft has been retimbered.

S. Reents & Son, Kramm, Peoria county, have replaced the furnace at their mine with an eight-foot fan, thus improving the ventilation of the mine.

The German Coal Company, Mapleton, Peoria county, has repaired and cleaned up the return air-way in its mine, thereby increasing the volume of air circulating through the mine.

Newsam Bros., Peoria, Peoria county, have very much improved their Star mine by retimbering the bottom of the shaft, cleaning out the air-course and traveling way to the escapement shaft.

The Manhattan Coal Company, East Peoria, Tazewell county, is sinking a new escapement shaft. It is now down 98 feet and will connect with the face of the workings, when completed.

The dump at Doring & Co.'s mine, East Peoria, Tazewell county, was washed away by the heavy rain of June 10, 1902. The dump has been rebuilt and the mine is again working as usual.

Gustave Giebelhausen, East Peoria, Tazewell county, put in a new dump, platforms and screens.

The Progressive Coal Company, East Peoria, Tazewell county, has replaced the old boilers at its mine with two large new ones.

A. G. Cumming, East Peoria, Tazewell county, has improved the inside workings of his mine by retimbering the bottom of the shaft, grading the roadways, retimbering the main entry and cutting off the old works with a new cross-entry.

The Ubben Coal Company, Pekin, Tazewell county, has put in a new Litchfield hoisting cage.

King & Groosweiler, Pekin, Tazewell county, have sunk their shaft 60 feet deeper to seam No. 5. They have driven the entries to a point beneath the old escapement shaft, and are now driving upward to connect with the escapement shaft.

Ed Little, Wesley City, Tazewell county, has enlarged and retimbered the traveling way to the escapement shaft of his mine and has put in new steps to the stairway in the escapement shaft, and added hand rails to the stairway.

At Grant Bros. mine, Pekin, Tazewell county, the only means heretofore of egress from this mine was by climbing the buntons in the air-shaft; this has been improved by replacing the buntons with a stairway. They have also reset their steam boilers, enclosing them with a new brick wall.

Bolander Bros., Pekin, Tazewell county, have replaced the old guides in their shaft with new ones, and covered the hoisting cage for the better protection of the men.

The Tallula Coal Company, Tallula, Menard county, has secured an increase in the quantity of air passing through its mine by changing the spiral casing around the ventilating fan.

The Wabash Coal Company, Athens, Menard county, is cleaning out the return air-way in its shaft, and expects thereby to secure a sufficient quantity of air. If this should fail the company will put in a new fan.

The Junction Co-operative Coal Company's shaft at Petersburg, Menard county, is now being operated by the Valley Coal Company. This company is retimbering the hoisting shaft, and placing a stairway in the escapement shaft.

Destruction of Mine Property by Wind and Rain Storms.—During the terrific wind and rain storm of May 2, 1902, in the vicinity of Farmington, Fulton county, huge volumes of water poured over the ground under which Newsam Bros. mine at that place is located. The water flowed down the shaft, washing away about twelve feet of the surface, carrying the cage and dirt to the bottom of the shaft, closing it in. Forty-two miners were at work in the mine at the time of the storm, but they were all able to leave the mine by way of the escapement shaft.

Another storm occurred June 10, 1902, at Norris, Fulton county, which destroyed all the top works of the Norris Coal & Mining Company's plant near that place, including the head gear, dumps and engine and boiler house. The company is now reconstructing the tower, which is a frame work, also rebuilding the engine and boiler house, erecting a shaker screen and railroad chutes. The damage to this plant is estimated to be \$8,000. The same storm destroyed the chutes and smoke stack, also twisting the head frame out of place, at the Ed Little mine at Wesley City, Tazewell county. It required ten days to make the repairs. The damage was estimated to be \$400. This storm also destroyed the dump and weigh house at James Walker's slope mine, located at Mapleton, Peoria county. At Newsam Bros. mine, Kingston, Peoria county, the same storm made a complete wreck of their mine. The tramways, dumps, engine and boiler houses and blacksmith shop were all blown away and destroyed. Ten thousand dollars was the estimated damage.

Fires—At midnight, January 14, 1902, the tower, shaker screen and buildings at the Maplewood Coal Company's mine, located at Farmington, were destroyed by fire, estimated loss \$12,000. The property was partly insured. The miners at this mine had been out on strike 27 days on account of there not being doors on all the mine cars. The miners had returned to work the day of the fire.

The engine and boiler house at P. W. Meehan's mine, located at Cuba, Fulton county, was destroyed by fire Saturday night, February 15, 1902. Estimated loss, \$1,400; fully covered by insurance. The buildings were rebuilt and the mine was again in operation within sixty days from the date of the fire.

Fire destroyed all the buildings, engine, drum, etc., of Meredith Bros. mine, located at Augusta, Hancock county, March 12, 1902. Estimated damage, \$2,000; no insurance.

Newsam Bros., Peoria, lost the engine and boiler house at their Hanna City mine, Peoria county, by fire, Sunday night, March 16, 1902. Estimated damage, \$1,600; partly covered by insurance.

Fatal Accidents.—The total number of fatal accidents in this district for the year is six, four of which occurred previous to my assuming the duties of inspector for the district, November 11, 1901.

July 2, 1901, John Kennitz, miner, age 27 years, married, was killed instantly at the Howarth & Taylor mine at Edwards, Peoria county. He was working a room in which there was a bad slip in the roof, and, according to the evidence before the coroner's jury, he had not timbered the roof sufficiently to make it secure. At about eight o'clock, apparently without warning, the rock fell. It required the combined efforts of several men some time to extricate the remains. Deceased was a German, having been born in Prussia. He leaves a widow and two children.

September 24, 1901, Ely Gaveia, miner, aged 36 years, married, was killed in the Junction Co-operative Coal Co.'s mine at Petersburg; on the morning of the above date he was at work in his room loading a car when a large piece of slate at the face of the room from between two slips, fell with the result as stated. He had been notified by the man that examined his room that morning to put up props, and it appears that he intended to do so after loading his car; the piece of slate that fell on him would weigh about 1,500 pounds. Bunt O'Laughlin, a miner, working in the next place heard the fall, and went to the room when he found him under the slate; O'Laughlin secured assistance at once and removed the slate, but found that Gaveia was dead, his neck was broken. He leaves a widow.

October 4, 1901, Lewis Potter, miner, age 48 years, married, was fatally injured by a fall of slate at the face of his room in the Standard Coal Co.'s mine, East Peoria, Tazewell county, from the effects of which he died four days afterward at the hospital in Peoria. He leaves a widow and one child.

November 1, 1901, Fritz Applehieser, miner, 70 years of age, married, was fatally injured in the Standard Coal Co.'s mine, East Peoria, Tazewell county. He was working out a shot of coal when a fall of roof caught him from the effect of which he died the following evening.

November 19, 1901, James McKinney was fatally injured at the old Crandall mine, located near Hollis, Peoria county. McKinney began taking water from this mine the day before. The day the accident occurred he was trying to run the engine (he was not an engineer); a balance weight weighing 1,400

pounds was pulled over the guides and went crashing through the roof of the engine house, crushing him to the ground; he died within an hour after the accident, leaving a widow and one child. No coal had been taken out of this mine during the past year.

December 23, 1901, Peter Ennis, miner and operator, age 35 years, married, was killed in the mine operated by himself and Mr. Schnider, near Peoria, Peoria county. He had lighted a shot in his working place; the blast not exploding as soon as he expected he went back to find out the reason; just as he got in front of the shot it exploded, killing him instantly.

February 21, 1902, John Phederspell, miner, age 27 years, single, was killed at his working place by a fall of roof in the Third Vein Coal Co.'s mine, Orchard Mines, Peoria county.

The usual tables of fatal and non-fatal accidents follow, also the county tables of the output of coal.

Respectfully submitted,

JAMES TAYLOR,

State Inspector of Mines, Third District.

FOURTH INSPECTION DISTRICT—1902.

NINETEENTH ANNUAL REPORT.

Counties—Christian, Edgar, Logan, Macon, McLean, Shelby, Vermilion,
Woodford.

THOMAS WEEKS, *Inspector*, Bloomington.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Ill.

Sir—In compliance with statutes of the State defining the duties of the State inspectors of coal mines, I have the honor to herewith submit to you the nineteenth annual report of the coal mines in the Fourth Inspection district. The tabular statements in this report show the number of mines; number of new and abandoned mines; number of shipping and local mines; the total production of all grades; the average value of the different grades at the mine and the aggregate value of the total product; the number of miners and other employes, above and below the ground; the disposition of the output; the average number of days worked; the number of tons mined by hand and the number of tons mined by machine; the price paid per ton for hand and machine mining; the number of mines using machines and the number of machines in use; the number of kegs of powder used; the number of horses and mules used above ground and below ground; the number of steam boilers in use at the mines; the number of fatal and non-fatal casualties; the number of wives made widows and the number of children left fatherless by the fatal accidents.

The following is a summary of the different items contained in the report:

Number of mines.....	84
Number of new mines.....	12
Number of abandoned mines.....	9
Number of shipping mines.....	34
Number of local mines.....	50
Tons of all grades.....	3,939,564
Tons of lump.....	1,099,715
Tons of mine run.....	2,183,252
Tons of egg.....	12,916
Tons of nut.....	128,249
Tons of pea or screenings.....	429,739
Tons of waste.....	85,993
Average value per ton of lump at the mine.....	\$1.302
Average value per ton of mine run at the mine.....	0.916
Average value per ton of egg at the mine.....	1.050

Average value per ton of nut at the mine.....	0.965
Average value per ton of pea or screening at the mine.....	0.472
Average value per ton of waste at the mine.....	0.156
Aggregate value of total product.....	\$3,786,009
Number of miners.....	3,877
Number of others underground.....	981
Number of boys underground.....	181
Number above ground.....	636
Total number of employes.....	5,679
Tons loaded on cars for shipment.....	3,233,183
Tons supplied to locomotives.....	145,842
Tons sold to local trade.....	397,277
Tons consumed and wasted at mines.....	163,562
Average number of days in operation.....	217
Tons mined by hand.....	3,774,810
Tons mined by machine.....	165,054
Price paid for hand mining per ton.....	\$0.520
Price paid for machine mining per ton.....	0.404
Number of mines using machines.....	3
Number of machines in use.....	11
Number of kegs of powder used.....	81,866
Number of steam boilers, horizontal.....	135
Number of steam boilers, upright.....	7
Number of mules under ground.....	422
Number of mules above ground.....	79
Number of horses above ground.....	19
Number of fatal casualties.....	20
Number of non-fatal casualties.....	68
Number of wives made widows.....	15
Number of children left fatherless.....	41

New mines.—In Vermilion county the Kellyville Coal Co. has sunk two new mines, one of which, No. 4, is already equipped and working; the company is now sinking the escape shaft for this mine. The other mine, No. 5, is sunk to the coal and will be equipped for work in the near future.

The Mauck Brothers have opened a new drift mine for local trade about four miles north of Danville.

The Oakwood Coal Co., of Oakwood, has opened up a new local mine at that place.

The Latham Coal Co., of Springfield, Ill., has completed the sinking of a new mine at Lincoln, Logan county. This mine is equipped in first class style with all modern improvements, and will be a large producer in the future; the company is now engaged in sinking an escapement shaft.

Z. B. Stretch has sunk a new mine at Shelbyville, Shelby county, intended for the local trade.

Abandoned mines.—The East Colfax Coal Mining company, of Colfax, McLean county, and the Minonk Coal Mining and Tile Co., of Minonk, Woodford county, have abandoned their mines during the past year. Z. B. Stretch has abandoned his old mine at Shelbyville. In Vermilion county there have been several small local mines abandoned.

Prospective mines.—The Moultrie County Coal Co., of Lovington, Moultrie county, composed of local capitalists, has commenced sinking a shaft to an eight-foot ten-inch seam, which the company expects to reach at a depth of 920 feet from the surface.

A company composed of local capitalists of Towerhill and Shelbyville have let the contract for the sinking of a shaft at Towerhill, Shelby county. The company bored to the coal, striking the Pana No. 6 seam at about the same depth.

Improvements.—The Christian County Coal Co., Taylorville, Christian county, has completed its escapement shaft. The Penwell Coal Co., of Pana, has replaced six of its old boilers with two new Springfield boilers, and has raised and repaired its screen house. The Colfax Coal Co. of Colfax, McLean county, is reopening the north side of its mine which has been closed for several years. This company recently bought out the Colfax Coal and Mining Co., and is expending considerable money in improving the property.

The Davis Coal Co. of Chenoa, McLean county, has sold its mine to a Chicago company. The new company intends to develop the property into a paying mine.

There have been other small improvements at the different mines in the district which have bettered the conditions.

Fires.—Sunday night, Dec. 16, 1901, the boiler house, engine house and hoisting drum of the East Colfax Coal Co.'s mine at Colfax was destroyed by fire, caused by the explosion of an oil lamp. The Anglo-American Coal Co. had leased and had taken possession of this mine, expecting to operate it after making the repairs made necessary by the fire. The company however failed to get the insurance money, as the old company claimed and collected it; as a consequence the mine was abandoned.

Feb. 18, 1902, the fan house at the Moweaqua Coal Mining and Manufacturing Co.'s mine was partially destroyed by fire; the damage was small and was repaired in a few days.

Fatal Accidents.—July 15, 1901, W. B. Foster, miner, age 49 years, was killed by a fall of coal at the face of his room in the Springside Coal Co.'s mine, Pana, Christian county; he had fired a rib shot which left part of the coal standing; after loading the loose coal he started to mine out the part that was left standing; when he had mined to the powder break the coal rolled over on him, killing him instantly; he leaves a widow and five children.

July 22, 1901, Arthur Langdon, miner, age 17 years, was killed by a fall of coal at the face of his room, where he worked with his father and brother, in the Taylorville Coal Co.'s mine at Taylorville, Christian county. He was undermining and while breaking down the front of the coal for the purpose of cutting deeper, a lump of coal weighing about 300 pounds fell, breaking his neck and killing him instantly.

July 23, 1901, William Engle, driver, age 24 years, was instantly killed by being crushed under a loaded pit car in the Kellyville Coal Co.'s mine No. 3, Westville, Vermilion county. He leaves a widow and one child.

Aug. 12, 1901, John Michena, miner, age 33 years, was instantly killed by a fall of rock in the Brookside Coal Co.'s No. 2 mine, Grape Creek, Vermilion county; he leaves a widow and three children.

Aug. 13, 1901, O. Stevens, driver, age 28 years, employed at the Himrod Coal Co.'s Himrod mine, Grape Creek, Vermilion county, was fatally injured by being crushed between a pit car and the coal rib. He died five days after the accident, leaving a widow.

Aug. 17, 1901, John Cairns, superintendent of the Moweaqua Coal Mining & Manufacturing Co., Moweaqua, Shelby county, was fatally injured by

being caught between the breeching of some boilers which he was preparing to unload from a railroad car. He was standing on the car between the two breechings; the car on which he was standing began to move and was not stopped owing to the failure of the brake to work properly; the breeching struck a large timber which jammed them together, catching Mr. Cairn's neck, almost severing the head from the body. He died from his injuries an hour and a half after the accident, leaving a widow and one child.

Aug. 26, 1901, Thomas Jones, miner, age 35 years, single, Joe Bria, miner, age 21 years, single, Joe Baitto, miner, age 48 years, wife and seven children in Italy, and Barni Calveth, miner, age 31 years, wife and one child, were instantly killed by falling down the shaft of the Chenoa Coal Co., Chenoa, McLean county. The morning of the accident, about seven o'clock, these men entered the cage to descend into the mine; as the cage was being lowered it caught on the stops, which prevented its descent; this caused some slack rope to go to the cage; before the engineer could reverse his engine and take up the slack the cage slipped from the stops; the weight breaking the rope, the cage and men fell to the bottom of the shaft killing the four men instantly.

Sept. 11, 1901, James W. Elkins, miner, age 39 years, single, was killed by a fall of slate in Bonnets' mine, Oakwood, Vermilion county.

October 26, 1901, Frederick Veitrich, miner, age 70 years, was killed in the Pawnee mine of the Himrod Coal Co. at Westville, Vermilion county. Just how he met his death will probably never be known; he was engaged in picking coal off the roadways and was in the mine at night by himself and was found dead in the morning. It was supposed that he fell in front of a car and that it passed over him.

Oct. 31, 1901, Arthur Swisher, miner, age 18 years, was injured by a fall of rock at the Economy Coal & Mining Co.'s mine, Danville, Vermilion county. He was engaged in taking out timbers for the purpose of widening an entry when a rock fell on him breaking his back, from the effects of which he died July 10, 1902.

Nov. 23, 1901, Michael Poviloinas, miner, age 28 years, was injured by a fall of rock in the Pawnee mine of the Himrod Coal Co., Westville, Vermilion county, from the effects of which he died four days afterwards; he leaves a widow and two children.

Dec. 20, 1901, Rhinehardt Franke, miner, age 41 years, was instantly killed by a fall of slate at the face of his room in the long-wall mine of the McLean County Coal Co., Bloomington, Ill. The deceased had started to work the day previous after being out of the mines two years or more. The room in which he began work had not been worked for several months. He was engaged taking off the loose coal from the face on the right-hand side of his place about ten feet from the road head, when a piece of slate about 2 feet wide, 12 feet long and 14 inches thick, fell on him with the result as stated; he leaves a widow and two children.

Jan. 9, 1902, George C. Hitchcock, tracklayer, age 36 years, was instantly killed by a fall of slate in the Penwell Coal Co.'s mine, Pana, Christian

county. Deceased had gone into the tenth stub, west entry, off the fifth south on the east side of the mine; his work was to lay a switch into the cross-cut between the ninth and tenth west entries; while examining the place for laying the switch, about three tons of slate fell on him with the result as stated. He leaves a widow and one child.

May 12, 1902, Thomas H. Chapman, miner, age 48 years, was fatally injured by a fall of rock in the Kellyville Coal Co.'s No. 3 mine, Westville, Vermilion county, from the effects of which he died the next day. He leaves a widow and four children.

May 27, 1902, Wesley Gillum, miner, age 28 years, was injured by a powder explosion in the Economy Coal & Mining Co.'s mine, Danville, Vermilion county. He was placing a shot and in doing so broke the cartridge; some scattering grains of powder came out of the drill hole and dropped on his lighted lamp, which was on the ground just below the mouth of the hole; the powder ignited and carried fire to powder which was near him, causing it to explode. He was badly burned about the head, face and body. He was taken to the hospital where he died June 8, 1902.

June 26, 1902, George McDowell, miner, age 57 years, was instantly killed by the premature explosion of powder at the "Blue Bird" mine, Grape Creek, Vermilion county.

June 30, 1902, J. N. Brewer, miner, age 50 years, was fatally injured by a fall of rock in his room in the Colfax Coal & Mining Co.'s mine at Colfax, McLean county. The accident occurred about 11 A. M., from the effects of which he died at 2:30 P. M. the same day. There had been a fall of rock in his room earlier that morning, and a timberman had been sent to help clean it away. There was also found a piece of loose rock; Brewer stepped over to this rock for the purpose of getting the length of a prop to put under it, while doing this the rock fell on him with the result as stated; he leaves a widow and five children.

Following the fatal and non-fatal accidents are given in tabular form, also the county tables showing in detail the output and business of all the mines in the district.

All of which is respectfully submitted,

THOMAS WEEKS,

State Inspector of Mines, Fourth District, Bloomington.

Fatal Casualties—Fourth District—July 1, 1902.

FIFTH INSPECTION DISTRICT—1902.

NINETEENTH ANNUAL REPORT.

Counties—Brown, Calhoun, Greene, Jersey, Macoupin, Montgomery, Morgan, Sangamon, Scott.

WALTON RUTLEDGE, *Inspector*, Alton.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Ill.

SIR—In compliance with the statutes of the State, defining the duties of the State inspectors of coal mines, I herewith submit the nineteenth annual report of the coal mines in the Fifth Inspection District for the year ended June 30, 1902.

A tabular statement is herewith given of the statistics of each county, showing the number of mines operated during the year, both shipping and local; the new and abandoned mines; the depth of coal below the surface, with the geological number and thickness of the various coal seams; the number of miners and other employes working in the mines and on the surface; the total tonnage of all grades of coal; the average value of coal at the mines, and the aggregate value of the total product in the district; the casualties in and around the mines, both fatal and non-fatal.

The following summary is given as a recapitulation of the principal facts found in the schedules of the various counties:

Number of mines.....	99
Number of new mines.....	20
Number of abandoned mines.....	23
Number of shipping mines.....	46
Number of local mines.....	53
Total output in tons of 2,000 pounds.....	6,213,386
Tons of lump coal.....	2,962,970
Tons of mine run coal.....	1,588,586
Tons of egg coal.....	74,215
Tons of nut coal.....	263,503
Tons of screenings (pea coal).....	1,104,719
Tons of slack or duff.....	219,393
Average value of lump coal at mine.....	\$1.27
Average value of mine run coal.....	\$0.858
Average value of egg coal.....	\$0.932
Average value of nut coal.....	\$0.768
Average value of screenings.....	\$0.418
Average value of waste coal.....	\$0.157
Aggregate value of the total product.....	\$5,175,573
Number of miners.....	5,168
Number of others under ground.....	1,359

Boys underground.....	261
Employés above ground.....	776
Total number of employés.....	7,564
Tons loaded on cars for shipment.....	5,496,832
Tons supplied to locomotives at mines.....	216,247
Tons sold to local trade.....	287,360
Tons consumed or wasted at the mines.....	212,947
Average number of days in operation.....	211.4
Tons mined by hand.....	3,910,157
Tons mined by machines.....	2,303,239
Price paid per ton for hand mining.....	\$0.495
Price paid per ton for machine mining.....	\$0.42
Number of mines using coal cutting machines.....	14
Number of machines in use.....	137
Number of kegs of powder used for blasting coal.....	163,962
Number of fatal accidents.....	17
Number of non-fatal accidents.....	60
Number of widows.....	8
Number of children made fatherless.....	24
Number of boilers in use at the mines.....	193
Number of horses and mules underground.....	628
Number of horses and mules above ground.....	111
Number of mines using compressed air machines.....	10
Number of mines using electric machines.....	4
Number of mines using tail rope haulage.....	3
Number of mines using endless rope haulage.....	2
Number of mines using electric motor haulage.....	4
Number of electric motors used in the district.....	5
Number of tons mined to each fatal accident.....	365,493
Number of tons mined to each non-fatal accident.....	103,556

Coal production by counties in the Fifth District, with increase or decrease in each, for the years ending June 30, 1901 and June 30, 1902.

COUNTIES.	TOTAL OUTPUT IN TONS.		Increase.	Decrease.
	1901.	1902.		
Brown	1,950	2,116	166
Calhoun	5,204	3,429	1,775
Greene	13,233	9,491	3,742
Jersey	2,791	3,053	262
Macoupin.....	2,115,319	2,075,253	40,066
Montgomery.....	328,251	419,810	91,559
Morgan	3,047	3,310	263
Sangamon	2,919,223	3,672,987	753,764
Scott	27,486	23,937	3,549
Totals	5,416,504	6,213,386	864,014	49,132
Total net increase.....	796,882

The district shows a net increase of 796,882 tons, which is largely due to Sangamon and Montgomery counties. Sangamon county mines show an output of 3,672,987 tons, a gain of 753,764 tons over last year; Montgomery county shows a gain of 91,559 tons over last year, while Macoupin county falls short of last year 40,066 tons.

New Mines.—The Jefferson Coal Co. has opened out a new mine near the Converse brick plant, one mile and one-half from the southeast corner of the corporate limits of Springfield. A spur is run from the B. & O. S. W. R. R. to this mine; the escapement or air shaft was sunk as soon as the main shaft was down; both shafts are now connected. A fifteen foot fan has been set up for ventilation, and the mine is now working very successfully. A number of houses are now being built near the mine for the use of the miners.

Escapement Shafts.—The Raymond Coal Co. of Raymond, Montgomery county, has finished its escapement and air shaft during the year; this mine was formerly known as the Progressive Coal Co.'s mine. The property was sold to a St. Louis firm, who changed the name to the Raymond Coal Co. The mine is being opened on the long-wall system of mining; the coal seam is three feet and three inches in thickness, of a good quality, and suitable for long-wall working.

Improvements—The Chicago Virden Coal Co., of Virden, Macoupin county, has made some important improvements at its No. 1 mine during the year; Two new boilers have been set up; each boiler is 66 inches in diameter by 20 feet long and 26 inch flues. An engine and a 112 K. W. generator and two 13 ton general electric traction motors have been installed, new tracks of 40 pound rails have been laid on the main haulage roads of the mine, a new shaker screen and weigh hopper have also been put in and the water supply has been largely increased.

The Montgomery Coal Co. of Paisley, Montgomery county, has made some very substantial improvements at its mine. A new tower, shaking screen, weigh hopper and scales have been put up.

The Greenridge Mining Company at Girard, Macoupin county, has put in a new and larger fan which has greatly increased the ventilation.

The Victor Coal Co. of Pawnee, Sangamon county, has put up a new 20 foot fan, also substantial stairways in the escapement shaft.

Fatal Accidents.—The following is a detailed statement of the fatal accidents that have taken place in the fifth district during the year ended June 30, 1902.

Aug. 26, 1901, James Ryan, mine manager, age 52 years, married, leaves a widow and four children, was killed by being caught by mine cars on the endless rope plain in the Capital Coöperative Coal Co.'s mine at Springfield, Sangamon county. He was walking on the rope plain behind a trip of cars; the couplings between the cars suddenly broke, allowing some of the cars to run back, which caught him, bruising him so that he died in a few hours.

Sept. 21, 1901, Wm. S. Owens, miner, age 52 years, married, leaves a widow and two children, was injured by a fall of slate in the Junction Mining Co.'s mine of Springfield, Sangamon county, which caused his death Oct. 21, 1901.

Oct. 18, 1901, Fred Courtney, driver, age 21 years, single, was killed by being caught between pit cars in the Girard Coal Co.'s mine, Girard, Macoupin county.

Oct. 24, 1901, John Yocco, miner, age 34 years, married, leaves a widow and two children, was killed by a premature blast in his working place in the Riverton Coal Co.'s mine No. 2, at Riverton, Sangamon county.

Nov. 13, 1901, H. J. Wenshoff, trapper, age 15 years, was killed by being crushed between mine cars in the Consolidated Coal Co.'s No. 8 mine, at Mount Olive, Macoupin county.

Dec. 5, 1901, August Hartman, miner, age 52 years, leaves a widow and four children, was killed by a premature blast in his working place in the "A" shaft of the Citizen's Coal Mining Co. of Springfield, Sangamon county.

Jan. 18, 1902, William Edwards, miner's helper, age 16 years, was killed by a fall of clod in the Montgomery Coal Co.'s mine, at Paisley, Montgomery county. The boy was working with his father at the working face at the time of the accident.

Jan. 21, 1902, Andrew Janesky, miner, age 17 years, single, was killed by a fall of rock in his working place in the Chicago Virden Coal Co.'s No. 2 mine at Auburn, Sangamon county.

Jan. 21, 1902, Edward Megaha, cager, age 34 years, married, leaves a widow and three children, was caught under the cage, both legs were broken and his body badly bruised, from which he died Feb. 3, 1902. The accident occurred in the Riverton Coal Co.'s No. 1 shaft at Riverton, Sangamon county.

Feb. 10, 1902, John Moore, driver, age 18 years, single, was killed by a fall of slate and clod in a haulage entry in the Greenridge Mining Co.'s mine at Greenridge, Macoupin county.

Feb. 20, 1902, Frank Williams, driver, age 18 years, single, was killed by falling under a trip of mine cars in the Chicago Virden Coal Co.'s No. 2 mine at Auburn, Sangamon county.

March 7, 1902, John W. Kershaw, miner, age 55 years, leaves a widow and six children, was killed by a premature blast at his working face in the Clover Leaf Coal Co.'s mine at Coffeen, Montgomery county.

March 10, 1902, Andrew Rossoc, miner, age 32 years, leaves a widow, was killed by a premature blast in his working place in the Starne Coal Mining Co.'s mine at Springfield, Sangamon county.

March 19, 1902, G. R. Hall, miner, age 24 years, single, was killed by a premature blast in his working place in the Nilwood Carbon Coal Co.'s mine at Nilwood, Macoupin county.

April 7, 1902, Edward Roding, pipeman, age 35 years, leaves a widow and three children, was killed by a fall of rock while repairing an entry. He was working with the timber gang in the Consolidated Coal Co.'s No. 7 mine at Staunton, Macoupin county.

June 21, 1902, Dominick Vortalia, miner, age 30 years, single, was killed by a premature blast in the Chicago Virden Coal Co.'s No. 2 mine at Auburn, Sangamon county.

June 28, 1902, Charles Sangrelet, driver, age 22 years, single, was killed by being crushed between a mine car and a prop in the Litchfield Mining & Power Co.'s mine at Litchfield, Montgomery county.

Following will be found the tabular schedules of the mining counties, also tables showing the number and description of each fatal and non-fatal accident for the district.

Respectfully submitted,

WALTON RUTLEDGE,

State Inspector of Mines, Fifth District, Alton.

SIXTH INSPECTION DISTRICT—1902

Counties: Bond, Clinton, Madison, Marion, St. Clair.

JOHN DUNLOP, *Inspector*, Centralia.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Illinois.

SIR:—In compliance with an act of the General Assembly of this State, defining the duties of the State Inspectors of coal mines and providing for the better preservation of the health and safety of persons employed in the mines of the State, I have the honor to herewith submit to you the seventh annual report of the Sixth Inspection District, for the year ended June 30, 1902. The coal producing counties of the district are Bond, Clinton, Madison, Marion and St. Clair. This report gives tabulated statements, by counties, of the number of mines operated, giving the names of operators and their postoffice address; the depth of coal below the surface, and its thickness; the geological number of the seams; a description of the plants of the different mines, showing their methods and systems of producing coal; the total output of all grades of coal and the disposition of the same; the average price paid per ton for mining; the value of lump and other grades of coal per ton at the mine, and the aggregate value of the output; the number of miners and other employes; the tonnage mined by hand, also by cutting machines; the number of mines using machines, and the number of machines in use; the number of kegs of powder used in blasting coal; the number of steam boilers used at the mines; the number of fatal and non-fatal accidents, and the number of widows and children dependent.

Coal production by counties, showing increase and decrease in each for the years ended June 30, 1901 and 1902.

COUNTIES	TOTAL OUTPUT OF ALL GRADES OF COAL IN TONS.		Increase.	Decrease.
	1901.	1902.		
Bond	208,668	100,740	107,928
Clinton	644,664	724,462	79,798
Madison	1,595,051	1,956,271	361,190
Marion.....	829,326	881,821	52,495
St. Clair.....	2,518,847	2,578,553	59,706
Total.....	5,796,586	6,241,847	553,189	107,928
Decrease.....	107,928
Total increase.....	445,261

Four counties, St. Clair, Madison, Marion and Clinton, show an increase of 553,189 tons, while Bond county shows a decrease of 107,928 tons, making a net increase for the district of 445,261 tons. The decrease in Bond county is due to the burning of the top works and engine room of the Sorento Prospecting and Mining Co., causing the loss of about five months work when the coal trade was at its best.

Much trouble was experienced in getting proper returns from some of the operators, as they would only give the total production. The reason assigned for not giving the different grades was owing to the inequalities in the sizes of screens at the different mines, also that particular effort had been made to get a larger per cent of lump coal, which required continual vigilance. The operators did not like that these matters should be made public, especially to be used in the annual convention with the miners, as it might be taken advantage of by the miners when drawing up a scale of prices for the ensuing year.

The following is a summary taken from the statistical tables for the fiscal year 1902:

Number of counties in which coal is produced	5
Number of mines	112
Number of new mines	8
Number of mines abandoned	2
Number of shipping mines	81
Number of local mines	31
Total tonnage	6,241,847
Tons of lump coal	3,512,853
Tons of mine run	1,231,587
Tons of other grades	1,497,402
Tons shipped	5,367,505
Tons supplied to locomotives	261,823
Tons sold to local trade	298,492
Tons consumed and wasted at the mines	314,027
Average value of lump coal per ton at the mine	\$0.9446
Aggregate value of total product	\$4,919,933
Number of miners	5,570
Number of other employes	2,359
Total number of employes	7,929
Average number of days of active operation for shipping mines	201
Number of kegs of powder used	109,610
Number of steam boilers in use at mines	253
Number of mines using machines	33
Number of machines in use	243
Total tons cut by machines	2,238,044
Total tons mined by hand	4,003,803
Fatal accidents	19
Non-fatal accidents	79
Number of wives made widows	10
Number of children made fatherless	27
Number of tons produced for each fatal accident	329,518
Number of tons produced to each non-fatal accident	79,010
Number of persons employed to each fatal accident	417
Number of persons employed to each non-fatal accident	100

In making a comparison of the work done during this year with that of the year 1901, it is found that the output has increased 445,261 tons, Madison county furnishing the greatest proportion of this increase, 361,190 tons. This is due to the increased production of the mines of Donk Bros. Coal & Coke Co. Nos. 1, 2, and 3; the Kerns & Donniwald Coal Co.'s mine at Worden, and the Lumaghi Coal Co.'s No. 2 mine; all of these mines have almost reached their full capacity. The increase in St. Clair county is small considering the number of new mines that have been put down during the last

two years. In 1901 there were ten new mines reported and three for 1902; during that time only four mines have been abandoned. A further reason for the small increase is, on account of seven mines in and around Belleville being closed down; however, with the exception of two, they have now all resumed work.

In Marion county the increase has been produced by the mines at Centralia. Although owned by two separate companies they are worked under the same management, which seems to be a decided advantage, as the work is more evenly distributed, and the rules governing the three mines are the same. The mine at Sandoval was closed down for nearly five months; no reason being found for doing so. The mine at Kinmundy has been closed down all summer, and up to the present time work has not been resumed.

It will be noticed from the summary that the number of fatal accidents, per 1,000 persons employed, is less than last year. The number of persons killed in 1901 was 3.2 per 1,000, while this year the number is 2.4 per 1,000, which, in my opinion, ought to be still further reduced if proper precaution be taken.

The number of mines using machines has increased from 30 to 33; the increase in the number of machines is 25. This would indicate an increase in machine mined coal; however, the coal cut by machines has decreased from last year by 165,070 tons.

Improvements.—The Sorento Prospecting & Mining Co., Sorento, Bond county, owing to the top works and engine room having been destroyed by fire, has rebuilt its works, making a great improvement over the old works; the company has also put in self-dumping cages, so that coal can be dumped on either side of the shaft; a new railroad track has been built on the south side of the mine, connecting with the track of the C. B. & Q. railroad. These improvements put this mine among the best equipped in the district; the connection with the Burlington system also makes it one of the best located mines, as it furnishes a new and better market for the shipping of coal.

The Lenz Coal & Mining Co., Belleville, St. Clair county, has rebuilt the tipple and engine room at its mine. The engine room is now located on the west end of the shaft to make room for a new tipple, so that coal can be loaded on the cars of the East St. Louis & Belleville Electric Railway. This road has been hauling coal for over a year, and it runs parallel with the Southern Railway to East St. Louis.

The O'Fallon Coal & Mining Co., Belleville, St. Clair county, has taken down the old tipple which was in a dilapidated condition, and built a new one, making it more convenient to handle a larger output. The company has also put in the Kanty dumping cages, and is building the foundation for a new boiler and air compressor, with the intention of putting in mining machines.

The Centralia Manufacturing & Mining Co., Centralia, Marion county, has put in a third rail motor at its No. 4 mine. Considering the conditions of this mine, in which the grade runs as high as 10 per cent, the motor is giving good satisfaction. The company contemplates putting in a 20-foot fan.

The Consolidated Coal Co. has built a new tippie at its Richland mine, Belleville, St. Clair county.

New Mines.—In St. Clair county three new shafts are being sunk, one of them by the Beatty Brothers of Mascoutah, the location being near Rentchler. Joseph Guest and others are at work on a new mine, located near the power house of the East St. Louis & Belleville Electric Railway, between Belleville and East St. Louis. The other is located near the Start Brewery at Belleville, and is being sunk by a party of miners, and is intended for local trade. The other two will be shipping mines.

The Superior Coal & Mining Co. has sunk a new shaft; it is 7 by 14 feet and 160 feet to the coal. The thickness of the coal is six and a half feet. The company was about ready to hoist coal the 1st of July; the mine is equipped with a pair of engines, 11 by 16 inches, having a winding drum five feet in diameter, geared one in six; also an air compressor of the Norwalk type, having a capacity to supply 12 mining machines. Part of the machines are on the ground, ready to be put in; they were made by Herzler & Henninger of Belleville. The mine is located on the East St. Louis & Belleville Electric Railway, three miles west of Belleville.

In Madison county five new shafts have been put down to supply the local trade. Three of them are located near North Alton and two at Bethalto.

The Clover Coal Co. has reopened a shaft that was sunk 11 years ago; very little coal had been taken out, as the company that sunk the shaft had not sufficient capital to operate it. The mine was abandoned and allowed to fill with water. The parties forming the new company are residents of St. Louis and have organized with a capital stock of \$100,000. The water has been taken out of the mine; the company has built a new tippie, put in new engines and boilers, and is almost ready to commence hoisting coal. The shaft is located at New Douglas, Madison county, on the Toledo, St. Louis & Western Railway; its depth is 437 feet, and the thickness of the coal is nearly six feet.

Mine Fires.—The following named companies have had fires at their mines: The Donk Bros. Coal & Coke Co. had a fire at their No. 1 mine, destroying the tippie and washery; the loss is estimated at over \$60,000. The company rebuilt the tippie and resumed work in a very short time, and is now rebuilding the washery.

The tippie of the Madison Coal Co.'s No. 2 mine, Glen Carbon, Madison county, was destroyed by fire but was immediately rebuilt, and the mine was at work in less than 30 days.

The Sorento Prospecting & Mining Co., Sorento, Bond county, had a fire at its mine, which destroyed the tippie and hoisting engines.

Charles Hortman of Belleville had a fire at his mine, which burned down the tippie and engine room, destroying the engine and boiler.

Fatal Accidents.—July 3, 1901, James Domiski, miner, age 52 years, married, employed in the White Oak mine of the Consolidated Coal Co., Marissa, St. Clair county, was killed by a fall of soapstone. He leaves a widow and seven children in Russia.

July 17, 1901, Charles Staehle, miner, aged 22 years, single, employed in Conrad Reinecke's No. 2 mine, Belleville, St. Clair county, was fatally injured by a fall of slate. He died while being taken to his home.

Sept. 12, 1901, Andrew Donatti, miner, aged 35 years, married, employed in the Heinz Bluff mine of the Consolidated Coal Co., Marissa, St. Clair county, was killed by a fall of clod and slate. He leaves a widow and five children.

Sept. 16, 1901, John Wooters, miner, age 29 years, married, employed at the Darrow mine of the O'Fallon Coal & Mining Co., O'Fallon, St. Clair county, was fatally injured by the explosion of a keg of powder, caused by making a hole in the top of the keg with a pick. He leaves a widow.

Oct. 24, 1901, George Mars, loader, aged 17 years, single, employed at the Staunton No. 1 mine of the Staunton Coal Co., Staunton, Macoupin county, was instantly killed by a fall of rock at the face of his room. He was the only support of his widowed mother.

Oct. 31, 1901, Jerry Stahl, miner, aged 23 years, married, employed at the Royal mine of the Beck-Walker Coal Co., near Belleville, was instantly killed by a fall of top coal. He was undermining when it gave way without warning. He leaves a widow.

Nov. 21, 1901, David Parker, miner, aged 33 years, married, employed at Donk Bros. No. 1 mine, Collinsville, Madison county, was killed by a fall of slate. He leaves a widow and two children.

Nov. 22, 1901, Fred Ernest, miner, aged 50 years, married, employed at the Lumaghi Coal Co.'s No. 1 mine, Collinsville, Madison county, was killed by the premature discharge of a shot at the working face. He leaves a widow and four children.

Nov. 25, 1901, Charles Stolze, miner, aged 38 years, single, employed at the Heinz Bluff mine of the Consolidated Coal Co., Collinsville, Madison county, was killed by a fall of slate.

Dec. 11, 1901, John Reifer, cager, aged 30 years, single, employed at the Donk Bros. Coal Co.'s mine No. 2, Maryville, Madison county, was killed instantly while cleaning the cage; the engineer moved the cage upward, Reifer tried to get off but was caught between the cage and the side of the shaft.

Jan. 13, 1902, Henry Woodward, single, machine helper, age 19 years, single, employed at the Avery mine of the Walnut Hill Coal Co., Birkner, St. Clair county, was fatally injured by a fall of coal. He died two days after the accident.

Feb. 1, 1902, Joseph Marches, miner, aged 24 years, single, employed at Mine No. 1 of the Staunton Coal Co., Staunton, Macoupin county, was seriously injured by a fall of clod from which he died a short time after. He was the support of his mother and a sister.

Feb. 5, 1902, John Koch, laborer, aged 20 years, single, employed as a helper to the bricklayer, was putting up brick stoppings in the Breese mine of the Consolidated Coal Co., Breese, Clinton county. In coming out of the mine he was hoisted to the ground landing, when two men that were

on the cage with him got off; one of the men in getting off of the cage fell, making a noise; the engineer then began to hoist to the top landing; Hoch, when in the act of stepping off the cage while in motion, lost his balance and fell down the shaft, a depth of 400 feet, causing his death.

Feb. 27, 1902, Louis Kirgen, miner, aged 42 years, married, employed at the mine of the Odin Coal Co., Odin, Marion county, was killed by a fall of slate at the working face of his room. He leaves a widow and one child.

March 5, 1902, Samuel Mathews, miner, age 31 years, married, employed at the Royal mine of the Beck-Walker Coal Co., near Belleville, was instantly killed by a fall of slate. He leaves a widow and three children.

April 21, 1902, Robert Brown, driver, age 24 years, married, employed at the Richland mine of the Consolidated Coal Co., Belleville, St. Clair county, was seriously injured by a collision of loaded cars. In coming out to the bottom with a loaded trip he collided with a loaded car that had been detached from a trip of another driver ahead of him. He died May 2, 1902, and leaves a widow.

April 25, 1902, John McKernan, miner, aged 51 years, married, employed at the Walnut Valley mine of the Hippard Coal Co., Belleville, St. Clair county, was seriously burned by the explosion of a keg of powder, from which he died May 21, 1902. He leaves a widow and nine children.

May 7, 1902, Lutie Weathers, machine helper, aged 22 years, single, employed at the Lumaghi Coal Co.'s mine No. 2, Collinsville, Madison county, was killed by a fall of coal.

May 31, 1902, Harry Weber, miner, aged 52 years, single, employed at the No. 1 mine of Donk Bros. Coal and Coke Co., Collinsville, was killed by a fall of clod, at the face of his working place. He was found under the clod 24 hours after it fell. There was then no system at this mine of keeping check of men going to and from work, and having no relatives at the works accounts for the length of time before he was missed.

In addition to these accidents two men were killed at the Donk Bros. Coal Co.'s mine, Collinsville, Madison county, but were not in the employ of the company.

James Carson, aged about 46 years, was found Feb. 19, 1902, at the bottom of shaft No. 2 at Maryville.

Charles Mulbering, age unknown, fell from the stable loft at Mine No. 1, June 28, 1902, breaking his neck.

Respectfully submitted,

JOHN DUNLOP,

State Mine Inspector, Sixth District, Centralia.

Fatal Casualties—Sixth District, July 1, 1902.

SEVENTH INSPECTION DISTRICT -1902.

SEVENTH ANNUAL REPORT.

Counties: Gallatin, Hamilton, Jackson, Jefferson, Johnson, Perry, Randolph, Saline, Wabash, Washington, Williamson.

EVAN D. JOHN, *Inspector*, Carbondale.

HON. DAVID ROSS, *Secretary*,

State Bureau of Labor Statistics, Springfield, Illinois.

SIR:—In compliance with section 12 of the general mining law of the State of Illinois, I have the honor to submit herewith the seventh annual report of coal mines in the seventh inspection district, for the year ended June 30, 1902. This district comprises the coal producing counties of Gallatin, Hamilton, Jackson, Jefferson, Johnson, Perry, Randolph, Saline, Wabash, Washington, and Williamson.

The report presents tabulated statements showing the number of mines in operation in each county, both shipping and local, during the year; the number of new and abandoned mines; the total number of persons employed at each mine; the total tons produced and the production of the different grades, consisting of lump, mine run, egg, nut, pea or screenings and the slack or waste coal at the mines; the average value of all grades, and the average value of the total product; the fatal and non-fatal casualties in and around the mines; the number of widows, and the number of children left fatherless, the men who lost their lives; the average number of days worked; the quantity of powder used; the number of machines used, and the total tons of coal produced by machines.

The following summary is taken from the statistical tables for the year:

Number of counties producing coal.....	11
Total number of mines.....	127
Number of shipping mines.....	58
Number of local mines.....	69
Number of mines abandoned during the year.....	16
Number of new mines opened during the year.....	13
Number of mines using machines.....	10
Number of machines in use.....	65
Tons of coal cut by machines.....	1,064,456
Total tonnage.....	4,378,500
Tons of lump coal.....	1,484,779
Tons of mine run coal.....	977,841
Tons of egg coal.....	410,579
Tons of nut coal.....	508,537
Tons of pea or screenings.....	868,601
Tons of slack or waste coal.....	128,163
Aggregate value of total product.....	\$3,628,417
Average value of lump coal per ton at mines.....	\$1,038
Average value of mine run coal per ton at mines.....	\$0,859
Average value of egg coal per ton at mines.....	\$0,94
Average value of nut coal per ton at mines.....	\$0,705
Average value of screenings per ton at mines.....	\$0,556
Average value of slack or waste coal per ton at mines.....	\$0,155
Number of miners.....	4,084
Number of other employes under ground.....	1,012
Number of boys employed under ground.....	136
Number of employes above ground.....	715
Total number of employes.....	5,947
Average number of days of operation for shipping mines.....	177.7
Number of kegs of powder used in blasting coal.....	83,002
Number of fatal accidents.....	15
Number of non-fatal accidents.....	48
Number of widows.....	8
Number of children left fatherless.....	22
Number of tons of coal produced for each fatal accident.....	291,900
Number of tons of coal produced for each non-fatal accident.....	91,219
Number of persons employed to each fatal accident.....	349
Number of persons employed to each non-fatal accident.....	124

Fatal Accidents. July 13, 1901, Robert Johnson, miner, age 36 years, married, was killed instantly by a fall of slate at the face of his working room in the Western Anthracite Coal & Coke Co.'s mine, located at Sparta, Randolph county. Deceased was working off some coal which had been shattered by the blast which had been fired the previous night. This coal was the only support the slate had and when worked out the slate fell with the result as stated.

August 20, 1901, Arthur Snodgrass, driver, age 28 years, married, leaves a widow and two children, was killed instantly by a fall of rock in the first south entry of the White Walnut Coal Co.'s mine, located at Pinckneyville, Perry county. Deceased was hauling a loaded pit car from the entry when a piece of rock weighing about 150 pounds fell killing him.

November 4, 1901, John Burlison, miner, single, age 35 years, and Thomas Crandall, miner, married, age 50 years, leaving a widow and five children, were both instantly killed by a fall of roof in their working place in the Tamaroa Colliery Co.'s mine, Tamaroa, Perry county. Burlison and Crandall were working together taking off the skip of coal along an entry that had fallen in and had been abandoned. They had worked off a strip 9 feet wide by 30 feet long, and had set timber along the edge of the old entry; while at work loading a pit car the rock above them gave away. They had evidently made an attempt to get out, as both were caught about 12 feet from the car. It required several hours to get their dead bodies from under the fall.

Dec. 18, 1901, Ed Jarrett, top laborer, age 44 years, married, leaves a widow and four children, was instantly killed by falling down the shaft of the Willis Coal and Mining Co., Willisville, Perry county. Deceased was caging at the top of the shaft; the gate being off, he mistook the south cage-way for the north and pushed the car into the shaft, falling to the bottom with it, a distance of 115 feet.

Jan. 14, 1902, William Butcher, driver, age 27 years, married, was killed by being caught between a loaded pit-car and the side of the entry in the mine of the Chicago and Carterville Coal Co., at Herrin, Williamson county. Deceased was hauling a loaded pit-car through a cross cut from the second west entry to the first west entry on the north side. In attempting to get on the front end of the car he slipped and was caught between the car and the side of the entry. He died a few minutes after the accident. He leaves a widow and one child.

Jan. 29, 1902, C. B. Carney, miner, age 52 years, married, leaves a widow and seven children, was instantly killed by being struck on the head and body with coal flying from a blast, in the Carterville Coal Co.'s mine in Williamson county. Deceased had prepared a blast, and when firing time came in the evening he went to light his shot; the instant he put his lamp to the squib the shot exploded. Whether this was due to a defective squib or that the deceased pushed his lamp under the powder part of the squib is not known.

Jan. 29, 1902, Abraham Buckles, miner, age 41 years, single, was severely injured by being struck on the head with loose coal flying from a blast in the St. Louis & Big Muddy Coal Co.'s mine, Dewmain, Williamson county. Deceased had gone into his room to light a shot, and in making his retreat was struck by flying coal. It is not known whether he was struck by coal from his own blast or from the adjoining room as it was found upon examination that a blast in the adjoining room had blown through the pillar at the time of the accident. Deceased died from his injuries five hours later.

Jan. 22, 1902, George Pickering, miner, age 15 years, was severely crushed about the head and body by a fall of slate at the face of his working room in the Davenport Coal Co.'s mine, Ledford, Saline county. The deceased was working with his father; both were loading a pit-car when the slate fell, crushing the boy's head so severely that he died 15 hours after the accident. The father escaped uninjured.

Feb. 15, 1902, Albert Cochran, age 15 years, employed as a trapper by the Willis Coal & Mining Co., was crushed between loaded cars near the bottom of the shaft. The boy's duty was to attend to the north door which was a short distance from the bottom. As soon as the driver would go inside the boy would come to the bottom to couple and uncouple the cars, which was no part of his work; he had been told by the mine manager and driver to stay at the door and attend to it. The day of the accident the deceased left his door and came to the bottom and attempted to couple the incoming cars to the standing cars; while in this act his head was caught and crushed, which caused his death.

Feb. 24, 1902, Aleck Calcatarra, miner, age 41 years, married, leaves a widow and three children, was severely injured about the body by a fall of slate in the Big Muddy Coal & Iron Co.'s shaft No. 7, Herrin, Williamson county. Deceased was cautioned by the mine examiner to be careful of some loose slate at the face of his working place; in reply he said that he could take care of himself. He was mining off some coal that had been loosened by a blast the previous day, when the slate fell which caused his death five hours later.

March 25, 1902, Fred Divers, miner, aged 48 years, single, was killed by a fall of top coal at the face of his working place, in the fourth north entry of the St. Louis & Big Muddy Coal Co.'s mine, Dewmain, Williamson county. Deceased was working in room 25 when the top coal and slate fell. The accident was due to carelessness in not properly timbering the working place.

May 7, 1902, Robert Oliver, driver, age 20, single, was severely injured by a collision of a pit car and mule in the Chicago & Carterville Coal Co.'s shaft, located at Herrin, Williamson county. He died two hours after the accident.

May 15, 1902, Sam Simpson, miner, age 42, married, leaves a widow and two children, was instantly killed by a fall of slate in the mine of the Davenport Coal Co., at Ledford, Saline county. Deceased had fired a blast which had knocked all the timbers out of place at the face of his room; instead of waiting until the smoke had cleared away, he returned to fire a second blast; when within a few feet of the face, a piece of slate 6 feet wide and 10 feet long and 8 inches thick fell with the result as stated.

June 26, 1902, Charles Wheel, miner, age 54 years, was instantly killed by flying coal in the Carterville Coal Co.'s mine, Carterville, Williamson county. Deceased had prepared a blast in his room, which was about 40 feet in from the entry; when firing time came he went into the room and lit the squib; in some manner, it is presumed, he became bewildered, and instead of coming out into the entry he went down the face of the room. When the shot exploded he was struck by the flying coal. The deceased had a family living somewhere in the west.

The tables of the fatal and non-fatal accidents follow, also the county tables of the district.

Respectfully submitted,

EVAN D. JOHN,

State Mine Inspector, Seventh District.

CARBONDALE, ILLINOIS.

APPENDIX

REGISTER OF CERTIFICATED—
MINE MANAGERS.
HOISTING ENGINEERS.
MINE EXAMINERS.

AGREEMENT AS TO MINING PRICES AND CONDITIONS
IN ILLINOIS.

REPORTS OF FREE EMPLOYMENT OFFICES.

MINE MANAGERS HOLDING CERTIFICATES OF COMPETENCY.

NOTE—This list includes all the mine managers to whom certificates have been issued prior to January 1, 1902.

The names which are printed in *italic* are those who hold both certificates of service and subsequent certificates of competency acquired through examination.

The names which are followed by the abbreviation "ex." are those who have exchanged certificates of service for those of competency without examination, under the provisions of the amendment of 1895.

The postoffice addresses here given and in all the lists following are those recorded at the time the certificates were issued, and in many cases are not the present addresses of the certificate holders.

MINE EXAMINERS HOLDING CERTIFICATES OF COMPETENCY.

NOTE—The revised mining law of 1899 changed the title or name "Fire Boss" to that of "Mine Examiner," and provided that those holding certificates as Fire Boss could exchange the same for that of Mine Examiner.

The names followed by the abbreviation "ex." have made such exchange.

AGREEMENT

BETWEEN THE

Illinois Coal Operators' Association and the United Mine Workers of Illinois

For the Scale Year Beginning April 1, 1903.

WHEREAS, A contract between the operators of the competitive coal fields of Pennsylvania, Ohio, Indiana and Illinois, and the United Mine Workers of America has been entered into at the city of Indianapolis, Indiana, Feb. 7, 1903, fixing a scale of mining prices, day wages and conditions, for certain base points therein set forth, to continue in force and effect for one year.

WHEREAS, This contract fixes the pick-mining price of bituminous mine run coal at Danville, at 55 cents per ton of 2,000 pounds; therefore, be it

Resolved. That the prices for pick-mine coal throughout the State for one year, beginning April 1, 1903, shall be as follows:

FIRST DISTRICT.

Streator, Cardiff, Clarke City and associated mines, including Toluca thick vein 64c
(Note: The matter of the clay parting at Streator to be referred to sub-district convention for adjustment.)

Third vein and associated mines, including third vein at Streator, including 24 inches of brushing..... 82c

Wilmington and associated mines, including Cardiff long wall and Bloomington thin vein, including brushing 87c

Bloomington thick vein..... 77c

Pontiac, including 24 inches of brushing..... 64c

Pontiac top vein..... 64c

Marseilles and Seneca (referred to a joint committee of two miners and two operators for investigation and adjustment of the mining prices and conditions, and their agreement shall become a part of this contract. Said committee to make its investigation and report prior to April 1, 1903.)

Morris long wall, Wilmington conditions..... \$1 06

Morris room and pillar..... 1 21

Clarke City lower seam, brushing in coal.....

SECOND DISTRICT.

Danville, Westville, Grape Creek and associated mines in Vermillion county 55c

THIRD DISTRICT.

Springfield and associated mines..... 55.7c

Lincoln and Nantic..... 52c

Colfax..... 59c

FOURTH DISTRICT.

Mines on C. & A. south of Springfield to and including Carlinville; including Taylorville, Pana, Litchfield, Hillsboro, Witt (Paisley), Divernon and Pawnee..... 55c

Assumption long wall, under present regulations 71½c

Moweaqua room and pillar..... 59c

Mount Pulaski room and pillar (referred for local settlement).....

Decatur, present conditions..... 70c

FIFTH DISTRICT.

Glen Carbon, Belleville and associated mines, to and including Pinckneyville, Willisville and Nashville..... 55c

Coal five feet and under..... 60c

SIXTH DISTRICT.

DuQuoin, Odin, Sandoval, Centralia and associated mines..... 51c

Salem and Kinmundy..... 56c

SEVENTH DISTRICT.

Mount Vernon..... 56c

Jackson county..... 51c

(All coal five feet and under 5 cents extra per ton; this not to apply to lower bench, nor rolls or horsebacks.)

Lower bench, Jackson county for shipping mines, miners to carry 14 inches brushing	64c
Saline county.....	51c
Williamson county.....	48c

EIGHTH DISTRICT.

Fulton and Peoria counties, thin or lower vein (third vein conditions)...	82c
Fulton and Peoria counties, No. 5 vein.	62c
Astoria, No. 5 vein (Fulton and Peoria counties conditions).....	62c
Fulton and Peoria counties, No. 6 vein (with Kewanee and Etherley conditions, under cutting and weighing the coal; and if they cannot obtain members of the U. M. W. of A. to mine the coal under these terms and conditions it shall be the privilege of the operators to call for a meeting of the joint executive boards of the miners and operators, and said joint executive boards shall fix a rate for shooting coal in that seam).....	71c
Gilchrist, Wanlock, Cable, Sherrard and Silvis mines, 66 cents per ton, with last year's conditions. In case of deficient work, where miner and mine manager cannot agree as to compensation, the mine committee shall be called in, and, if they cannot agree, the dispute shall be carried up under the 13th clause of the present scale.	
Kewanee, Etherley and Wyoming.....	71c
Pottstown, No. 1 seam, scale to be the same as Gilchrist and Wanlock, except in the brushing of the top; that shall be settled by the Sub-District.	
Colchester (referred for local settlement).	

NINTH DISTRICT.

Mount Olive, Staunton, Gillespie, Clyde, Sorento and Coffeen, and mines on the Vandalla line as far east as including Smithboro, and on the B. & O. S.-W. as far east as Breese	55c
Coal five feet and under.....	60c

First. The Indianapolis Convention having adopted a mining and underground day labor scale, in effect April 1, 1913, no changes or conditions shall be imposed in the Illinois scale for the coming year that increase the cost of production of coal in any district in the State, except as may be provided.

Second. No scale of wages shall be made by the United Mine Workers for mine manager, mine manager's assistant, top foreman, company weighman, boss, drivers, night boss, head machinist, head boiler-maker, head carpenter, night watchman, hoisting engineers. It being understood that "assistant" shall apply to such as are authorized to act in that capacity only. The authority to hire and discharge shall be vested in the mine manager, top foreman and boss driver. It is further understood and agreed that the night watchman shall be exempt when employed in that capacity only.

Third. Any operator paying the scale rate of mining and day labor under this agreement shall at all times be at liberty to load any railroad cars whatever, regardless

of their ownership, with coal, and sell and deliver such coal in any market and to any person, firm or corporation that he may desire.

Fourth. The scale of prices for mining per ton of 2,000 pounds, run of mine coal herein provided for, is understood in every case to be for coal practically free from slate, bone and other impurities, loaded in cars at the face, weighed before screening; and that the practice of pushing coal by the miners shall be prohibited.

Fifth. (a) Whether the coal is shot after being undercut or sheared by pick or machine, or shot without undercutting or shearing, the miners must drill and blast the coal in accordance with the State mining law of Illinois, in order to protect the roof and timbers and in the interest of general safety. Any miner who persistently violates the letter or spirit of this clause shall be discharged.

(b) The system of paying for coal before screening was intended to obviate the many contentions incident to the use of screens, and was not intended to encourage unworkmanlike methods of mining and blasting coal, or to decrease the proportion of screened lump, and the operators are hereby guaranteed the hearty support and co-operation of the United Mine Workers of America in disciplining any miner who from ignorance or carelessness, or other cause, fails to properly mine, shoot and load his coal.

Sixth. In case slate, bone, clay, sulphur or other impurities are sent up with the coal by the miner, it shall be the duty of whomever the company shall designate as inspector to report the same, with the estimated weight thereof, and the miner, or miners, so offending shall have such weight deducted from the established weight of the car, and for the first offense in any given month shall be fined 50 cents; for the second offense in the same month he or they shall, at the option of the operator, be fined \$2.00 or suspended for two working days; and for the third, or any subsequent offense, in the same month, or in malicious or aggravated cases for the first, or any subsequent offense, the operator may indefinitely suspend or discharge.

The company weighman shall post in a conspicuous place at the pit-head the names of all miners dealt with hereunder.

The inspector designated by the operator shall be a member of the U. M. W. of A., but in the discharge of the duties herein specified shall not be union or president or pit committee, subject to the jurisdiction of the local and against any miner or committeeman seeking in any way to embarrass the inspector in or because of the discharge of such duties the provisions of the miner's state constitution shall be invoked, and in addition he shall at the option of the operator be suspended for two working days.

In case it shall be alleged by either the local representatives of the miners, or by the operator, that the inspector is not properly performing his duties hereunder, it shall be so reported to the miner's sub-district president, who shall, within 48 hours after the receipt of notification, take it up with the superintendent of the company for adjudication; and, if it shall be found that the inspector is not faithfully performing such duties, he shall be discharged or transferred to other duties, as the operator may elect.

The proceeds of all fines hereunder shall be paid to the Miners' Sub-District Secretary-Treasurer, and under no circumstances shall any such fines be remitted or refunded.

Seventh. The miners of the State of Illinois are to be paid twice a month, the dates of pay to be determined locally, but in no event shall more than one-half month's pay be retained by the operator. When any number of men at any mine so demand, statements will be issued to all employees not less than 24 hours prior to pay day. The miners and operators shall decide locally as to the form and manner in which statements shall be issued. No commission will be charged for money advanced between pay days, but any advances between pay days shall be at the option of the operator.

Eighth. The price for powder per keg shall be \$1.75. The miners agree to purchase their powder from the operators, provided it is furnished of standard grade and quality; that to be determined by the operators and expert miners jointly, where there is a difference.

Ninth. The price for blacksmithing for pick mining shall be six-tenths of a cent per ton for room and pillar work and 12½ cents per day per man, or 25 cents per month for long wall for pick and drill sharpening.

Tenth. It is understood that there is no agreement as to the price of oil.

Eleventh. The inside day wage scale authorized by the Indianapolis agreement of Feb. 7, 1903, viz.:

Tracklayers.....	\$2 56
Tracklayers' helpers.....	2 36
Trappers.....	1 13
Bottom cagers.....	2 56
Drivers.....	2 56
Trip riders.....	2 56
Water Haulers and Machine Haulers.....	2 56
Timbermen, where such are employed,.....	2 56
Pipemen for compressed air plants.....	2 50
Company men in long wall mines of Third Vein District Northern Illinois.....	2 36
All other inside labor.....	2 36

Shall be the scale under this agreement: *Provided*, That the 12½ per cent advance shall apply on all classes of underground day labor not specified above whose rates have been fixed locally.

Twelfth. The above scale of mining prices is based upon an eight hour work day, and it is definitely understood that this shall mean eight hours work at the face, exclusive of noon time, six days a week, or 48 hours in the week, provided the operator desires the mine to work, and no local ruling shall in any way affect this agreement, or impose conditions affecting the same.

Any class of day labor may be paid, at the option of the operator, for the number of hours and fractions thereof actually worked, at an hour rate based on one-eighth of the scale rate per day: *Provided, however*, That when the men go into the mine in the morning they shall be entitled to two hours' pay whether the mine hoists coal two hours or not, except in the event that they voluntarily leave their work during this time without the consent of the operator, they shall forfeit such two hours' pay: *Provided, further*, That overtime by day laborers, when necessary to supply railroad chutes with coal by night or Sunday where no regular men therefor are exclusively employed, or when necessary in order not to impede the operation of the mine the day following, and

for work which cannot be performed or completed by the regular shift during regular hours without impeding the operation of the mine, may be performed and paid for at the same rate per hour.

Thirteenth. (a) The duties of the pit committee shall be confined to the adjustment of disputes between the pit boss and any of the members of the United Mine Workers of America, working in and around the mine, for whom a scale is made, arising out of this agreement, or any sub-district agreement made in connection herewith, where the pit boss and said miner, or mine laborers, have failed to agree.

(b) In case of any local trouble arising at any shaft through such failure to agree between the pit boss and any miner or mine laborer, the pit committee and the miners' local president and the pit boss are empowered to adjust it; and, in the case of their disagreement it shall be referred to the superintendent of the company and the president of the miners' local executive board, where such exists; and should they fail to adjust it—and in all other cases—it shall be referred to the superintendent of the company and the miners' president of the sub-district; and, should they fail to adjust it, it shall be referred in writing to the officials of the company concerned and the State officials of the U. M. W. of A., for adjustment; and in all such cases, the miners and mine laborers and parties involved must continue at work pending an investigation and adjustment, until a final decision is reached in the manner above set forth.

(c) If any day men refuse to continue at work because of a grievance which has, or has not been taken up for adjustment in the manner provided herein, and such action shall seem likely to impede the operation of the mine, the pit committee shall immediately furnish a man or men to take such vacant place, or places, at the scale rate, in order that the mine may continue at work; and it shall be the duty of any member, or members, of the United Mine Workers, who may be called upon by the pit boss, or pit committee, to immediately take the place or places assigned to him or them in pursuance hereof.

(d) The pit committee, in the discharge of its duties, shall under no circumstances go around the mine for any cause whatever, unless called upon by the pit boss or by a miner or company man who may have a grievance that he can not settle with the boss; and, as its duties are confined to the adjustment of any such grievances, it is understood that its members shall not draw any compensation except while actively engaged in the discharge of said duties. Any pit committeeman who shall attempt to execute any local rule or proceeding in conflict with any provision of this contract, or any other made in pursuance hereof, shall be forthwith deposed as committeeman. The foregoing shall not be construed to prohibit the pit committee from looking after the matter of membership dues and initiations in any proper manner.

(e) Members of the pit committee employed as day men shall not leave their places of duty during working hours, except by permission of the operator, or in cases involving the stoppage of the mine.

(f) The right to hire and discharge, the management of the mine, and the direction of the working force, are vested exclusively in the operator, and the U. M. W. of A. shall

not abridge this right. It is not the intention of this provision to encourage the discharge of employees, or the refusal of employment to applicants because of personal prejudice or activity in matters affecting the U. M. W. of A. If any employee shall be suspended or discharged by the company and it is claimed an injustice has been done him, an investigation to be conducted by the parties and in the manner set forth in paragraphs (a) and (b) of this section shall be taken up promptly, and, if it is proven that an injustice has been done, the operator shall reinstate said employee and pay him full compensation for the time he has been suspended and out of employment; provided, if no decision shall be rendered within five days the case shall be considered closed, insofar as compensation is concerned, unless said failure to arrive at a decision within five days is owing to delay upon the part of the operator, in which case a maximum of ten days' compensation shall be paid.

Fourteenth. The wages now being paid outside day labor at the various mines in this State, plus an advance of 12½ per cent, shall constitute the wage scale for that class of labor during the life of this agreement; provided, that no top man shall receive less than two dollars and two and a half cents per day.

Fifteenth. In the event of an instantaneous death by accident in the mine, the miners and underground employees shall have the privilege of discontinuing work for the remainder of that day; but work, at the option of the operator, shall be resumed the day following, and continue thereafter. In case the operator elects to operate the mine on the day of the funeral of the deceased, as above, or where death has resulted from an accident in the mine, individual miners and underground employees may, at their option, absent themselves from work for the purpose of attending such funeral, but not otherwise. And whether attending such funeral or not, each member of the U. M. W. of A. employed at the mine at which the deceased member was employed shall contribute 50 cents and the operator \$25 for the benefit of the family of the deceased, or his legal representatives, to be collected through the office of the company. In the event that the mines are thrown idle on account of the miners or other employees failure to report for work in the time intervening between the time of the accident and the funeral, or on the day of the funeral, then the company shall not be called upon for the payment of the \$25 above referred to.

Except in case of fatal accidents as above, the mine shall in no case be thrown idle because of any death or funeral; but in the case of the death of any employee of the company or member of his family, any individual miner may, at his option, absent himself from work for the purpose of attending such funeral, but not otherwise.

Sixteenth. (a) The scale of prices here-in provided shall include, in ordinary conditions, the work required to load coal and properly timber the working places in the mine, and the operator shall be required to furnish the necessary props and timber in rooms or working face. And in long wall mines it shall include the proper mining of the coal and the brushing and care of the working places and roadway according to the present method and rules relating thereto, which shall continue unchanged.

(b) If any miner shall fail to properly timber, shoot and care for his working

place, and such failure has entailed falls of slate, rock and the like, the miner whose fault has occasioned such damage shall repair the same without compensation and if such miner fails to repair such damage he may be discharged.

Any dispute that may arise as to the responsibility under this clause shall be adjusted by the pit committee and mine foreman, and in case of their failure to agree shall be taken up for settlement under the thirteenth section of this agreement.

In cases where the mine manager directs the placing of cross-bars to permanently secure the roadway, then, and in such cases only, the miner shall be paid at the current price for each cross-bar when properly set.

The above does not contemplate any change from the ordinary method of timbering by the miner for his own safety.

Seventeenth. The operators will recognize the pit committee in the discharge of its duties as herein specified, but not otherwise, and agree to check off union dues, assessments and fines from the miners and mine laborers, when desired, on proper individual or collective continuous order, and furnish to the miners' local representative a statement showing separately the total amount of dues, assessments and fines collected. When such collections are made, card days shall be abolished. In case any fine is imposed the propriety of which is questioned, the amount of such fine shall be withheld by the operator until the question has been taken up for adjustment and a decision has been reached.

Eighteenth. The operators shall have the right in cases of emergency work or ordinary repairs to the plant, to employ in connection therewith such men as, in their judgment, are best acquainted with and suited to the work to be performed, except where men are permanently employed for such work. Blacksmiths and other skilled labor shall make any necessary repairs to machinery and boilers.

Nineteenth. The erection of head frames, buildings, scales, machinery, railroad switches, etc., necessary for the completion of a plant to hoist coal, all being in the nature of construction work, are to be excluded from the jurisdiction of the United Mine Workers of America. Extensive repairs to or rebuilding the same class of work shall also be included in the same exception. The employees thereon to be excluded as above, when employed on such work only.

Twentieth. When any employee absents himself from his work for a period of two days, unless through sickness or by first having notified the mine manager and obtained his consent, he may be discharged.

Twenty first. (a) Except at the basing point, Danville, the differential for machine mining throughout the State of Illinois shall be 7 cents per ton less than the pick mining rate. It being understood and agreed that the machine mining rate shall include the snubbing of coal either by powder or wedge and sledge, as conditions may warrant, where chain machine is used; but it is understood that this condition shall not apply where two men have and work in one place only in the same shift, except at the option of the miner; and it shall also be optional with the miner which system of snubbing shall be followed. The division of the machine mining rate shall be fixed in joint sub-district meeting.

(b) The established rates on shearing machines and air or electric drills as now existing, shall remain unchanged during the ensuing year.

Twenty-second. Any underground employé not on hand so as to go down to his work before the hour for commencing work, shall not be entitled to go below, except at the convenience of the company. When an employé is sick or injured, he shall be given a cage at once. When a cage load of men comes to the bottom of the shaft who have been prevented from working by reason of falls or other things over which they have no control, they shall be given a cage at once. For the accommodation of individual employés, less than a cage load, who have been prevented from working as above, a cage shall be run mid-forenoon, noon and mid-afternoon, of each working day: *Provided, however*, That the foregoing shall not be permitted to enable men to leave their work for other than the reasons stated above.

Twenty-third. This contract is in no case to be set aside because of any rules of the U. M. W. of A. now in force or which may hereafter be adopted; nor is this contract to be set aside by reason of any provision in their national, State or local constitution.

Twenty-fourth. All classes of day labor are to work full eight hours, and the going to and coming from the respective working places is to be done on the day hands' own time. All company men shall perform whatever day labor the foreman may direct. An eight-hour day means eight hours' work in the mines at the usual working places, exclusive of noon time, for all classes of inside day labor. This shall be exclusive of the time required in reaching such working places in the morning and departing from same at night.

Drivers shall take their mules to and from the stables, and the time required in so doing shall not include any part of the day's labor; their time beginning when they reached the chance at which they receive empty cars—that is, the passing drivers at the shaft bottom, and the inside drivers at the parting—and ending at the same places; but in no case shall a driver's time be docked while he is waiting for such cars at the points named. The inside drivers, at their option, may either walk to and from their parting, or take with them, without compensation, either loaded or empty cars, to enable them to ride. This provision, however, shall not prevent the inside drivers from bringing to and taking from the bottom regular trips, if so directed by the operator, provided such work is done within the eight hours.

The methods at present existing covering the harnessing, unharnessing, feeding and caring for the mules, shall be continued throughout the scale year beginning April 1, 1903; but in cases where any grievances exist in respect to same, they shall be referred to the sub-district meetings for adjustment.

When the stables at which the mules are kept are located on the surface and the mules are taken in and out of the mines daily by the drivers, the question of additional compensation therefor, if any, is to be left to the sub districts affected for adjustment, at their joint sub-district meetings.

Twenty-fifth. Mission Field Scale:

Dirt and soap-stone men.....	\$2 03
Trackmen.....	2 03
Coal drillers.....	2 03
Rock pickers.....	2 03
Tool carriers.....	2 03
Shooters.....	2 36

Water carrier.....	1 35
Team and teamster.....	3 38
All help not otherwise mentioned.....	2 03

Twenty-sixth. The company shall keep the mine in as dry condition as practicable by keeping the water off the road and out of the working places. When a miner has to leave his working place on account of water, through the neglect of the company, they shall employ said miner doing company work when practicable and provided that said miner is competent to do such work; or he will be given another working place until such water is taken out of his place.

Twenty-seventh. The operator shall keep sufficient blankets, oil, bandages, etc., and provide suitable ambulance or conveyance readily available at each mine to properly convey injured persons to their homes after an accident.

Twenty-eighth. The operator shall see that an equal turn is offered each miner, and that he be given a fair chance to obtain the same. The check weighman shall keep a turn bulletin for the turn-keeper's guidance. The drivers shall be subject to whomsoever the mine manager shall designate as turn-keeper in pursuance thereof.

In mines where there is both hand and machine mining an equal turn shall mean approximately the same turn to each man in the machine part of the mine, and approximately the same turn to each man doing hand work; but not necessarily the same to each miner as to each man working with the machines.

Twenty-ninth. There shall be no demands made locally that are not specifically set forth in this agreement, except as agreed to in joint sub-district meetings held prior to May 1, 1903. Where no sub-districts exist, local grievances shall be referred to the United Mine Workers' State Executive Board and the mine owners interested.

The United Mine Workers of America, District No. 12.

Springfield, Ill., March 7, 1903.

ILLINOIS FREE EMPLOYMENT OFFICES.

ESTABLISHED AUGUST 2, 1899.

Reviewing the work of the Free Employment Offices since their establishment, August 2, 1899, to the close of the last fiscal year, October 1, 1902, the following statement is presented:

Statement.

YEAR.	APPLICATIONS FOR EMPLOYMENT.			APPLICATIONS FOR HELP.	
	Number filed.	Number of positions secured.	Number unfilled.	Number filed.	Number unfilled.
*1899.....	13,097	6,497	6,600	10,370	3,873
1900.....	37,285	31,218	6,067	35,542	4,324
1901.....	27,605	23,996	3,609	28,124	4,125
1902.....	44,900	40,181	4,719	47,497	7,316
Total.....	122,887	101,892	20,995	121,533	19,641

* Nine weeks.

This shows a total of 122,887 applications for employment, and 121,533 applications for help; also, that 101,892, or 83 per cent of those seeking employment were placed in positions, thereby supplying 84 per cent of those applying for help.

It may be well to mention in this connection, the cost to the State for maintaining these offices, as some criticisms touching this question have been made.

There are two distinct classes of our citizens that are directly concerned or to be included in whatever advantage or benefit may be brought about by or through the agency of these offices: these are the employer and the employé.

The foregoing statement shows that during the three years and nine weeks since these offices were established, 101,892 persons were assisted to obtain positions where they could work for wages, and, consequently, a like number of persons, who have use for the services of others, were supplied with such service. This makes a total of 203,784 persons directly involved and benefited by the assistance of these offices.

The total expense or cost to the State during the same period has been fifty-seven thousand three hundred and seventy-five dollars (\$57,375.00), or 28.2 cents for each position secured and filled. This should satisfy any reasonable person that for this small, almost insignificant, cost per capita, this large number of persons have been put in position to earn a livelihood and the same number furnished with the service sought for.

Considerable difficulty has been encountered in the enforcement of the law relating to private employment agencies. Two suits affecting the constitutionality of the act have been instituted, one affirmed by the court and the other still pending. The former case sought to have section 10 of the law set aside for the reasons that the fee, \$200.00 per annum, was excessive, and that the State could not engage in the same business for which it required a license from others. The court's decision held that the subject was one wholly within the police powers of the State, and that it declined to interfere with the discretion and prerogatives of the Legislature in enactments of that character. The pending suit attacks the validity of the entire law on the alleged grounds that the title embraces two distinct subjects, and is for that reason void. The principal defects of the law is the failure to provide the necessary machinery for its enforcement, and the omission to prescribe regulations governing the operation of private employment agencies. At present the only condition exacted of persons employed in that business is that they shall file a bond and pay a license fee of \$200.00 per annum. Governor Yates, in his message to the present General Assembly, recommended that the act be amended so as to provide that private employment agencies should be placed under the supervision and control of the Commissioners of Labor; that the annual fee be reduced to a more reasonable sum; that certain requirements relating to the keeping of records; the charging of registration fees; the sending of female help to places of

bad repute; prohibiting such agencies in places where intoxicating liquors are sold, should be observed. A bill embracing these suggestions has been offered for the favorable consideration and action of the Legislature.

NOTE. The General Assembly enacted an entirely new law to govern free employment offices and to regulate private employment agencies. This law went into effect May 11, 1903, and is published in full at the close of this report.

RECORD OF THE WORK OF THE FOUR OFFICES FOR THE YEAR 1902.

The work performed by the offices is set forth in condensed form as follows:

TABLE I—*Showing the Combined Business of the Four Offices for the Year.*

OFFICES.	APPLICATIONS FOR EMPLOYMENT.			APPLICATIONS FOR HELP.	
	Number Filed.	Number of Posi- tions Secured.	Number Unfilled.	Number Filed.	Number Unfilled.
North Side Office—Males.....	5,666	5,493	173	7,650	2,157

South Side Office—Females.....	6,013	5,791	222	7,481	1,690
Totals	18,451	†17,552	899	20,021	2,469
West Side Office—Males.....	6,830	4,918	1,912	5,347	429
West Side Office—Females.....	2,358	2,028	330	2,704	676
Totals	9,188	16,946	2,242	8,051	1,105
Peoria Office—Males.....	5,223	4,489	734	4,705	216
Peoria Office—Females	2,146	1,584	562	1,917	333
Totals	7,369	‡6,073	1,296	6,622	549
Total Males—Four Offices.....	30,157	26,661	3,496	30,242	3,581
Total Females—Four Offices	14,743	13,520	1,223	17,255	3,735
Grand total	44,900	¶40,181	4,719	47,497	7,316

* Of this number 510 males and 357 females, a total of 867, were secured positions on applications filed last year.

† Of this number 200 males and 23 females, a total of 223, were secured positions on applications filed last year.

‡ Of this number 551 males and 25 females, a total of 576, were secured positions on applications filed last year.

§ Of this number 1 male and 3 females, a total of 4, were secured positions on applications filed last year.

¶ Of this number 1,262 males and 408 females, a total of 1,670, were secured positions on applications filed last year.

Here it is shown that 44,900 persons applied to these offices, during the year for employment. This is an increase over last year of 17,295, or 62.65 per cent; however, the Peoria Office only reported for three months last year. It will be noticed in the foot note to the table, that 1,670 applicants were brought forward from those filed last year, of which 1,262 were males and 408 females; thus making a total of 46,570 applications for employment. To this number may be added 47,497 applications of persons seeking help, which gives a total of 94,067 applications handled and cared for by these offices during the year.

Calling attention to the 46,570 applications for employment, it is found that 31,319 or 67.46 per cent were males and 15,151 or 32.54 per cent females. Turning to the applications for help it is found that of 47,497 filed, 30,212 or 63.67 per cent were for male help and 17,255 or 36.33 per cent for female help. The proportion of both, applications for employment, and applications for help, being very nearly in the same ratio. Of the 46,570 applications for employment there have been 40,181 or 86.28 per cent who have been placed in positions, of this number 26,661 or 66.35 per cent were males, and 13,520 or 33.65 per cent females.

Referring to the 31,419 males applying for places to work, it is shown that 26,661 or 84.85 per cent were secured positions, and that of the 15,151 females, 13,520 or 89.24 per cent were put in position to get employment. Considering, in this connection, the applications for help, it is found that of the 47,497 applications filed, 40,181 or 84.60 per cent were supplied.

The following table gives the percentages for each of the offices and for all offices combined:

TABLE II—*Percentages of Positions Secured and Percentages of Help Furnished, both Male and Female.*

OFFICES.	PERCENTAGE OF POSITIONS SECURED APPLICANTS FOR EMPLOYMENT.			PERCENTAGE OF APPLICA- TIONS FOR HELP FURNISHED.		
	Male.	Female.	Both male and female.	Male.	Female.	Both male and female.
North Side Office.....	88.92	89.83	89.32	71.80	79.90	75.06
South Side Office.....	93.06	95.94	93.99	93.79	77.41	87.67
West Side Office.....	66.63	85.10	71.14	91.98	75.00	86.28
Peoria Office	85.93	73.71	82.23	95.41	82.63	91.71
The four offices.....	81.85	89.24	86.23	88.16	78.35	84.60

A comparison of these percentages with those of last year reveals very little change, some are increased while others are decreased. The South Side Office, Chicago, furnished positions for the largest percentage of its applicants for employment, and the Peoria office the largest percentage of applicants for help.

The following table of applications for employment, gives the combined work of the four offices of the State:

APPLICATIONS FOR EMPLOYMENT.

This represents the applications of 30,157 males seeking employment in the 166 occupations, and 14,743 females in 51 occupations, making a total of 44,900 for all of the offices.

Referring to the applications of males, the combined work of the Chicago Offices show an increase of 10,287 or 70 per cent over last year: The Peoria Office had a slight falling off compared with the three months reported last year. The work of the Chicago Offices in regard to applications made by females, shows an increase of 1,947

or 18 per cent over last year. The Peoria Office shows a small decrease. Considering the entire work of the Chicago Offices, as to receiving applications for employment, it will be noticed that the number received by the South Side Office almost equals that of both the North and West Side, being 49.16 per cent of the total number recorded.

The next table is closely allied to the one preceding, being the record of positions procured applicants during the year.

POSITIONS SECURED.

This presentation with that of table 3 represents what may be termed the supply and demand in the labor market, transacted by these offices during the year.

Positions have been secured for the males in 135 occupations, and for females in 44 occupations. The explanation that, of the 166 occupations of males represented in the applications for employment, only 135 occupations are shown in the list of positions secured, is that many applying for employment give certain occupations desired, and afterwards accept positions other than the one named in the original application. The same is true of the females, of the fifty-one occupations shown in the list of applicants only 44 are named in the positions secured.

Directing attention to the total number of positions secured by all the offices, and by the different offices, and comparing the work with last year, it is found that all the offices combined secured positions for 12,485 more persons than last year, or an increase in finished work of 45.1 per cent.

The increase of accomplished work in securing positions over last year, by the different offices, shows the North Side as 83.15 per cent, the South Side 42.48 per cent, the West Side 33.32 per cent and the Peoria Office 23.43 per cent.

To present the efficiency of the work of the offices in a more condensed form, showing the leading occupations in which much the larger number seek and find employment, the following is presented:

TABLE 5.—*Summary of the Leading Occupations, Showing Applications for Employment and Help with Percentages.*

Here is presented a classification of 19 different occupations for males, out of 166 represented in table three, and 21 occupations for females, out of the 51 shown in the same table.

This represents 40,336 or 80 per cent of the total applications for employment, and 43,687 or 92 per cent of those applying for help. Of the total number of the applications for employment here shown, 25,819 were males and 14,517 females. These represent 97 per cent of the total males, and 98 per cent of the females, as shown in table one. Observing the column of applications for help it will be seen that 26,785 were for males and 16,902 for females. For the males this is 89 per cent of the total applying for help, and 98 per cent of the females.

Therefore, taking notice of these large percentages, it is apparent that this condensed presentation is a fair exhibition of the business transacted by the offices for the year. The reading of the columns of percentages will give a very clear comprehension of the relation between the desire to obtain employment and the desire to obtain help.

Of the males 86 per cent of the farm hands applying were furnished work, while 81 per cent in need of this class of help were supplied; 96 per cent of laborers wanting work were provided with places, supplying 83 per cent of the demand; 88 per cent of the teamsters were given employment, serving 88 per cent of those asking this kind of help.

Of the females only 22 per cent of the stenographers applying for places were found employment, yet this supplied 80 per cent of requirement. Combining the applicants for clerical or office work only 30 per cent could be placed in positions, but this supplied 77 per cent of the demand.

Taking those classed as domestics, general house work and second work, these being presumably for the home life, it is found that out of nearly 6,000 applications for work, 96 per cent found places, thus supplying to the homes 79 per cent of those seeking this class of assistance.

The next two tables present the classified occupations, showing the applications for employment and help and positions secured with percentages of each class:

TABLE 6.—*Classified Occupations of Applicants for Employment, Positions Secured and Applications for Help in the Four Offices, with Percentages in Each Class.*

Referring to the males, it is shown that of the total number, 30,157, or 46 per cent of the applicants for employment were seeking some kind of manual labor, and that 52 per cent succeeded in finding work; this supplied 53 per cent of the call for this class of workmen.

Of those who recorded themselves as seeking work and having a trade, it is found that 70 occupations or crafts are represented, however, they only stand for 8.82 per cent of the whole number.

Of the females it is shown that domestic service, which represent 19 occupations, comprise 87 per cent of the total number (14,743)

applying for employment. Of the total number securing places, this class represents 90.48 per cent, and 86.46 per cent of those seeking this sort of help.

The age periods of the applicants is next shown in the following table:

This continues the classification of occupation as in the preceding tables.

The distribution of the applicants of both sexes, under the different age periods, shows no particular variation from last year.

The foregoing is supplemented by a summary of the different classes, which gives in condensed form the age of all applicants with percentages in each age period.

TABLE IX.—*Summary of Age Periods of Applicants by Classified Occupations.*

Sex and Classes of Occupations.	Number of occupations of each class.	Totals.	Under 20 yrs.	20, but under 30 yrs.	30, but under 40 yrs.	40, but under 50 yrs.	50, but under 60 yrs.	60 yrs. and over.	Not reported.

The largest percentages of both males and females are found in the column of 20 but under 30 years. Considering the males it is shown that 19,510 or 65 per cent of the total are reported between the ages of 20 and 40 years: Of the females the number under the same ages is 7,524 or 51 per cent of the whole number. Between the ages 40 and 50 years the percentages of males and females as to the total of each sex is nearly the same, this is true of the percentages of both sexes between the ages of 50 and 60 years, the showing is four per cent of the males and five per cent of the females. Of those over 60 years, it is gratifying to note that only one per cent of each sex applied for employment.

The next table shows the conjugal relations of the applicants; number of children, members of trade unions; days idle and those willing to accept places outside of the cities:

TABLE X—*Conjugal Conditions, Members of Trades Unions, Days Idle, and Number Willing to Accept Employment Out of City.*

A study of this statement in detail will reveal some of the social and other conditions of this large body of people who have applied to these offices for employment during the year.

To bring the matter to attention in a more abridged form the following table is presented:

TABLE 11—*Summary of the Conjugal Conditions, Members of Trade Unions, Days Idle and Number Willing to Accept Work Out of the City, with Percentages.*

Sex and Classification of Occupations.	Number of occupations in each class.	Totals.	CONJUGAL CONDITIONS.			Number members of trades unions.	Average number of days idle.	Number willing to accept work out of city.
			Number married.	Number single.	Number of dependent children.			
Males.....	166	30,157	6,328	23,829	6,246	936	44	13,847
Females.....	51	14,743	4,363	10,380	2,668	3	2,138
Percentages and avgs, males...			20.98	79.02	45.97
Percentages and avgs, females			29.59	70.41	per each	29	14.5

Trades.....	4	138	43	95	46	42	18
Miscellaneous.....	9	911	102	809	78	1	38	17

Of the 30,157 males, 6,328 or 21 per cent were married, with 6,246 children dependent, being a small fraction less than one child to each male; only 936 or 3 per cent were members of trade unions an average of 44 days idleness is reported for each; 13,847 or 46 per cent

were willing to accept of work outside of the cities. Referring to the females, of the 14,743 applying for work, 4,363 or 30 per cent were married, having 2,668 children dependent, or 61 per cent having one child each. Only three were members of trade unions, and only 15 per cent were willing to go out of the cities for work.

WAGES PAID.

The two following tables present the average wages paid to those furnished employment. Table 12 gives the wages in Chicago and Table 13 the wages in Peoria:

TABLE 12.—*Average Wages Paid Applicants to Whom Employment was Furnished by the Three Chicago Offices.*

Males.

Second work.....		*3 50	
Stenographers.....		8 50	
Telephone girls.....		4 00	
Vegetable cleaners.....			14 00
Washerwomen.....	1 50		

* Room and board.

By comparing the wages for males, here reported, with those of last year some advance will be found in several of the occupations, while no decrease is shown in any. This is also true as to females.

NATIONALITY.

The next presentation is the nationality of the applicants for employment:

TABLE 14—*Nationality of all*

Here is shown 18 nationalities of the male applicants, of the total 30,157, there were 747 classed under miscellaneous and 702 not reported, deducting these we have 28,708 divided among the 18 nationalities.

The native American leads all the rest, being 63 per cent of the total number. The Germans are the next highest, but only 13 per cent; this accounts for 76 per cent, and leaves 24 per cent distributed among the other 16 classes. Of the females 316 are classed as miscellaneous and 538 not reported, deducting these leaves 13,889 dis-

tributed among the 18 different nationalities, of which 6,435 or 46 per cent were Americans; the Irish, Germans and Swedes follow next in point of numbers. Those classed under the grouping "Domestic Service," whose nationality is given constitutes 87 per cent of the total; of which 42 per cent were Americans; 22 per cent Irish; 14 per cent Germans and 9 per cent Swedes. The Americans also lead in numbers all the the other occupations

A summary of the nationality of both sexes, in the classified industries, is presented as the final exhibit:

Referring to the males it has already been noticed that the number classed as Americans applying for employment largely exceeds all others, in all branches of the industries represented: Combining the four nationalities, Americans, Germans, Irish and Swedes, it is found that these represent 87 per cent of the total number. The same is true as to the females, these four nationalities constitute 88 per cent of the whole number.

The reports of the several superintendents follow:

REPORTS

OF THE

SUPERINTENDENTS

REPORT OF THE CHICAGO NORTH SIDE ILLINOIS FREE EMPLOYMENT OFFICE, 1902. 234 CHICAGO AVENUE.

(D. M. BROTHERS, Superintendent, Chicago.)

HON. DAVID ROSS, *Secretary Bureau of Labor Statistics, Springfield, Illinois.*

SIR—In compliance with section 6 of the law establishing free employment offices, I beg to submit the fourth annual report of the business of this office, covering the period from Oct. 1, 1901, to Sept. 30, 1902, together with the expense account for the same period.

The value of these offices must be apparent to all who observe the commercial and laboring interests of the State, as the details of the reports for the year will demonstrate. It is a continuous task on time and patience to look after the supplying of the demands, both for positions to be secured and help wanted; the applications for mechanical and the higher classes of labor have increased steadily.

This office, however, is still laboring under a disadvantage in that the appropriation is not sufficient to provide us with room to properly conduct the work of the female department. We should have extra rooms for waiting-room and for employers, so that employers could converse with domestics; this would avoid others overhearing necessary private conversation. The business of both departments has entirely outgrown the present quarters, and it is important that larger and more commodious rooms should be obtained.

It is found that the best results from advertising have been attained through the placing of cards in street cars. However, the present appropriation will not warrant the continuing of these cards more than three months in the year. If the appropriation for advertising was increased, much better results might be obtained; these advertisements could be continued through the entire year on all surface and elevated cars.

Respectfully submitted,

D. M. BROTHERS, *Superintendent.*

Chicago, Ill.

REPORT OF THE CHICAGO SOUTH SIDE ILLINOIS FREE EMPLOYMENT OFFICE, 1902. 429 WABASH AVENUE.

(GEO. W. GEARY, Superintendent, Chicago.)

HON. DAVID ROSS, *Secretary Bureau of Labor Statistics, Springfield, Illinois.*

SIR—Complying with section six of the act of the General Assembly creating the Illinois Free Employment Offices, I herewith submit the fourth annual report of the business of the South Side office for the year ending September 30, 1902, together with the expense of maintaining the office for the same period.

A careful perusal of this report will show that the volume of business has increased almost two-fold from the previous year. A great many reasons may be advanced for the large increase in the business of this office, but the principal reason is that the employers of labor, and the persons seeking employment, have been fully convinced that their wants can be supplied by making application to these offices.

There is no necessity of saying anything about the great good that comes from any medium that will bring together the person that is seeking honest employment, and the person who is desirous of employing competent and reliable help to assist in conducting his business. Especially is this true when this is accomplished without cost to either party.

Since the publication of our last report the Supreme Court has decided the constitutionality of the act creating these offices, and the Attorney General of the State, in conjunction with the State's Attorney of this county, has vigorously prosecuted all violators of the law, which has had the effect of compelling many of the private agencies to cease from doing business, while those who have complied with the law and have taken out licenses have been more reasonable in their charges to persons seeking employment, and in a general way it has been of great benefit to the public.

The daily papers, and in fact the press generally, still manifest a very friendly feeling towards these offices, and to them is due great credit for the success these offices have attained.

Very respectfully yours,

GEO. W. GEARY,
Superintendent.

REPORT OF THE CHICAGO WEST SIDE ILLINOIS FREE EMPLOY-
MENT OFFICE, 1902. CORNER CANAL AND
RANDOLPH STREETS.

S. P. REVERE, Superintendent, Chicago.

HON. DAVID ROSS, *Secretary Bureau of Labor Statistics, Springfield, Illinois:*

SIR—In compliance with section six of the law establishing the Illinois Free Employment Offices, I herewith submit the fourth annual report of the business transacted in this office, for the year ended September 30, 1902, together with the expense account for the same period.

Since submitting the last annual report we have the satisfaction of knowing that the business of this office has very perceptibly increased, namely, about 40 per cent, certainly a showing which must be gratifying.

A careful comparison of the work of this office with previous years discloses the gratifying fact that the office has had its fair share of the prosperity which is so general throughout the entire country.

The following report will give in detail the work of this office for the time herein stated.

Respectfully submitted,

S. P. REVERE,
Superintendent.

Statement of the Expenses of the West Side Illinois Free Employment Office, from Oct. 1, 1901, to Sept. 30, 1902.

Rent	\$540 00	Insurance	\$ 57 19
Janitor	360 00	Advertising	537 00
Telephone service.....	178 20	Postage.....	68 00
Towel supply	16 50	Miscellaneous.....	95 40
Gas	20 28		
Ice	23 60	Total.....	\$1,916 17

REPORT OF THE PEORIA, ILLINOIS, FREE EMPLOYMENT OFFICE ,
1902.(EDWARD E. WALKER, Superintendent, Masonic Temple, Peoria.)

HON. DAVID ROSS, *Secretary of Bureau of Labor Statistics, Springfield, Ill.*

SIR—Complying with the requirements of section 6 of an act passed by the General Assembly of Illinois creating the Illinois Free Employment Offices, I herewith submit my second annual report for the year ended Oct. 1, 1902.

At the time of submitting the last annual report of this office which covered but a period of three months, the operation of the office was somewhat of an experiment, as to whether or not employment offices in the cities of the State outside of Chicago would be beneficial to the public. After a careful examination of this report, the statement is justified that this matter is beyond the experimental stage, and that employment offices would be beneficial to every city that has a population of 25,000 or over.

Bringing the employer and employé together, as is the object of these offices, saves both parties a great deal of time and expense; and, with proper management, the offices will become such a necessity to the people of the State that they will require of their representatives in the General Assembly an extension of these free employment offices, so that the State will greatly assist in keeping its people employed.

During the past year calls have been received at this office for help from Quincy, Danville, Canton, Galesburg, Decatur, Springfield, Bloomington, Abingdon, Monmouth, Galva, Kewanee, Aurora, Chicago, Pekin, Jacksonville and numerous other cities, towns and villages, and in many instances the office has been heartily commended for the good class of help it has been sending out.

It is found that the appropriation for advertising is of great benefit in supplying the demands of the office, and it is hoped that an increase for this purpose may be obtained for the next two years.

The report will show that quite a number of farm hands have been supplied to the farmers of this section, which goes to show that the benefits of these offices extend to the country as well as to the city.

Respectfully submitted,

EDWARD E. WALKER,

Superintendent.

AN ACT relating to employment offices and agencies.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That free employment offices are hereby created as follows: One in each city of not less than fifty thousand population, and three in each city containing a population of one million or over, for the purpose of receiving applications of persons seeking employment, and applications of persons seeking to employ labor. Such offices shall be designated and known as Illinois Free Employment Offices.

§ 2. Within sixty days after this act shall have been in force, the State Board of Commissioners of Labor shall recommend, and the Governor, with the advice and consent of the Senate, shall appoint a superintendent and assistant superintendent and a clerk for each of the offices created by section 1 of this act, who shall devote their entire time to the duties of their respective offices. The assistant superintendent or the clerk shall in each case be a woman. The tenure of such appointment shall be two years, unless sooner removed

for cause. The salary of each superintendent shall be fifteen hundred (1,500) dollars per annum, the salary of such assistant superintendent shall be one thousand two hundred (1,200) dollars per annum. The salary of such clerk shall be one thousand (1,000) dollars per annum, together with proper amounts for defraying the necessary costs of equipping and maintaining the respective offices.

§ 3. The superintendent of each such free employment office shall, within sixty days after appointment, open an office in such locality as shall have been agreed upon between such superintendent and the secretary of the Bureau of Labor Statistics, as being most appropriate for the purpose intended; such office to be provided with a sufficient number of rooms and apartments to enable him to provide, and he shall so provide, a separate room or apartment for the use of women registering for situations or help. Upon the outside of each such office, in position and manner to secure the fullest public attention, shall be placed a sign which shall read in the English language, Illinois Free Employment Office, and the same shall appear either upon the outside windows or upon signs in such other languages as the location of each such office shall render advisable. The superintendent of each such free employment office shall receive and record in books kept for that purposes [purpose], names of all persons applying for employment or help, designating opposite the names and addresses of each applicant, the character of employment or help desired. Separate registers for applicants for employment shall be kept, showing the age, sex, nativity, trade or occupation of each applicant, the cause and duration of non-employment, whether married or single, the number of dependent children, together with such other facts as may be required by the Bureau of Labor Statistics to be used by said bureau: *Provided*, that no special registers shall be open to public inspection at any time, and that such statistical and sociological data as the Bureau of Labor may require shall be held in confidence by said bureau, and so published as not to reveal the identity of any one: *And, provided, further*, that any applicant who shall decline to furnish answers as to the questions contained in special registers shall not thereby forfeit any rights to any employment the office might secure.

§ 4. Each such superintendent shall report on Thursday of each week to the State Bureau of Labor Statistics the number of applications for positions and for help received during the preceding week, and the number of positions secured, also those unfilled applications remaining on the books at the beginning of the week. It shall also show the number and character of the positions secured during the preceding week. Upon receipt of these lists, and not later than Saturday of each week, the secretary of the said Bureau of Labor Statistics shall cause to be printed a sheet showing separately, and in combination, the lists received from all such free employment offices.

§ 5. It shall be the duty of each such superintendent of a free employment office to immediately put himself in communication with the principal manufacturers, merchants and other employers of

labor, and to use all diligence in securing the coöperation of the said employers of labor with the purposes and objects of said employment offices. To this end it shall be competent for such superintendents to advertise in the columns of newspapers, or other medium, for such situations as he has applicants to fill, and he may advertise in a general way for the coöperation of large contractors and employers in such trade journals or special publication as reach such employers, whether such trade or special journals are published within the State of Illinois or not.

§ 6. It shall be the duty of each such superintendent to make report to the State Bureau of Labor Statistics annually, not later than December first of each year, concerning the work of his office for the year ending October first of the same year, together with a statement of the expenses of the same, including the charges of an interpreter when necessary, and such report shall be published by the said Bureau of Labor Statistics annually with its coal report. Each such superintendent shall also perform such other duties in the collection of statistics of labor as the secretary of the Bureau of Labor Statistics may require.

§ 7. No fee or compensation shall be charged or received, directly or indirectly, from persons applying for employment or help through said free employment offices, and any superintendent, assistant superintendent or clerk, who shall accept, directly or indirectly, any fee or compensation from any applicant or from his or her representative, shall be deemed guilty of a misdemeanor, and upon conviction, shall be fined not less than twenty-five nor more than fifty dollars and imprisoned in the county jail not more than thirty days.

§ 8. The term "applicant for employment," as used in this act, shall be construed to mean any person seeking work of any lawful character, and "applicant for help" shall mean any person or persons seeking help in any legitimate enterprise; and nothing in this act shall be construed to limit the meaning of the term work to manual occupation, but it shall include professional service, and all other legitimate service.

§ 9. PRIVATE EMPLOYMENT AGENCIES.] No person, firm or corporation in this State shall open, operate or maintain a private employment agency for hire, or where a fee is charged to either applicant for employment or for help, without first obtaining a license for the same from the State Commissioners of Labor. Such license fee, in cities of fifty thousand (50,000) population and over, shall be fifty dollars (\$50) per annum. In all cities containing less than fifty thousand (50,000) population a uniform fee of twenty-five dollars (\$25) per annum will be required. Every license shall contain a designation of the city, street and number of the building in which the licensed party conducts said employment agency. The license together with a copy of this act, shall be posted in a conspicuous place in each and every employment agency. No agency shall print, publish or paint on any sign, window or insert in any newspaper or publication, a name similar to that of the Illinois Free Employment

Office. The Commissioners of Labor shall require with each applicant for a license a bond in the penal sum of five hundred dollars (\$500), with one or more sureties, to be approved by the said commissioners, and conditioned that the obligator will not violate any of the duties, terms, conditions, provisions or requirements of this act. The said commissioners are authorized to cause an action or actions to be brought on said bond in the name of the People of the State of Illinois for any violation of any of its conditions, and they may also revoke, upon a full hearing, any license, whenever in their judgment, the party licensed shall have violated any of the provisions of this act. It shall be the duty of every licensed agency to keep a register, in which shall be entered the name and address of every applicant. Such licensed agency shall also enter into a register the name and address of every person who shall make application for help or servants; and the name and nature of the employment for which such help shall be wanted. Such register shall, at all reasonable hours, be open to the inspection and examination of the Commissioners of Labor or their agents. Where a registration fee is charged for receiving or filing applications for employment or help, said fee shall in no case exceed the sum of two dollars (\$2), for which a receipt shall be given, in which shall be stated the name of the applicant, the amount of the fee, the date, the name or character of the work or situation to be procured. In case the said applicant shall not obtain a situation or employment through such licensed agency within one month after registration as aforesaid, then said licensed agency shall forthwith repay and return to such applicant, upon demand being made therefor, the full amount of the fee paid or delivered by said applicant to said licensed agency, provided that such demand be made within thirty (30) days after the expiration of the period aforesaid. No agency shall send or cause to be sent any female help or servants to any place of bad repute, house of ill-fame or assignation house, or to any house or place of amusement kept for immoral purposes. No such licensed agency shall publish or cause to be published any false or fraudulent notice or advertisement, or to give any false information, or to make any false promise concerning or relating to work or employment to anyone who shall register for employment, and no licensed agency shall make any false entries in the register to be kept as herein provided. No person, firm or corporation shall conduct the business of any employment office in, or in connection with, any place where intoxicating liquors are sold.

§ 10. It shall be the duty of the Commissioners of Labor, and the secretary thereof, to enforce this act. When informed of any violation, it shall be their duty to institute criminal proceedings for the enforcement of its penalties before any court of competent jurisdiction. Any person convicted of a violation of the provisions of this act shall be guilty of a misdemeanor and shall be fined not less than

fifty dollars (\$50) nor more than one hundred (100) dollars for each offense, or by imprisonment in the county jail for a period not exceeding six (6) months, or both, at the discretion of the court.

§ 11. A private employment agency is defined and interpreted to mean any person, firm or corporation furnishing employment or help or giving information as to where employment or help may be secured, or who shall display any employment sign or bulletin, or through the medium of any card, circular or pamphlet, offering employment or help, shall be deemed an employment agency, and subject to the provisions of this act, whether a fee or commission is charged or not: *Provided*, that charitable organizations are not included.

§ 12. All money or moneys received from fees and fines shall be held by the said Commissioners of Labor, and shall constitute a fund for the purpose of enforcing the provisions of this act; and the said commissioners shall, at the end of each fiscal year, make an account of said fund and pay into the State Treasury whatever balance shall remain after paying the necessary disbursements for the purpose of enforcing the provisions of this act.

§ 13. All printing, blanks, blank books, stationery and such other supplies as may be necessary for the proper conduct of the business of the offices herein created shall be furnished by the Secretary of State upon requisition for the same made by the superintendents of the several offices.

§ 14. All acts and parts of acts in conflict herewith are hereby repealed.

§ 15. Whereas, an emergency exists, therefore this act shall take effect and be in force from and after its passage.

APPROVED May 11, 1903, in force May 11, 1903.
